## INSTRUCTION WAY

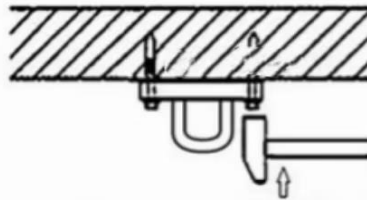

Made for Concrete Ceiling or Wall

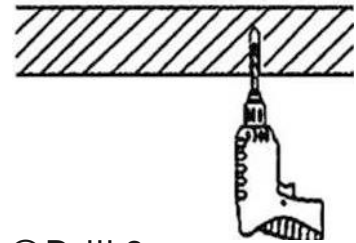

+

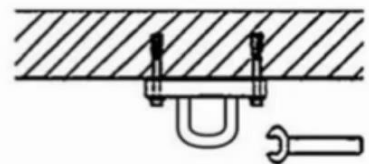

① Use a stud finder to locate secure supports in your home and mark their positions.

③ Insert the four expansion bolts using a hammer.

② Drill 2 holes of 55mm depth with a 7mm bit.

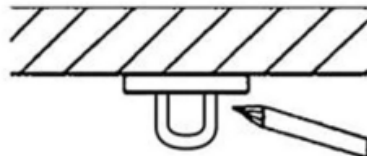

④ Tighten with a wrench.

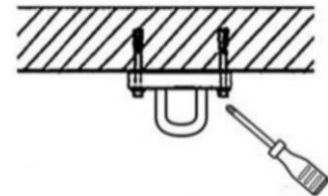

Made for Wooden Ceiling

+

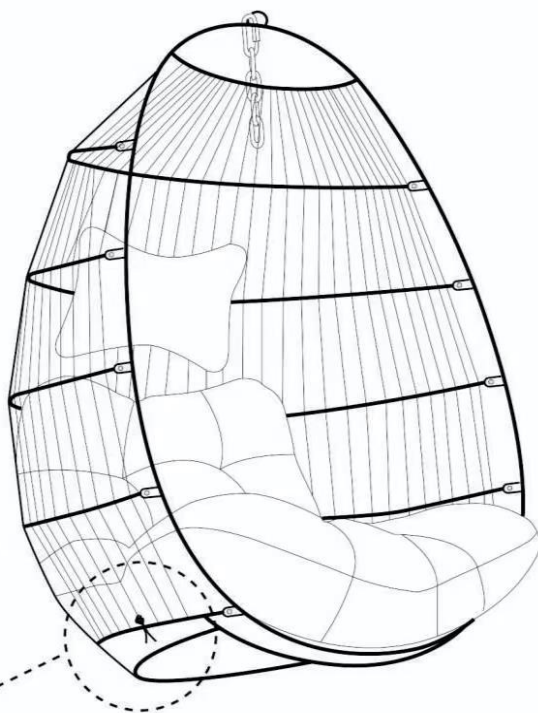

① Use a stud finder to locate secure supports in your home and mark their positions.

② Insert the screw into the wood using a Phillips screwdriver, then install the ceiling hook.

# installation steps-2

Please do not tie them up to the metal frame, tie them up to the ropes instead.
