SAFETY INFORMATION

WARNING

- Before connecting the power supply, make sure that the power supply used matches the specifications of the ceiling fan.
- All wiring must comply with national and local electrical codes ANSI/NFPA70. If you are not familiar with wiring, please use a qualified electrician.
- To reduce the risk of fire or electric shock, turn off the power to the fuse box or circuit breaker before installing the fan.
- To reduce the risk of personal injury, attach the fan directly to the building's support structure and ensure that it can accept at least 35 pounds (15.9 kg).
- Make sure that the installation location allows the fan blades to rotate without obstacles.

Installation Location

WARNING

- Do not operate this fan with a variable (Rheostat) wall controller or dimmer switch.
- Doing so could result in damage to the ceiling fan's remote control unit.

PRE-INSTALLATION

Tools Required (Not Included)

Power Drill

Screwdriver

Step Ladder

Wire Stripper

Electrical Tape

Parts List

Mounting bracket X1

Light Cover X 1

LED & Light Kit Pan X 1

Motor X 1

Canopy X 1

Fan Blade X 3

Blade Screw X 6

Blade screw gasket X 3

Self-tapping Screw X 4

Expansion Bolt X 2

Remote Control Bracket X 1

Remote Bracket Screw X 2

Balance Kit X 2

Wire Caps Screw Terminals X 3

Remote Control X 1

Receiver X 1

INSTALLATION INSTRUCTION

Step 1: Mounting Bracket Installation

1. Drill holes with electric drill ($\phi 8$ mm).
2. Use expansion screws to fix the mounting bracket to the ceiling.

Fasten the mounting bracket to the ceiling with self-tapping screws.

Step 2: Fan Blade Installation

- 1 Loosen and remove the three screws that are not tightened

- 2 Align the three holes on the canopy with the main body of the motor and secure in place

- 3 Tighten the three screws.

- 1 Place the fan blade on top of the motor, align the holes and tighten the screws

- 2 Install the three fan blades.

- 3 Loosen the three screws on the light kit mounting plate.

Note:

- The fan blade needs to be aligned with the "center" position of the screw hole group.
- Do not lock the screws when installing the blades and then tighten all the screws after all the fan blades are installed.

Step 3: Installation of LED Board

- ③ Thread the motor line through the LED board, then align the LED board with the triangular cover on the motor and put it on.

- ④ Install the screws on the triangular cover into the corresponding holes.

- ⑤ Connect the motor line and the lamp panel line.

Step 6: Wiring Instruction

⚠ Shut off the power to the fuse box or circuit breaker before wiring.

- ① The receiver is connected to the motor power cord and the ceiling power cord respectively.

- ② Hang the ceiling fan on the hook of the hanging disc.

Note:

Connect wires color to color, plug to plug.

Live Wire

Neutral Wire

Ground Wire

- 3 Connect the motor wire and connect the blue and white wires of the lamp wire to the blue and white wires of the receiver respectively

- 4 Twist the two black wires (L) together and the two white wires (N) together

- 5 Screw on the wire caps at the wire head

- 6 Put the receiver inside

Step 6: Install the ceiling fan

③ Install the screws on both sides of the hanging disc (leave 3-5mm)

④ Insert the ceiling fan into the gap position

⑤ Rotation to the right

⑥ Tighten the four screws

Step 7: Install the Lampshade

1 Put the light cover to the LED board.

2 Spin forward to tighten the light cover.

OPERATION INSTRUCTION

Control Method

Reversible Function

Summer (Forward):
A downward airflow
creates a cooling
effect.

Winter (Reverse):
An upward airflow
increases the indoor
temperature.

PS: If you want to change the fan's rotation direction, please press the button while the fan is running.

Timing Control

4H: The fan will automatically shut off after 4 hours.
Close the Timing Control: Press the button "FAN ON/OFF"

Memory function of LED light color temperature.

Our LED Light comes with a color temperature memory function. If the light is turned off for less than 7 seconds and then turned on again, it will switch to the next color temperature. If the light is turned off for more than 7 seconds and then turned on again, it will remember the color temperature from before it was turned off.
Note: The LED light may not correspond with the image. Please refer to the actual product.

