Assemble on a flat, clean and soft surface.

Auf einer flachen, sauberen und weichen Oberfläche zusammenbauen.

Assembler sur une surface plate, propre et douce.

Assemblare su una superficie piatta, pulita e morbida.

Ensamblar sobre una superficie plana, limpia y suave.

Professional installation is highly recommended.

Eine professionelle Installation wird dringend empfohlen.

Une installation professionnelle est fortement recommandée.

Si raccomanda vivamente l'installazione professionale.

Se recomienda altamente la instalación profesional.

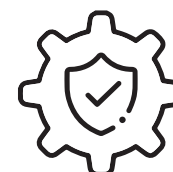

Periodically Check That All Components Are Tightly Secured.

Überprüfen Sie Regelmäßig, Dass Alle Komponenten Fest Gesichert Sind.

Vérifiez Périodiquement Que Tous Les Composants Sont Bien Fixés.

Controllare Periodicamente Che Tutti I Componenti Siano Ben Fissati.

Verifique Periódicamente Que Todos Los Componentes Estén Bien Asegurados.

To better protect this product, never use an air bed in sub-zero temperatures. Avoid direct sunlight exposure and be careful of sharp objects and contact with rough floors. Handle pumps with caution.

Important Safety Guidelines

Read all instructions before using.

Dangers

Always unplug from electrical outlets before cleaning due to the risk of electric shock.

Warning

1. Do not operate this device if the cord or plug is damaged. If the product is damaged or water is dropped, refer it to the service center.
2. Do not operate the device with the air holes closed. Make sure there is no dust, lint, hair, etc. in the air holes.
3. Do not drop or insert objects into the hole.
4. Do not use it outdoors. Use only for home use.
5. Keep the pump away from aerosol (spray) products where they are used, where oxygen is administered, and from ignitable liquids. Where the pump is used, there should be good ventilation
6. Do not block the vent of the pump.
7. Do not open the pump case, this may pose an electrical hazard, the user cannot repair it.
8. Do not over-expand.
9. Disconnect the plug from the outlet before cleaning.
10. Please use it out of reach of children. When a person who is physically unwell use this, please help them, and be extra careful.
11. Use this product only for the purposes described in the manual.
12. Keep the cord away from the heated surface.
13. To disconnect, turn all controls to the OFF position and remove the plug from the outlet.
14. To reduce the risk of electric shock, this instrument has a polar plug (one blade is wider than the other blade). This plug can only be used in one direction with a polar outlet. If the plug does not fully fit into the outlet, reverse the plug. Do not change the plug in any way.
15. The pump must be powered at 110V AC.
16. It is not recommended to connect to 110V power unattended when not in use.
17. Continuous expansion/contraction time is not recommended to exceed 4 minutes for proper pump use; the pump will not automatically turn off.
18. If the pump is overheated due to excessive continuous expansion/contraction, the power is automatically shut off and set to restart operation after 30 minutes.
19. The pump included in this air bed is heat protected.
20. Please save this instruction, this instrument is double insulated. Double insulated products provide two insulation systems instead of grounding. Double insulated products do not provide grounding and do not add grounding to the product. Dual insulated products require careful attention and knowledge of the system and must only be carried out by qualified service personnel in the factory. Replacement parts for double insulated products must be the same as replacement parts.

Reference

The air bed material may expand at first use and may require additional air to reach the desired pressure. The air inside the bed may expand and contract as the temperature changes, reducing the pressure inside the bed. In this case, the built-in pump can be used to add more air to achieve the desired firmness.

WARNING

Choking hazard

Children under
0-15 months old
are prohibited
from using it

- Newborns or children under 15 months of age should not use this air mattress.
- If used by children over 15 months old, make sure enough space is available on the left/right/top/bottom of the air mattress.
- If space is not secured around the air mattress, there may be a risk of suffocation due to child jamming.
- Always keep the air mattress fully pressurized when using it.
- Refer to instructions for additional warnings.

Repair (with repair kit)

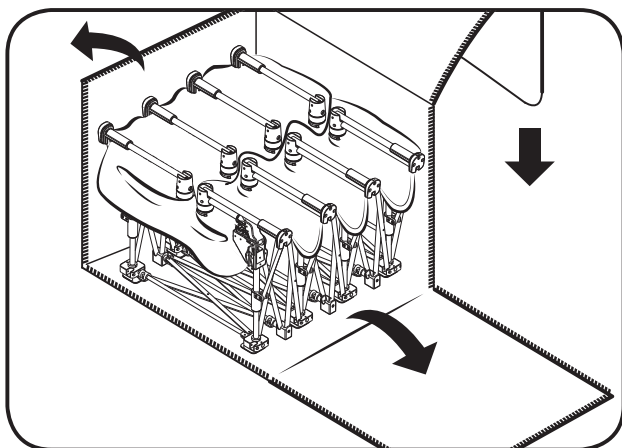

Repair the leaky areas due to holes in the tube caused by inadvertent use. First, contract the bed according to the air discharge instructions. Clean the damaged area thoroughly. Cut clear patch materials (included in the repair kit) into sufficient sizes to cover the holes. Apply an appropriate amount of intra-tube adhesive around the damaged area. After 5 minutes, attach the enclosed film. Press down to ensure that the film adheres well. Use after about 10 hours have elapsed so that it can dry out enough.

