UNIT STORAGE LOCKER-6 – INSTALLATION & USER GUIDE

UNIT STORAGE LOCKER EXPLODED VIEW

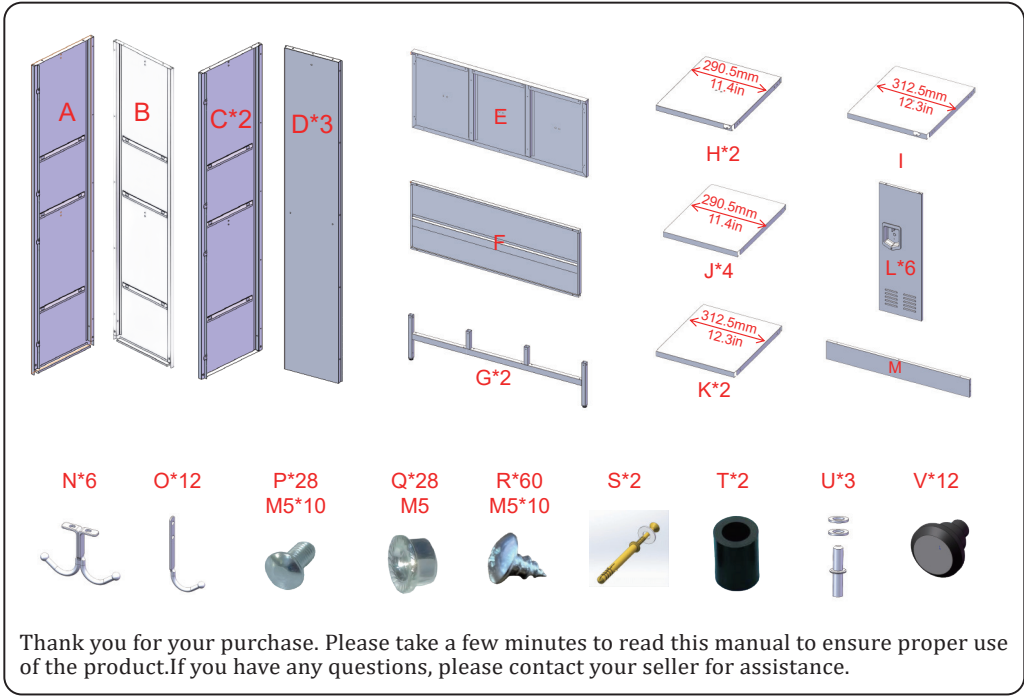

IMPORTANT NOTES

- Inspect all parts to ensure no damage has occurred.
- Refer to the diagrams to identify all components and hardware.
- If any parts are missing or damaged, please contact us for assistance.

ANTI-TIP SAFETY WARNING

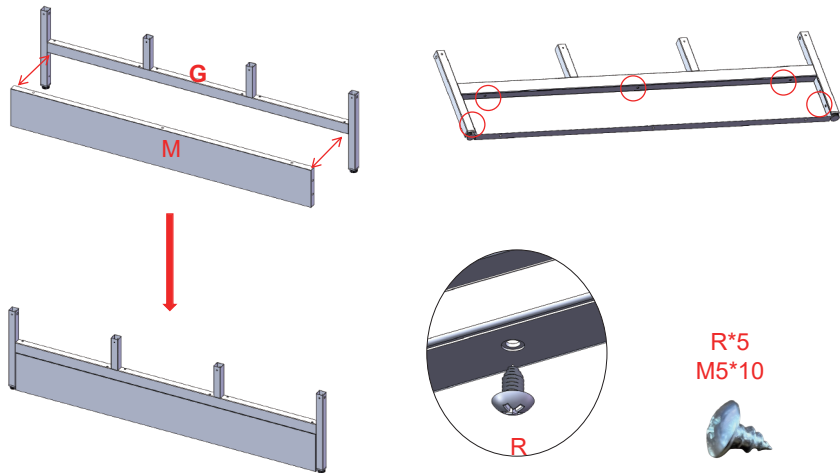

- Use caution during assembly to prevent the locker from tipping over and causing injury.
- After assembly, securely anchor the locker to a wall or floor to prevent tipping, which may result in serious injury or death.

