

Installation Manual for Storage Rack

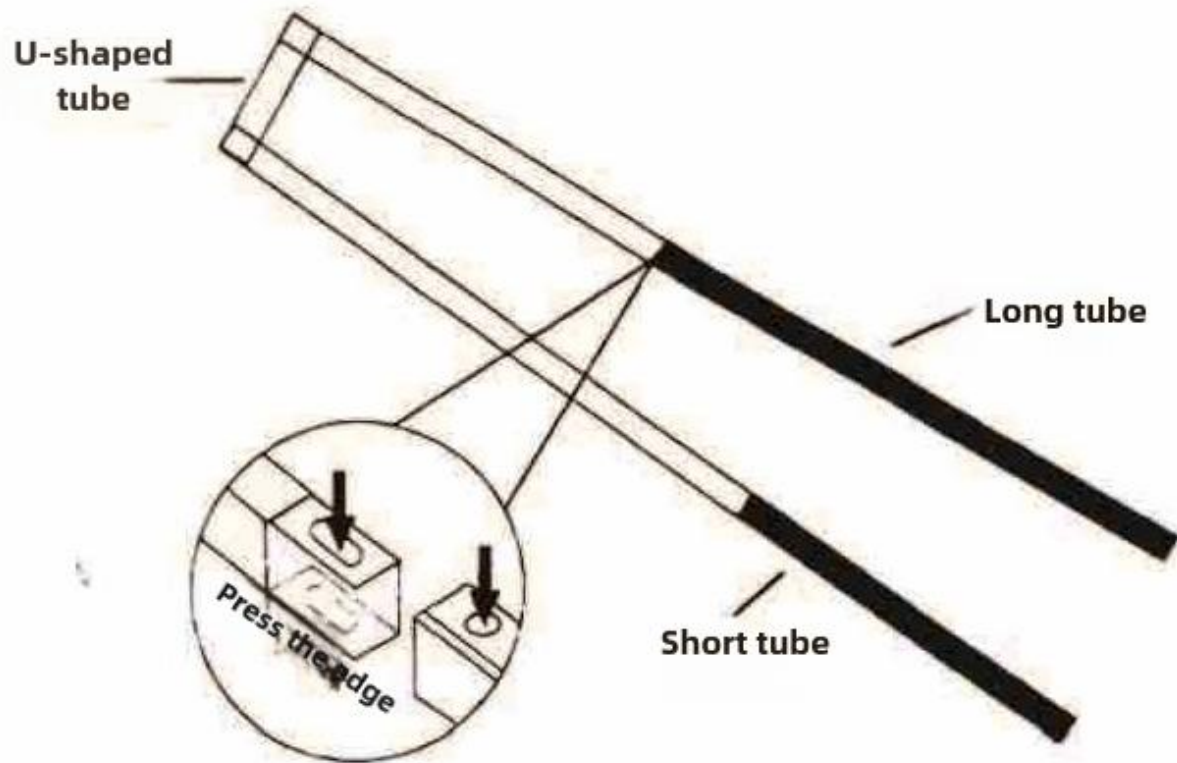

Just need 5 simple steps (taking the 4-tier model as an example)

01 Open the packaging and count the accessories. Install anti-slip foot pads on the front short tube and rear long tube.

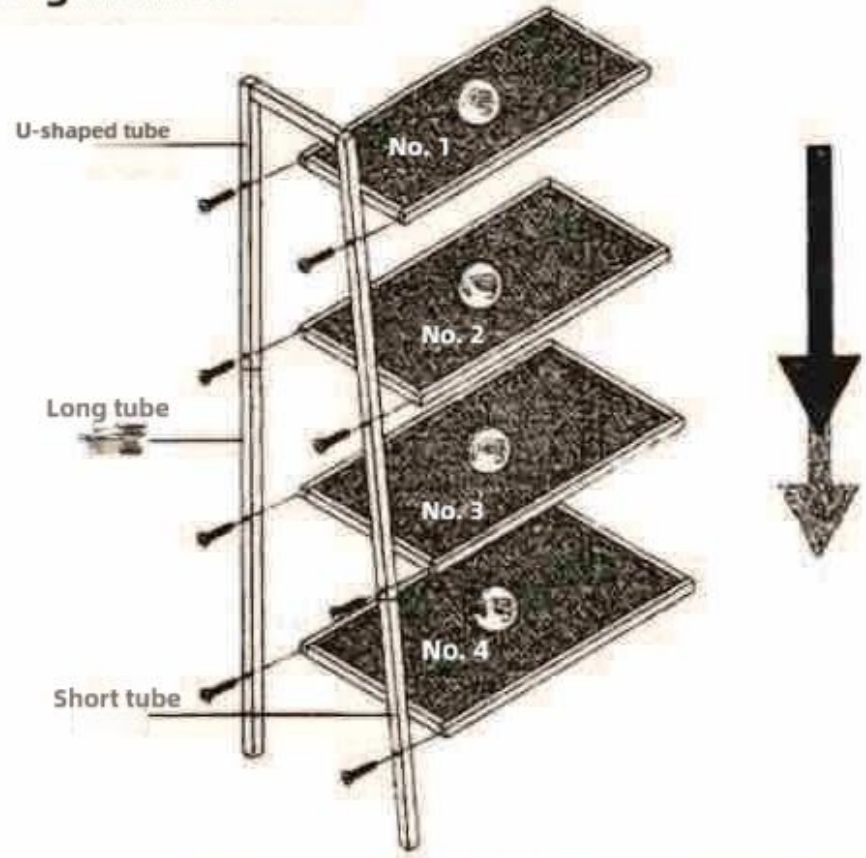

- 02** Connect the U-shaped tube/short tube/long tube properly, paying attention to the docking between the holes. When inserting, press the edge of the long hole by hand.

