Changing the Length of the Wire:

Simply take a screwdriver and locate the screw hole where the wire hangs on the bottom of the canopy.

Twist the screw and gently pull the wire to adjust the wire to desired length you would like your pendant to hang. The wire can adjust both up and down.

Do not utilize a drill in order to loosen the screw, screwdrivers are best in order to not strip the screw in the canopy and risk it getting stuck. Carefully pull on the wire to adjust, do not yank or tug.
