

8270PL-07-US

- 1: Take the lamp body out of the packaging, adjust the direction of the lamp head, with three parts extended horizontally and the other three facing downwards.
- 2: Manually unscrew the metal piece at the bottom of the lamp base, and the lamp cover will automatically come down, revealing the interior part of the lamp base.
- 3: Pull the wire from the bottom of the lamp holder tube into the interior of the lamp base, then close the lamp base cover and tighten the metal piece. Insert the top end of the lamp holder into the metal piece, and take out the "L"-shaped wrench from the parts package to securely fasten the lamp holder tube.
- 4: Lock the eight longest iron wires onto the lamp post in sequence.
- 5: Lock the four shortest iron wires in sequence onto the circular pieces beneath the lamp post.
- 6: Insert the middle pipe into the single-ended connector at the top of the lamp socket.
- 7: Use the chain to connect and install the lamp body and the ceiling plate together.
- 8: Tighten the wiring end cover in the correct manner.
- 9: Tighten and fix the installation plate onto the junction box, and then secure the screws on both sides of the ceiling.
- 10: Install the light bulb.
- 11: The hanging method for glass:
 - 1: Hang the ones with the white interior on the first and third layers.
 - 2: Hang the ones with emerald green glass on the second and fourth floors.
- 12: Plug in the power supply and the light will turn on.