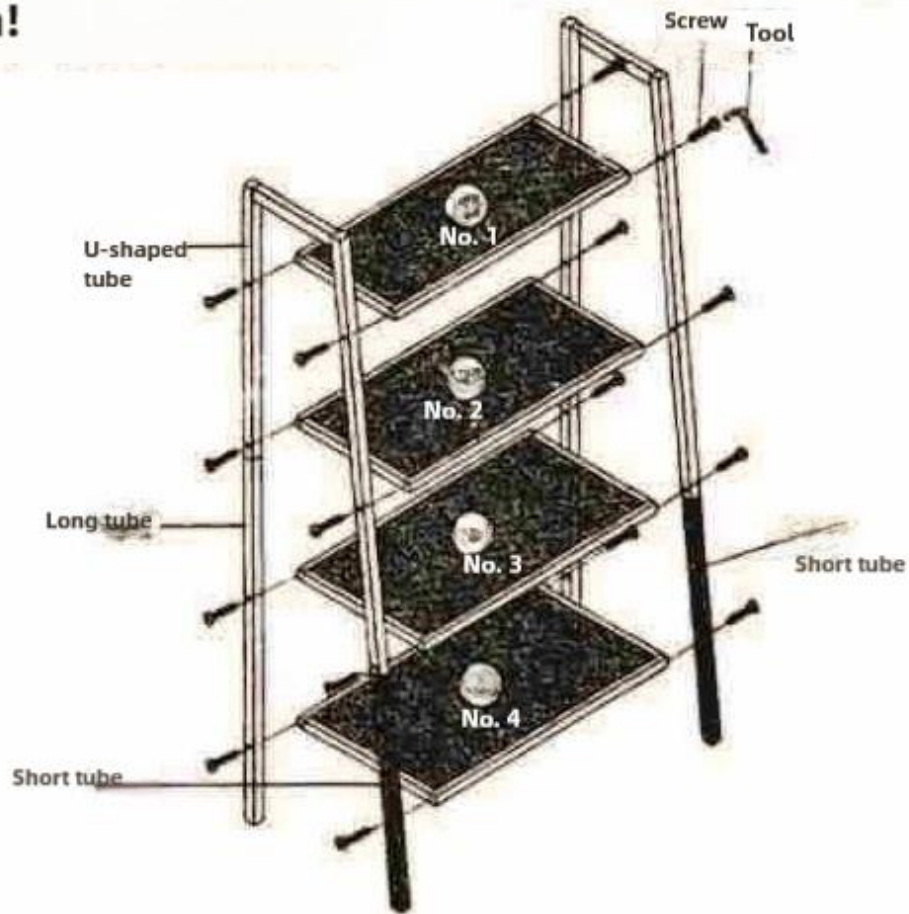

03

Install one side from top to bottom according to the order of the mesh board, and the screws do not need to be tightened.

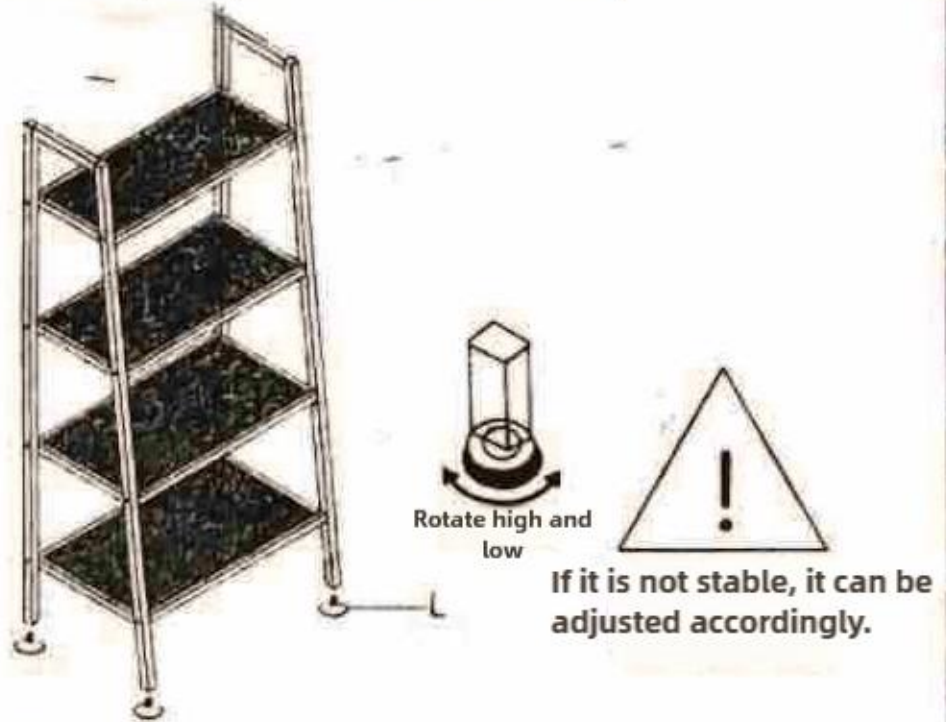

04

The other side should also be installed from top to bottom, but be careful not to install the bracket upside down!

05 Place the shelf flat and tighten the screws from top to bottom. If it is uneven, adjust the balance pad.

Precautions:

01. After receiving the item, check if there are any missing accessories first!
02. Be sure to install in the order shown in the instructions!
03. The mesh board should be installed from the smallest size, do not install it in reverse.
04. If you encounter any problems, please contact online customer service for consultation in a timely manner!

Dear customers, the product has traveled a long distance to be delivered to you, and there may be slight collisions during transportation. We kindly ask for your understanding. If you encounter any problems, please communicate with us in a timely manner.

Please believe that our service can satisfy you until you are satisfied!