UNIT STORAGE LOCKER – COMPONENTS OVERVIEW

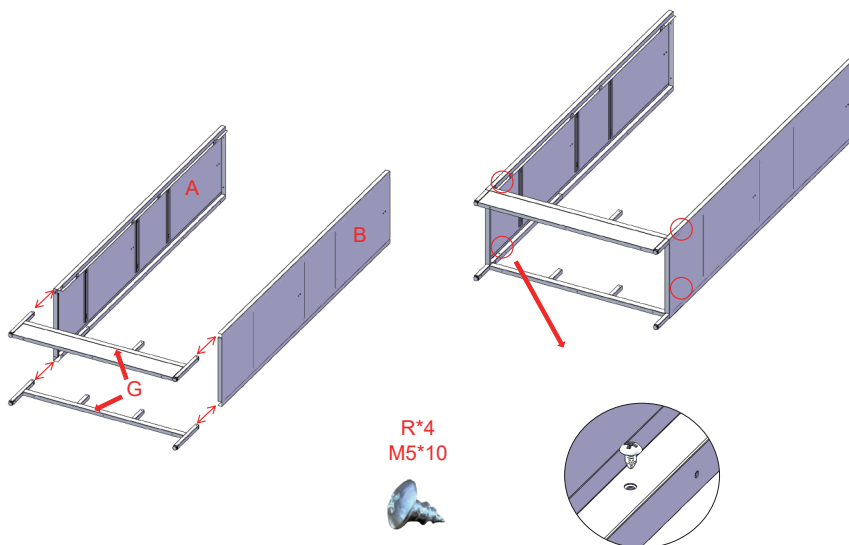

STEP 1

Install part M if needed. Attach it to part G and secure with 5 screws (R, M5×10).

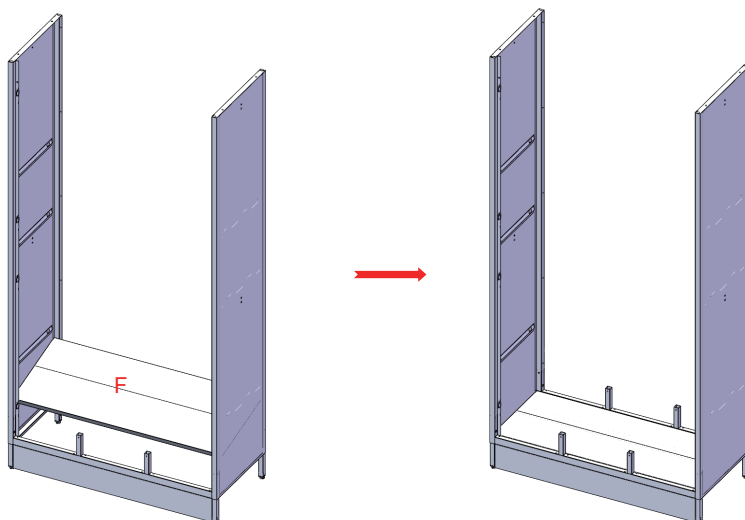

■ STEP 2

Insert part G into the slots of side panels A and B. Secure with 4 screws (R).

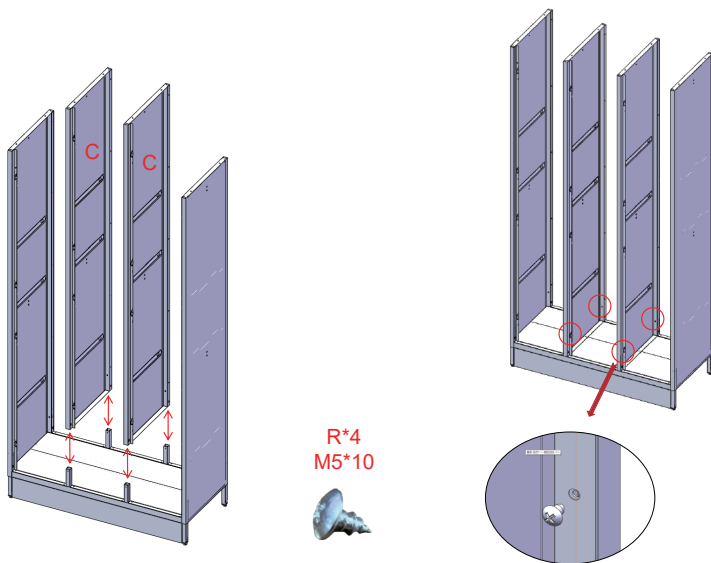

■ STEP 3

Flip the assembled frame over.
Place the bottom panel F into the locker as shown.

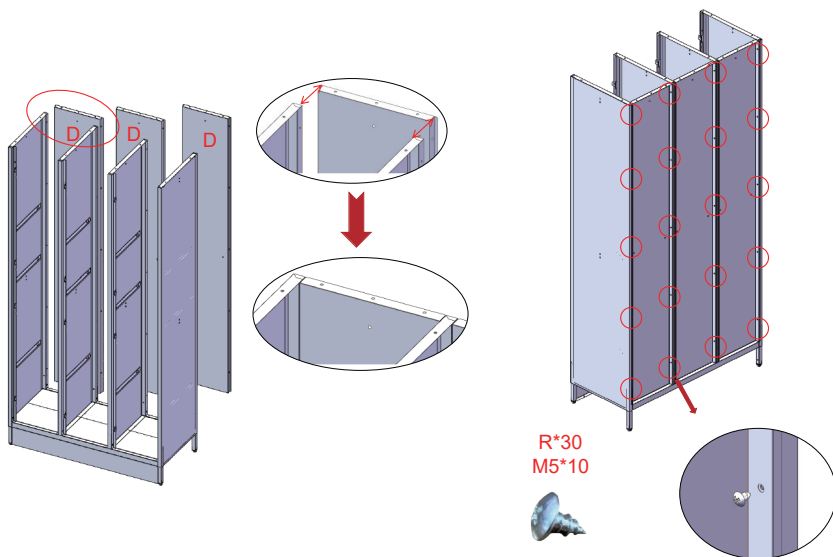

■ STEP 4

Install part C into the frame (same method as Step 2).
Ensure the smooth side faces left.
Secure internally with 4 screws (R).

