STEP 2

Use your own normal driver or electric driver

Find the parts and screws corresponding to the serial number, assemble them by aligning the holes according to the illustration, please tighten the screws.

(2)

3

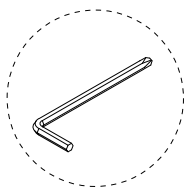

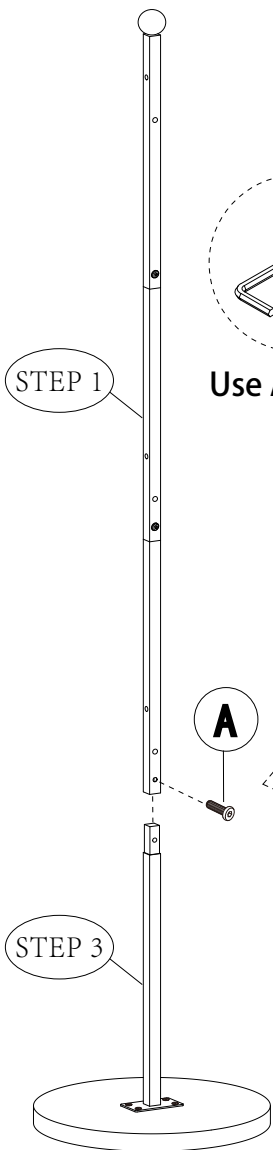

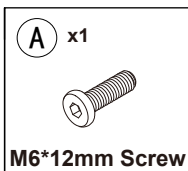

STEP 2

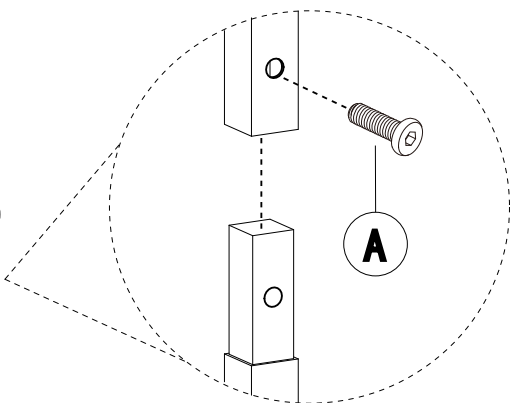

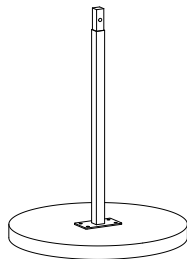

Use Allen Key

Find the parts and screws corresponding to the serial number, assemble them by aligning the holes according to the illustration, please tighten the screws.

STEP 4

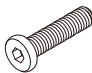

Use Allen Key

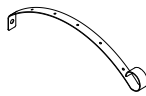

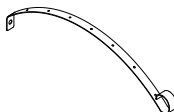

Find the parts and screws corresponding to the serial number, assemble them by aligning the holes according to the illustration, please tighten the screws.

