

How to Install

1.Flatten the wall that needto be installed with a level of other tools.

2.Measure the wall so that the wall panel can fit.

3.Cut the 3D wall panel to the size you want with a handsaw or other tools.

4.Use nail-free glue or screws or nail gun to stick the 3D wall panel to the wall.(screws are recommended for wooden walls and nail-free glue for cement walls.

5.If you have any other question about the installation.Please check our link and we have video tutorial.
