

Features - ECH2001150

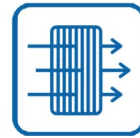

Intelligent Sensor

You can set 40% - 60% comfortable humidity range by yourself. It is equipped with a high-precision temperature sensor, which can accurately monitor environmental humidity and display it on the screen.

Large Capacity

Holds an impressive 5L of water allows for more than many hours of continuous use in 210 ml/hr. It can reduce the trouble of adding water, and you don't have to worry about the discomfort caused by drying when you sleep.

Clean Air

The smart humidifier with the inlet filter ensures your room is humidified with air free from dust and hair. It also prevent the pipe from becoming moldy.

Quiet

Ultrasonic humidifier with weaken water flow technology and dustproof sponge lowers the noise level to 38dB for quiet humidification without disturbing your study, working. And all night mist makes you have a pleasant and quiet sleeping.

Top Fill Design

Top-fill design making refills and cleaning easier than ever. It provides a 360° rotating nozzle to ensure even moisture distribution throughout the home.