Critical safety information and warnings.

Warning This is an electrical appliance. To avoid the risk of fire, burns, injuries, and electric shock, do not use it within or near the reach of a young child. Do not use it in or around the water. It cannot be used outdoors, and it is an indoor-only bed. This air bed should be placed in open spaces before use. Make sure there are no sharp objects, stairs, drops, or fragile objects in the area. Unplug it when not in use.

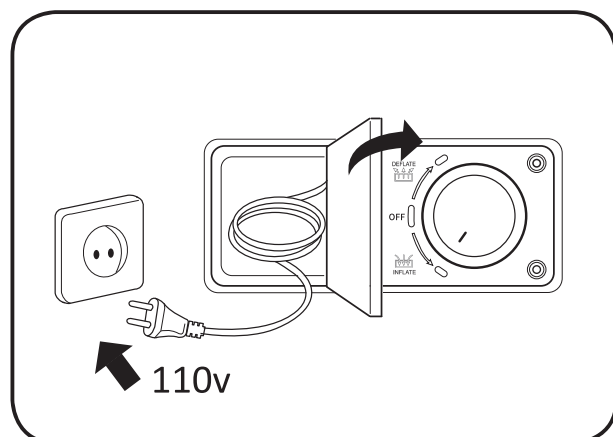

HOW TO INSTALL

STEP 1

Before airfilling, unzip the bag case so that the bag case panel lies flat on the floor. This ensures that the frame of the bed is not damaged when the tube is operated and the frame spreads out naturally from the bag case.

STEP 2

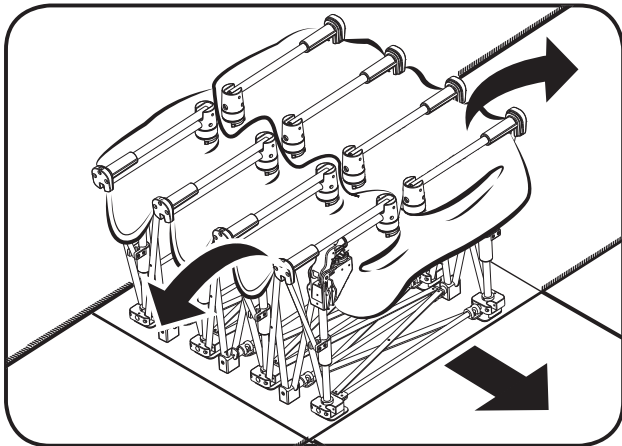

Plug the electrical cord of the pump into a 110V outlet.

"Turn the button in the direction of the air injection to start the air injection.

- Don't leave anything on or around the air bed while the air is being injected.
- 4 meter long and 3 meter wide space must be secured for smooth air injection.

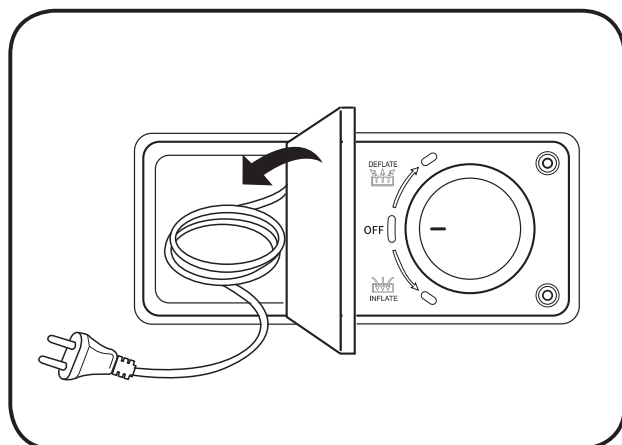

HOW TO INSTALL

STEP 3

The air bed frame automatically expands in the storage case.

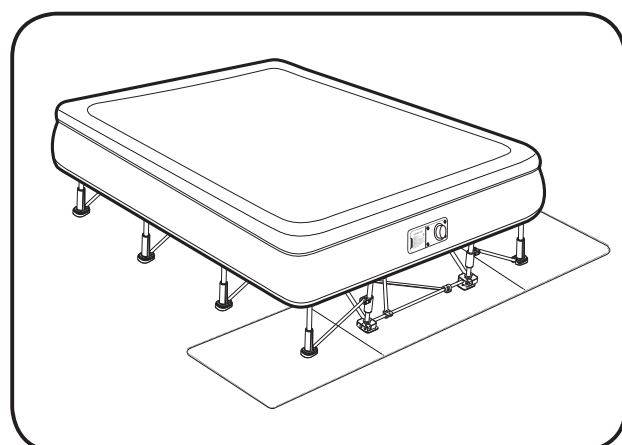

STEP 4

The air pump will not turn off automatically.

