PLEASE NOTE: GAP AT THE LATCH IS NORMAL.

You will notice a gap between the gate latch and the frame. This is NOT a defect. Your gate is a pressure-mounted gate, and this gap will disappear once the tension bolts are properly tightened against the wall.

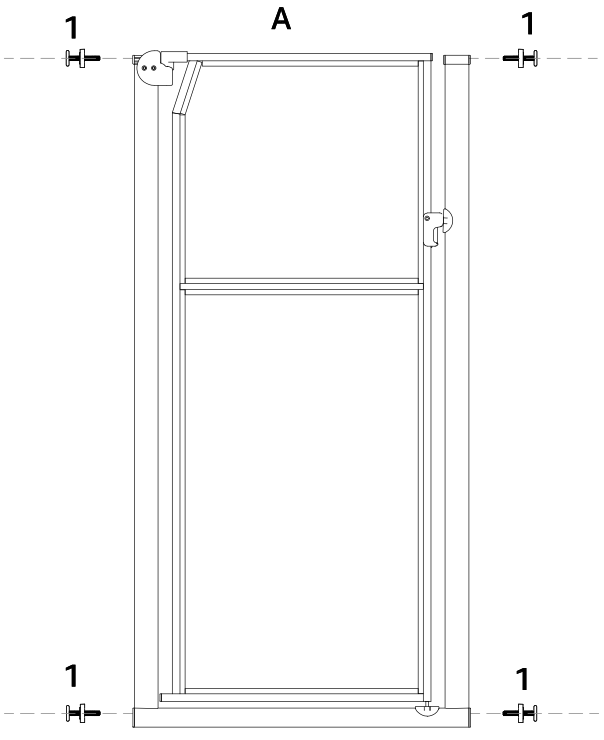

ASSEMBLY INSTRUCTIONS

1 Choose Your Installation Method

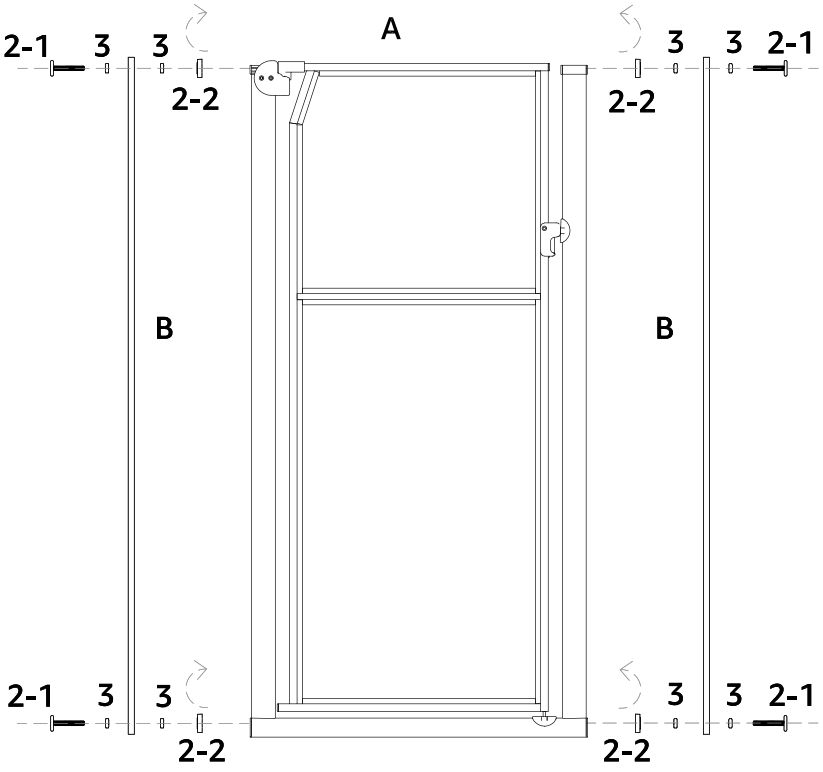

Option A: Without Adjuster

Insert Short Bolts (1) into the 4 corners of the gate.

