Placing, Shaping, and Fluffing your new Christmas Tree from Wayfair

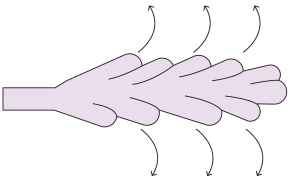

Unfluffed Tree

Step 1

Start by placing the tree base in in the perfect place. Keep in mind the branches will extend beyond the base.

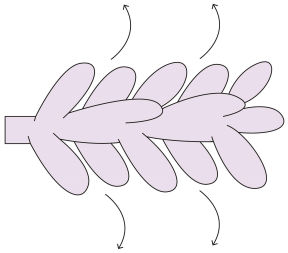

Start at the base of the branch.

Step 2

Once the branches are in place, spread out individual tips starting at the base and working outwards.

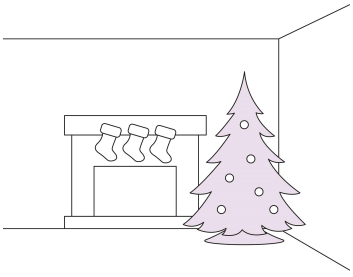

Move to the end of the branch.

Step 3

Work towards the end of each branch, and be sure to extend tips at different angles for a fuller look.

Fluffed Tree

Step 4

Do a spot check for any sparse spots, fluff to fill, and that's it. Step back and enjoy your tree!