SPECIFICATIONS

Product Name	Ceiling Fan	Size	42"	52"	60"
		Gross Weight	4 KG	5 KG	6 KG
Rated Voltage	110V-265V	Motor Power	19W	35W	40W
Lamp configuration	15W LED	Motor Spec	Φ140*10	Φ140*10	Φ140*15
Lampshade size	Φ 180 mm	Overall height	280mm		
control method	Remote Control	Fan blade	3 fan blades		

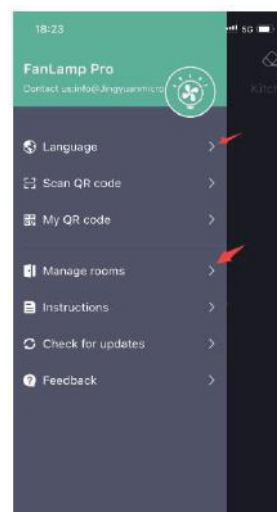

How TO Use the Mobile APP

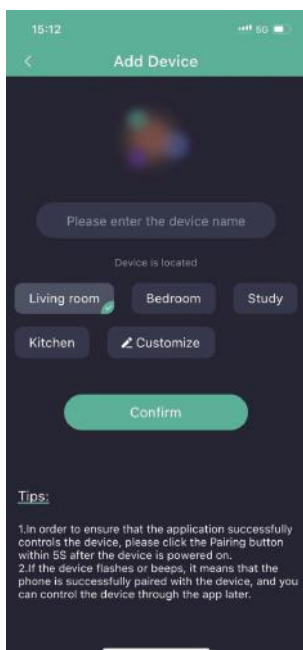

1. Scan the barcode and download the FANLAMPPRO APP
(Android could download from GOOGLE PLAY STORE)

2. Choose the Language and Manage room information

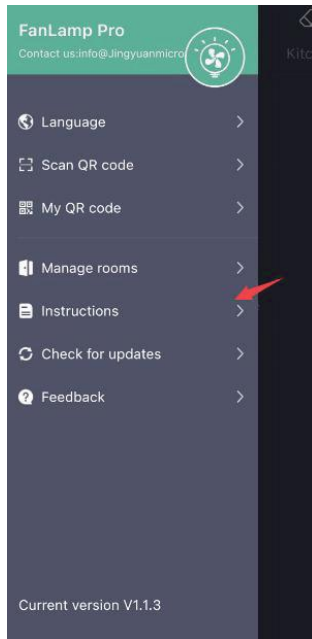

3. Add a new fan.

4. Choose a name for a new fan and select the room where it is located

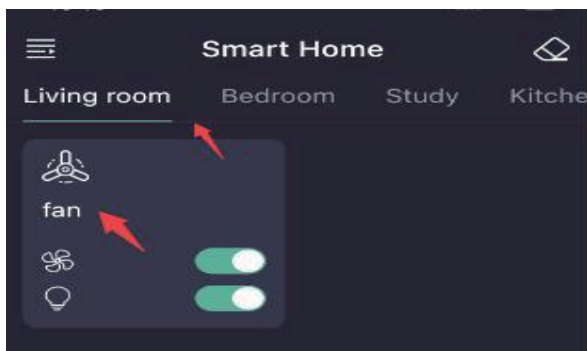

5. In case, it isn't located in one of the predetermined locations, select the Personalize option and add a new room.

6. Follow APP's instruction to operate the ceiling fan.
NOTE: Only one device can be paired.
Once a new device is paired, the previous device will no longer be.

7. Enter the main control interface, turn on the Bluetooth from smart phone, turn off the electric power supply, and then turn on the electric power supply again, the LED of the ceiling fan is bright and the Bluetooth of device is ready for connecting to smart phone. Finally, click the Pairing Button in APP within 5 seconds of power. If the pairing button is green, the ceiling fan has been connected with smart phone. APP can control the ceiling fan now.

8. Enter room and Click the Fan control interface.
