**Step 5:** Attach it to glass surfaces with the suction cups.

## Friendly Reminder

1. If this built-in blower fails to inflate, please first check that the voltage matches the required voltage. Additionally, ensure the plug is securely connected to both the power cord and the outlet—loose connections are a common cause of malfunction. These simple checks often resolve the issue quickly.

2. Keep the power cord and plug away from water sources.
3. Unplug when not in use. Deflate by opening the zipper before storing.
4. Store in a dry, cool place after fully drying to avoid mold.
5. Keep away from sharp objects and open flames.
