**CAPRESSO H2O PLUS WATER KETTLE SELECTED
BEST TEA ACCESSORIES PRODUCT BY BestoftheBestllc.com**

CLOSTER, NJ — BestoftheBestllc.com, a consumer product review website, has honored the Capresso H2O Plus Water Kettle with a 2010 Best Product Award in the Best Tea Accessories Product category for “taking tea pots and hot pots to a whole new level.” The website’s testers appreciate that the kettle is efficient and effective, quiet and quick to boil.

The energy-efficient Capresso H2O Plus Water Kettle has a concealed heating element under a stainless steel dome on the base of the kettle, which boils water faster and uses less energy than a stovetop kettle.

Easy to operate, the H2O Plus Water Kettle comes with a simple on/off switch and a blue indicator light to show when the kettle is on. Indicator lines from 16 to 48 ounces and two to six cups on the glass kettle make it easy to fill the right amount.

Once the water is boiling, the cordless kettle can be easily lifted from the 360-degree power base. The oversized curved safety handle ensures maximum comfort and safety when pouring.
