ASSEMBLY INSTRUCTIONS

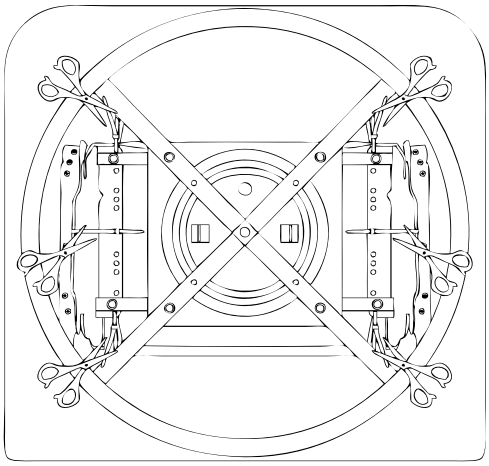

ASSEMBLY INSTRUCTIONS

1. Confirm receipt of the complete product package and check that the outer package is undamaged.
2. Open the outer package of the product and remove the inner package.
3. Take out Item A and Item B from the carton and confirm that both items are undamaged.

4.Take out Item B separately and turn it on its side. Use scissors to cut off the 6 cable ties on the functional frame carefully, taking care to avoid injury. Note: The cable ties may break due to jostling and compression during transportation, but they are only used for fixing during transportation and do not affect the main structure or normal use of the functional frame.

5.Lay the processed Item B flat again. Insert the latch on Item A into the buckle on Item B smoothly, then press gently until the buckle is securely fastened. Ensure there is no looseness in the connection between the two items, and the assembly is completed.