- When the air bed is completed, turn off the switch yourself. Typically, the air bed injection time is a takes about two minutes until frame's legs settles on the ground and the air is constant in the tube
- When the air injection is completed, Please get rid of the electrical cord for safety

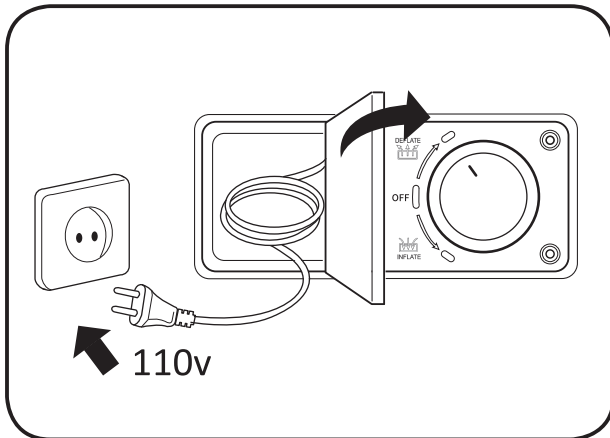

STEP 5

The bed is ready to use.

STORAGE METHOD

STEP 1

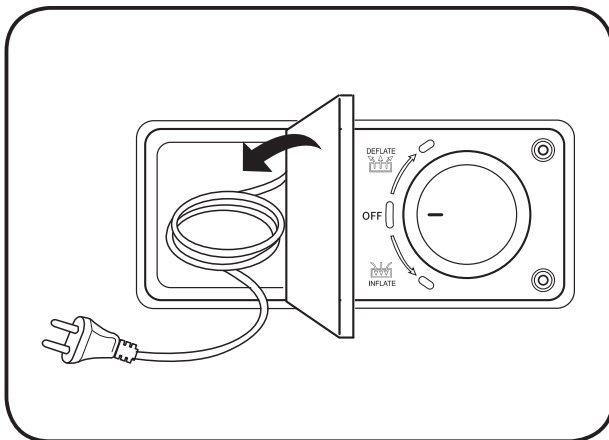

Before you take out the air, make sure there are no bedding or objects on the one-touch bed.

Plug the pump's electrical cord into a 110v outlet. Turn the button towards the air discharge direction to start the air discharge.

The pump discharges the remaining air from the one-touch bed

STEP 2

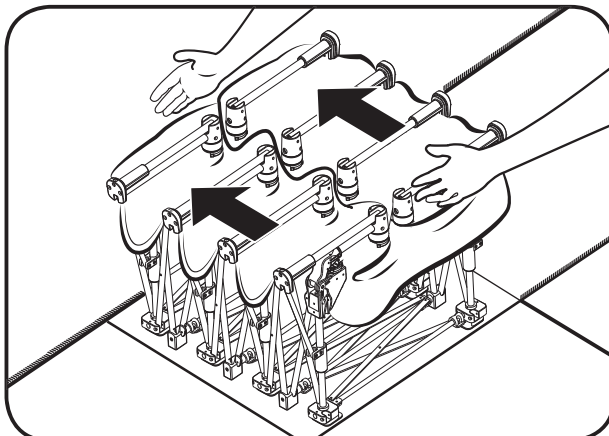

The pump will not turn off automatically.

- Turn off the switch and unplug the electrical cord when you are done removing air.

Caution!

For safety, this product limits the operating time of the air pump to 4 minutes. please turn off the switch as soon as the air bed is completed (It will takes about 2minutes).

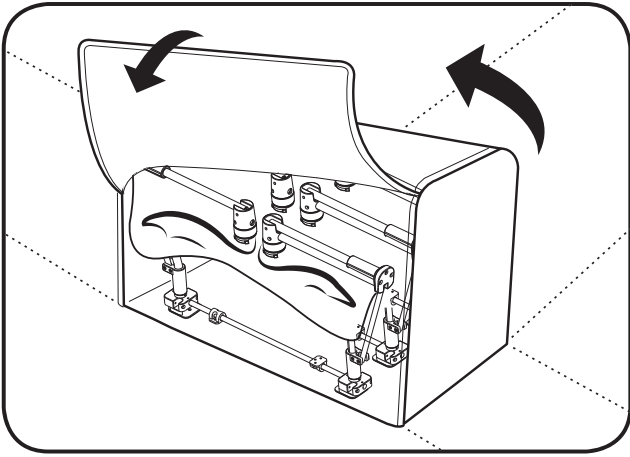

STEP 3

Gently lift the end of the air bed frame and push it back into the storage case.

