

How to install the Pet stroller

1 Install the front wheels

Pinch the black plastic part (as illustrated) of a front wheel with the thumb and index finger, press it together with a front leg and then release. Pull the front wheels after installation to check that both are securely in place.

2 Install the rear wheels

Hold a rear leg by the silver beads and push the leg into a rear wheel. The wheel is connected once a "click" has been heard. Make sure the foot brakes are facing outward.

3 Fold the stroller

Simultaneously pull both lock handles upward until disengaged, and then apply pressure to fold the stroller downward.