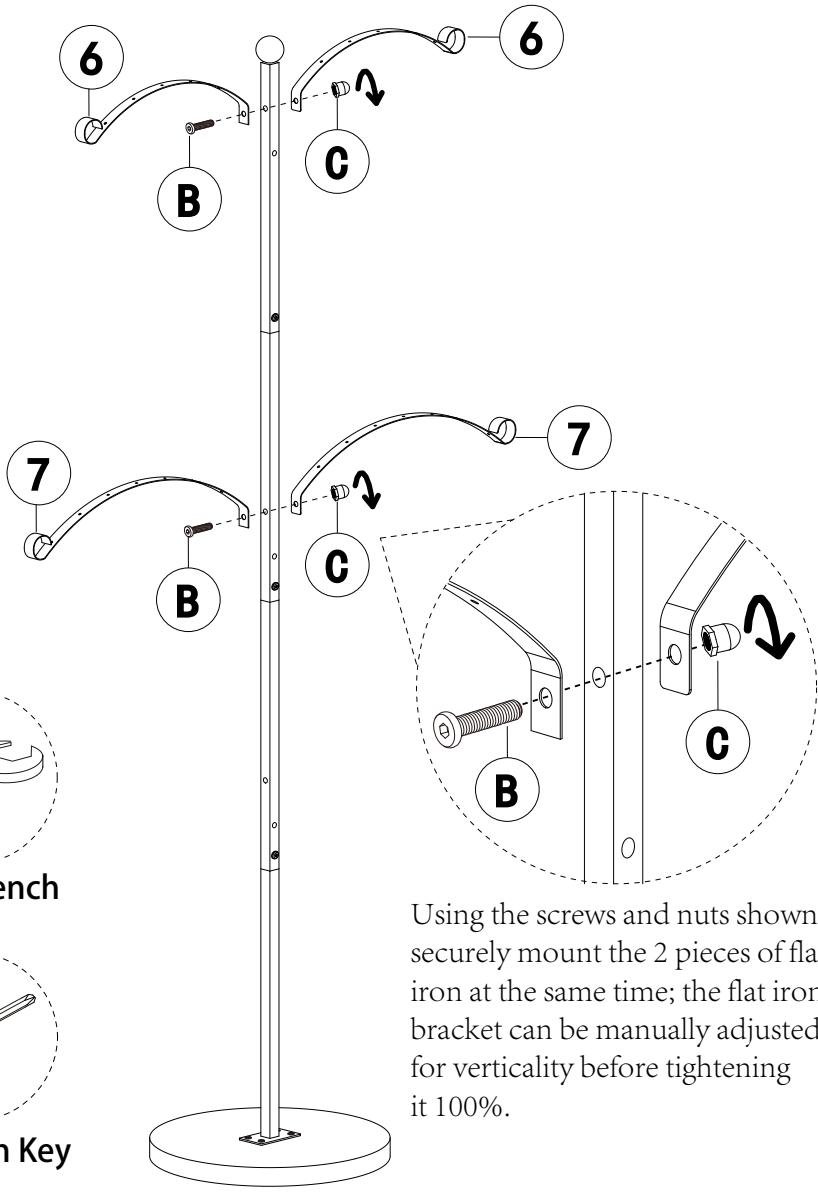

STEP 5

B x2

M6*25mm Screw

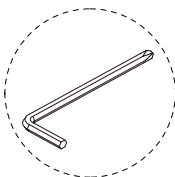

C x2

Nuts

Small flat iron **6** x2

Large flat iron **7** x2

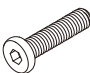

Use Wrench

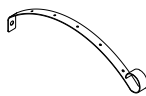

Use Allen Key

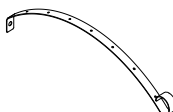

Using the screws and nuts shown, securely mount the 2 pieces of flat iron at the same time; the flat iron bracket can be manually adjusted for verticality before tightening it 100%.

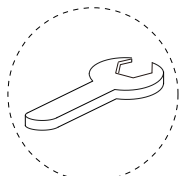

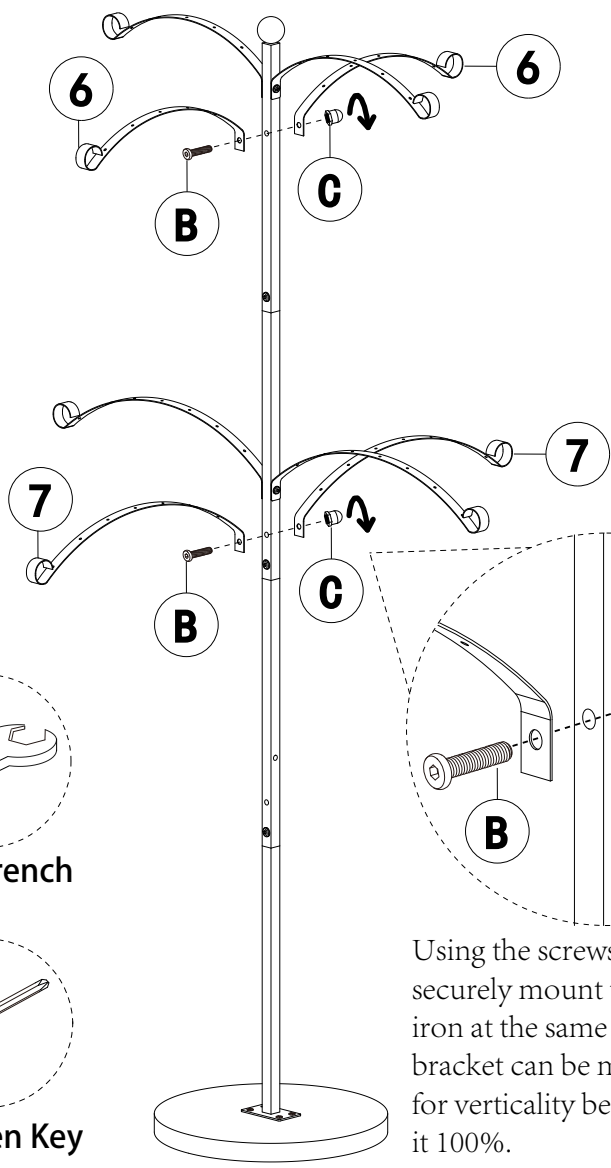

STEP 6

B x2

M6*25mm Screw

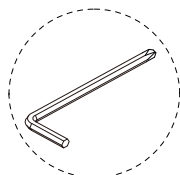

C x2

Nuts

Small flat iron **6** x2

Large flat iron **7** x2

Use Wrench

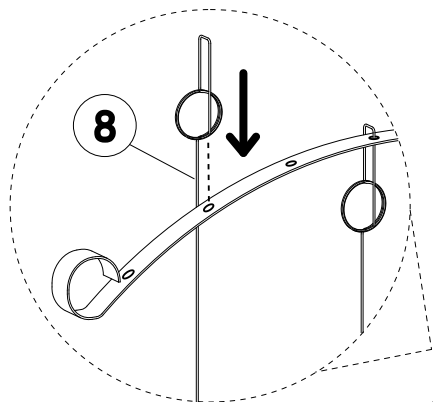

Use Allen Key

Using the screws and nuts shown, securely mount the 2 pieces of flat iron at the same time; the flat iron bracket can be manually adjusted for verticality before tightening it 100%.

STEP 7

Photo clips ⑧ x30

Use the photo clips to hold the photos you want to display, and then hang them in any holes of the flat iron bracket.

You can hang as many photo holders as you need. If the clips are slightly distorted, they can be adjusted manually.
