RECIRCULATION CARBON FILTER INSTALLATION INSTRUCTIONS

Installation Accessories

Recirculation Carbon Filters

WARNING:

Turn off power at service panel and lock out panel before installing this kit. Installation must comply with all local codes. Wear gloves to protect from sharp edges.

To install the carbon filters,
do the following:

1. Remove the metal filters from the bottom of the range hood, in order to access the blower motor.
2. Place the carbon filters on top of the blower grilles.
3. Insert the pins from the blower grilles into the charcoal filters and rotate the filters clockwise.
