

Description

The toilet safety rails give more care to pregnant women, post-operative rehabilitators, the elderly, and the disabled, so they can be more relaxed and comfortable in every way. How about trying the toilet safety rail? They have a strong load-bearing capacity. The strong threaded feet and carbon steel material also enhance its safety, so you and your family can use it with confidence.

Key Features

Great Safety: The toilet safety rails are specially designed to provide you and your family with more stable support and protect your normal activities. The **anti-skid** sleeve on the armrest can effectively reduce the risk of slipping and falling due to wet hands and protect your safety.

High Load-bearing Capacity: This newly upgraded toilet safety rails' thicker curved tube (0.039in) and stable side frame machine welded make its bearing capacity up to 330 lbs, so you can use it with confidence.

Durable Material: It is composed of a high-quality carbon steel frame, which not only has good hardness but also more stability so that you can rest assured of long-term use.

High Flexibility: You can adjust the length of this toilet safety rails between 23.62-25.6in and the height between 25.6-30.71in through holes on the frame, which can provide safety for people of most heights and shapes.

Space-saving: The retractable design and side frames on both sides of the toilet make it not occupy much space for you, even in narrow bathrooms.

Easy to Install: Detailed installation steps, simple construction and complete accessories allow you to install it quickly and easily.

Easy to Clean: The electrostatic coating smooth surface makes it easy to clean. If there is dust, you just need to wipe it with a damp rag.

Customer Service: We aim to provide quality products and services. If you have any problem, please feel free to contact us. We will reply and solve the problem for you as soon as possible.

Details

Threaded Feet: 5 circles and 97mm diameter threaded feet are not only **non-slip** but also suitable for all floors.

Fixing Clamps: The clamps on both sides make it tight to different curvatures of the toilet without hurting the toilet and shaking to improve safety.

Bent Pipe: The bent pipe is covered with a black polyurethane foam sleeve that can withstand high temperatures, low temperatures and various humidity, making it ideal for use in toilets.

Powder Treatment: Its surface is treated with powder so that it has better **anti-corrosion** and **waterproof** capabilities, and is **non-toxic and harmless** so that you can rest assured of use.

Application

It is widely used in family toilets, bathrooms, stairs, hospitals, sanatoriums, disabled centers, hotels, laundry rooms, and other places where safety railings are required. And it's perfect for seniors, people with disabilities and people recovering from injury or surgery.

Installation

1. Align the bend with the support frame and insert the connecting rod.
2. Adjust the holes of the two rods to align well and insert the C-pin.
3. Align the connecting rod with the other end and insert it into the support frame.
4. Insert the two C-shaped fixed pins.
5. Rotate the suction cup frame clockwise.
6. Rotate the large suction cup tightly.
7. Insert the foot tube.
8. Tighten the large suction cup to fit the toilet.

Specification

Color: White

Material: Carbon Steel, Polyurethane Foam

Process: Electrostatic Spraying, Powder Treatment

Installation Mode: Floor-standing

Load Capacity: 150kg/ 330lbs

Adjustable Height: 65-78cm/25.6-30.71in

Adjustable Length: 60-65cm/23.6-25.6in

Tube Thickness: 1.0mm/ 0.039in

Width: 52cm/20.5in

Net Weight: 5kg/ 11.02lbs

Gross Weight: 5.8kg/ 12.79lbs

Package Size: 68*49*12cm/ 26.77*19.29*4.72in

Package Included

2* Curved Tube

2* Side Frames

4* Footbeds

2* Suction Cups

Other Accessories for Assembly