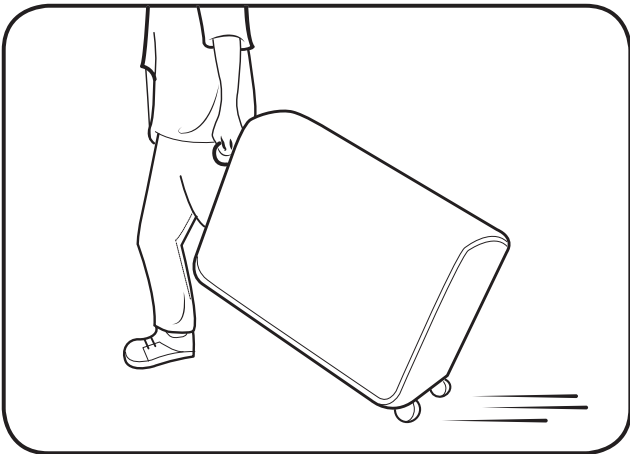

STORAGE METHOD

STEP 4

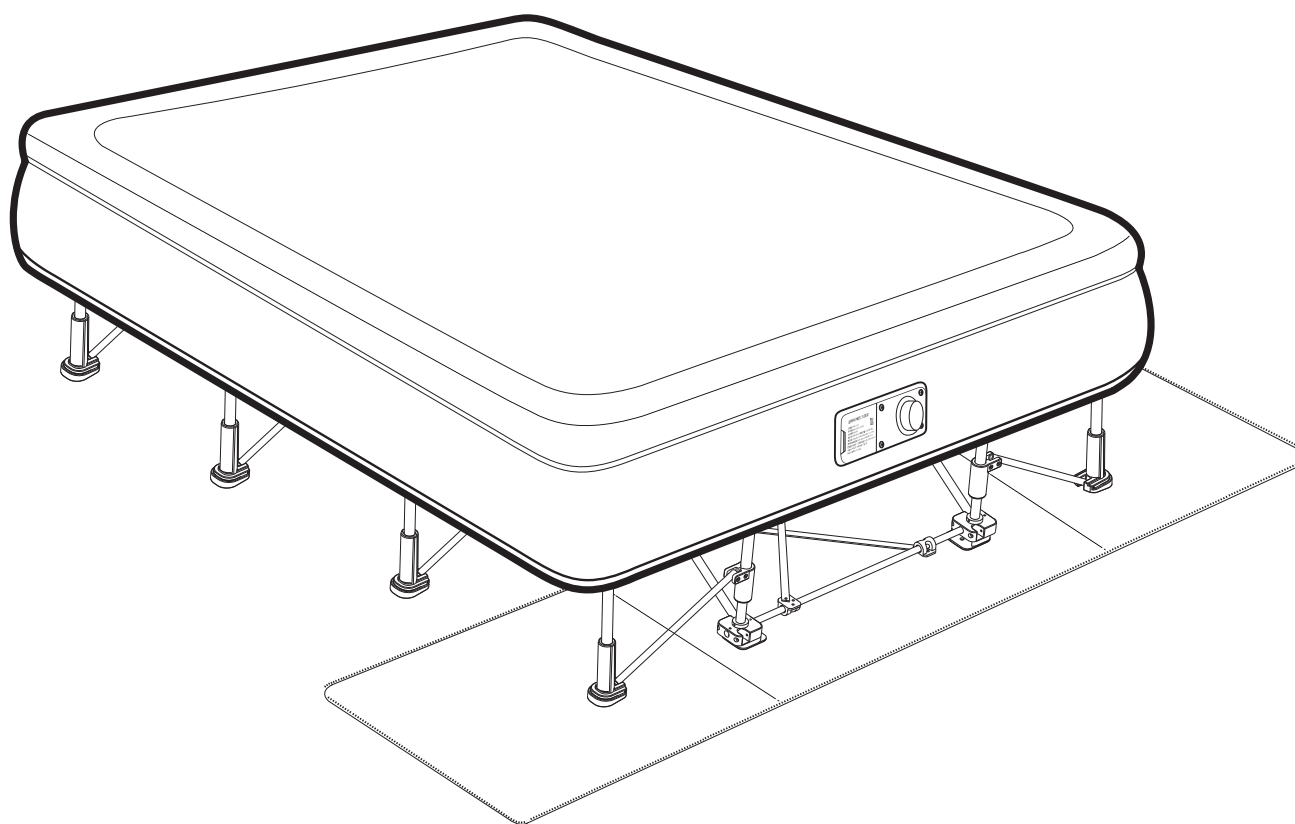

Zipper the case after putting it in the storage case.

STEP 5

Handles and wheels are attached to the bag to make it easier to move and store the product
