

STEP 1

Chandelier Body Frame Installation

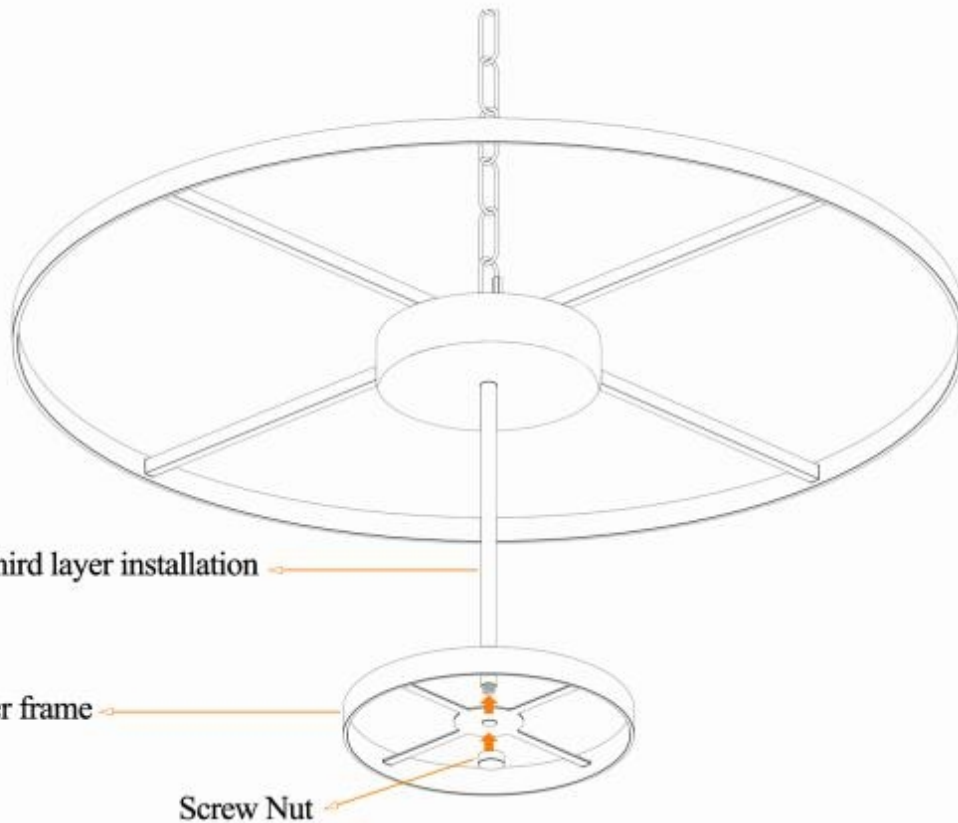

1. Put wire through the hanger and install the hanging chain to the first layer of the chandelier body. Then fix the hanger to the ceiling with expansion screws or self-tapping screws. Connect the wire to the electrical box and power-on test.

STEP 2

Chandelier Body Frame Installation

2. Install the downrod to the bottom of the first layer, then thread the top screw portion of the downrod through the third layer of the frame and secure it with a screw nut.

STEP 3

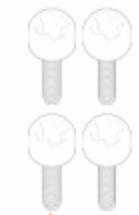

Chandelier Body Frame Installation

3. Use the small downrod, gold screw-small and gold screw-normal to fix the second layer on the fixture. The chandelier body frame is assembled after completing this step.

STEP 4

Install 8 E14 Bulbs and Power-on Test

Install 8 E14 bulbs to the chandelier and turn on the light to check if the chandelier is working.

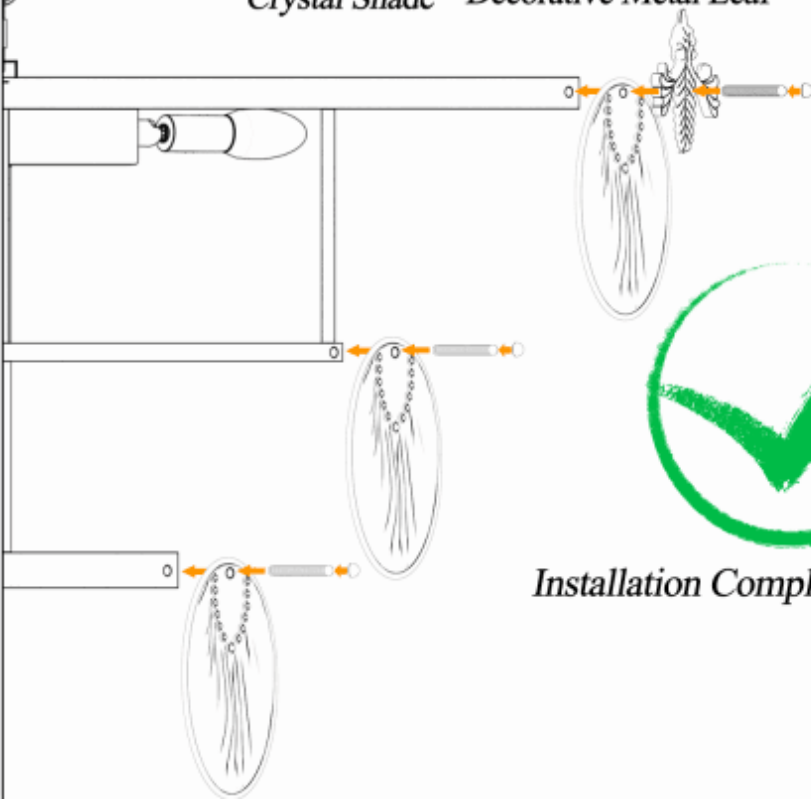

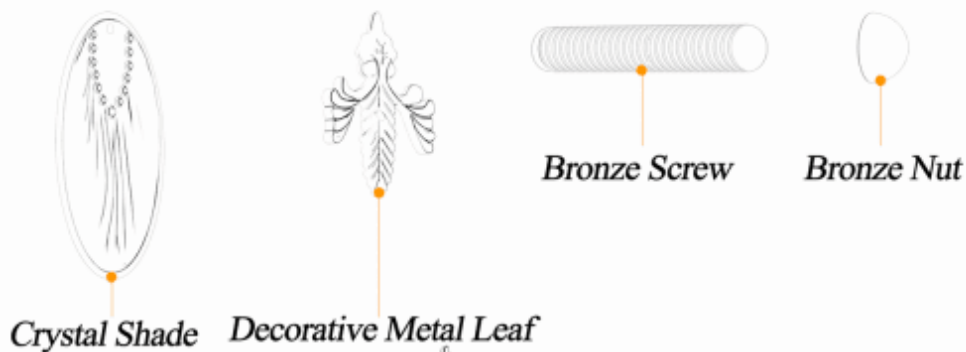

STEP 5

Install Crystal Shades

Use the bronze screws and nut to fix crystal shades on the chandelier frame.

Attention: Decorative metal leaves only need to be installed on the first layer, the second and third layers do not need to install decorative metal leaves.
