

What Fits in my Spice Rack?

Spice bottles come in various sizes and we've pictured some of the most common ones below. If you have specific custom size bottles that you want to put on the rack, measure the diameter of your bottles to ensure that you order the correct rack for your needs. (See Page 2 for usable depth)

MINI Bottles	Standard Bottles	Large Bottles
Approx. 3/4 oz.	Approx. 2 oz.	Approx. 4 to 8 oz.
		
This circle represents the Actual size of a MINI bottle's diameter: 1.75"	This circle represents the Actual size of a Standard bottle's diameter: 1.75"	This circle represents the Actual size of a Large bottle's diameter: 2"

WG Wood Products' Spice Racks Feature:

- Made in the USA
- Screwed together to last a lifetime
- Hidden mounting holes underneath 2 or more shelves
- 10 different heights, 3 widths, and 4 depths
- Inset back panel so you won't see it from the side view
- Wood or acrylic dowels (depending on model)
- **UNFINISHED SOLID BARE PINE** can be stained or painted as desired
- All racks have 6" high openings between shelves

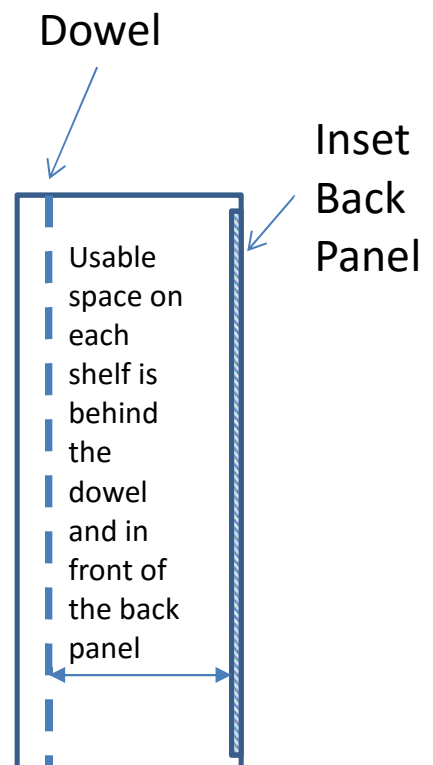

What Fits in my Spice Rack?

7" Width (5.5" wide INSIDE)	11" Width (9.5" wide INSIDE)	14" Width (12.5" wide INSIDE)
3 MINI or Standard bottles per shelf Or 2 Large bottles per shelf	5 MINI or standard bottles per shelf Or 4 Large bottles per shelf	7 MINI or standard bottles per shelf Or 6 Large bottles per shelf
		

Overall Depth vs. Usable Depth

Depths available are 2.5", 3.5", 5.5" and 7.25" deep. (These are OVERALL depths). See below for INTERIOR, usable depth). Usable depth is the amount of space behind the dowel (between the dowel and the inset back panel). It's the actual space you'll have to put spice bottles.

- 2.5" deep racks will handle even the larger 2" spice bottles because you'll have 2" of usable depth inside.
- 3.5" deep racks will handle the larger spice bottles as you'll have 3" of useable depth inside.
- 5.5" deep racks will handle even large canned goods such as pie fillings because you'll have 5" of usable depth inside.
- 7.25" deep racks will handle even most large coffee cans because you'll have 6.75" of usable depth inside.

Mounting on a Hollow Core Door?

If you are purchasing a rack that is 48" or taller AND it is 5.5" deep or 7.25" deep, we DO NOT recommend mounting that rack on a hollow core door because racks this large get VERY heavy even without anything on them! And with so much height or depth on these racks, they can really hold a lot of weight and it may separate your door. We recommend you mount these larger racks directly on drywall instead. They do NOT need to be screwed into studs, however.

Yes, you can even mount your rack on a hollow core door using a special installation kit. You can request this free kit directly from our customer service any time at 913-829-6000.