Option B: With Adjuster

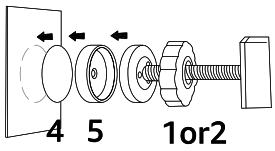

Assemble Long Bolts (2) and Adjuster (B) in this exact order:
Rod (2-1) → Nut (3) → Adjuster (B) → Nut (3) → Wall Pad (2-2)
Then, insert into the corners.

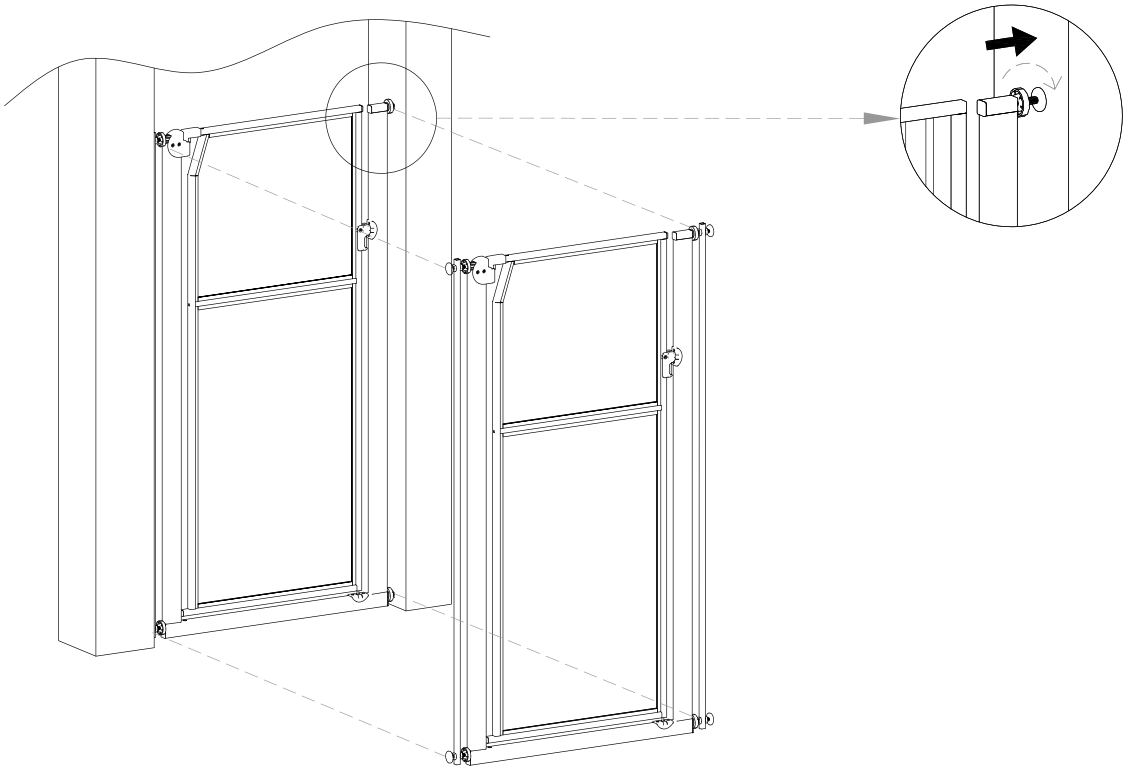

2 Position the Gate

Optional) For Extra Stability:
Install Wall Cups (5) where the bolts meet the wall BEFORE tightening the gate to the door frame.

Use double-sided tape or even install the screws if needed.

1.Position the gate in the doorway.
2.Turn the nuts on all 4 corners to tighten the bolts against the wall.
3.Keep the gate closed, and continue tightening UNTIL the gap at the latch is fully closed.

3 Installation has been completed.
