Mattress Assembly

- Place mattress on a flat surface, preferably on the floor. Carefully cut away plastic wrap with scissors.
- Keep packaging away from children. Dispose of all plastic immediately to avoid hazards such as suffocation.
- Your mattress has been in a compressed state and will return to its original shape within approximately 48 hours, sometimes longer in colder climates.
- Do not force decompression of the mattress. Allow it to expand naturally.
- Yellowing of the memory foam may occur over time. This will in no way affect the quality or performance of the product.

Care Instructions

- Products containing memory foam cannot be washed in a washing machine or placed in a dryer.
