- Assemble on a clean non-marring surface (packing foam)-
- Save all packaging until finished-

Assembly Steps

Overview

... Wait **72h**

After opening the compression bag (Note: Please do not cut with a knife, so as not to damage to the product), the corners around the cushions if there are wrinkles, you need to wait for about 72 hours, it is recommended that guests pat and knead the corners of the sofa, in order to sponge better recovery.

If you need any help, please take a picture and contact the seller.

Step 1

Cardboard box

Remove the compressed package from the cardboard box.

Spread the compressed sand evenly. Using a knife, cut along one edge of the packaging. Remove Foam Sofa (A), Cushion (B) and Spherical Cushion (C), and place them on a clean, flat, scratch-free surface.

Step 2

If you see the folds,Unzip the bottom ofthe product,Put your hand in,Gently pat and knead to tidy up thecreased sponge,Wait for the spongeto become fulland flat before Zip up the bottom of the product.

Step 3

Partial wrinkles on the surface of the fabric can besmoothed out with aniron.

Questions & Answers about Proposition 65

- What is Proposition 65?

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. These chemicals can be in the products that Californians purchase, in their homes or workplaces, or that are released into the environment. By requiring that this information be provided, Proposition 65 enables Californians to make informed decisions about their exposures to these chemicals.

Proposition 65 also prohibits California businesses from knowingly discharging significant amounts of listed chemicals into sources of drinking water.

Proposition 65 requires California to publish a list of chemicals known to cause cancer, birth defects or other reproductive harm. This list, which must be updated at least once a year, has grown to include approximately 900 chemicals since it was first published in 1987.

- What types of chemicals are on the Proposition 65 list?

The list contains a wide range of naturally occurring and synthetic chemicals that include additives or ingredients in pesticides, common household products, food, drugs, dyes, or solvents. Listed chemicals may also be used in manufacturing and construction, or they may be byproducts of chemical processes, such as motor vehicle exhaust.

- What does a warning mean?

If a warning is placed on a product label or posted or distributed at a workplace, a business, or in rental housing, the business issuing the warning is aware or believes that it is exposing individuals to one or more listed chemicals.

By law, a warning must be given for listed chemicals unless the exposure is low enough to pose no significant risk of cancer or is significantly below levels observed to cause birth defects or other reproductive harm.

- Where can I get more information on Proposition 65?

If you have specific questions on the administration or implementation of Proposition 65, you can contact OEHHA's Proposition 65 program at P65.Questions@oehha.ca.gov, or by phone at (916) 445-6900.