■ STEP 5

Install back panels D from the rear of the locker.
Ensure the smooth side faces forward.
Secure with 30 screws (R).

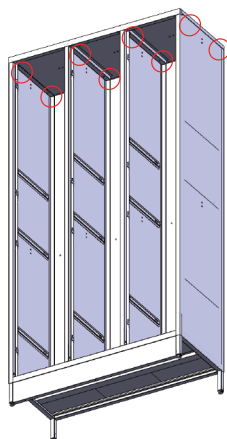

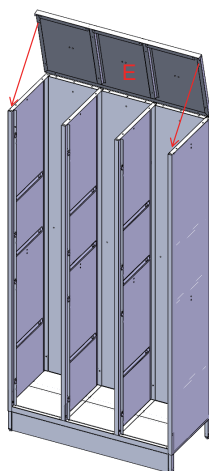

STEP 6

Place the top panel E onto the locker.

Insert the side panels into the grooves of the top panel.

Secure internally with 8 screws (R).

R*8
M5*10

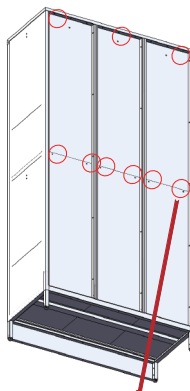

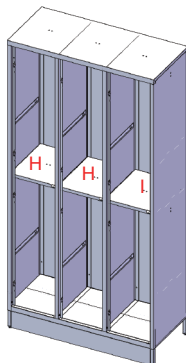

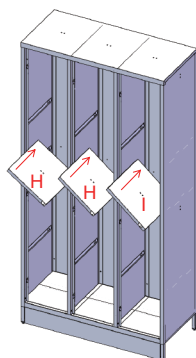

STEP 7

Install parts H and I

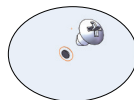

Insert their edges into the side panel slots.

Secure from the rear with 6 screws (R).

Tighten 3 additional screws at the top to secure panel E.

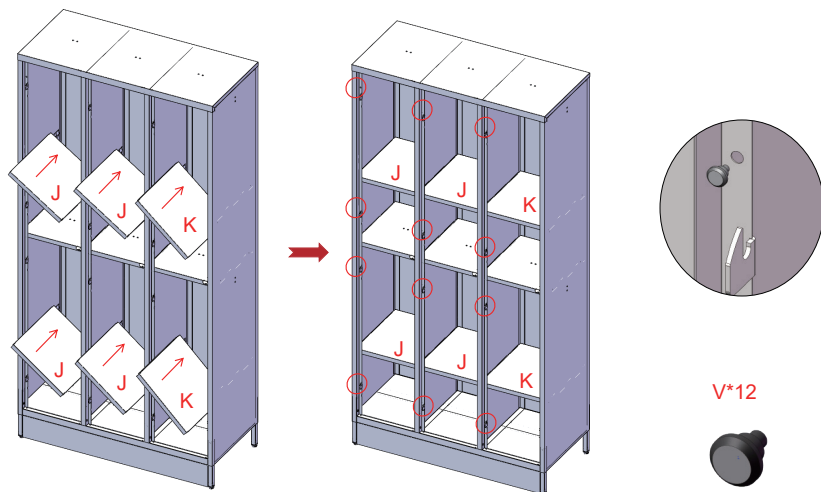

R*9
M5*10

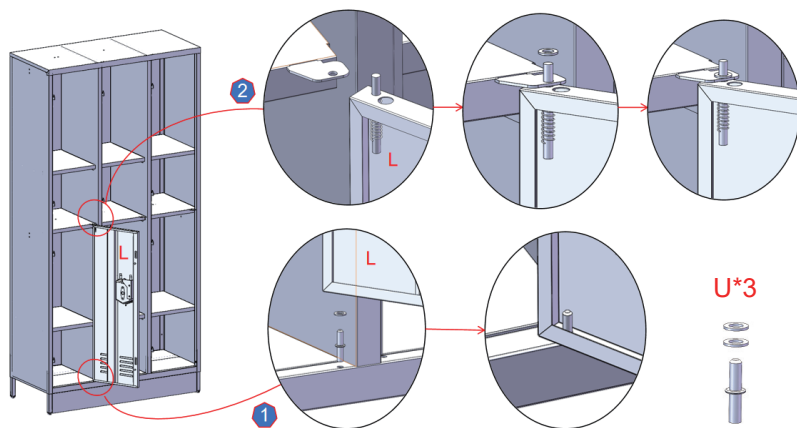

STEP 8

Install 4 panels J and 2 panels K using the same method as Step 7.
Attach rubber pads (V) to the side panels.

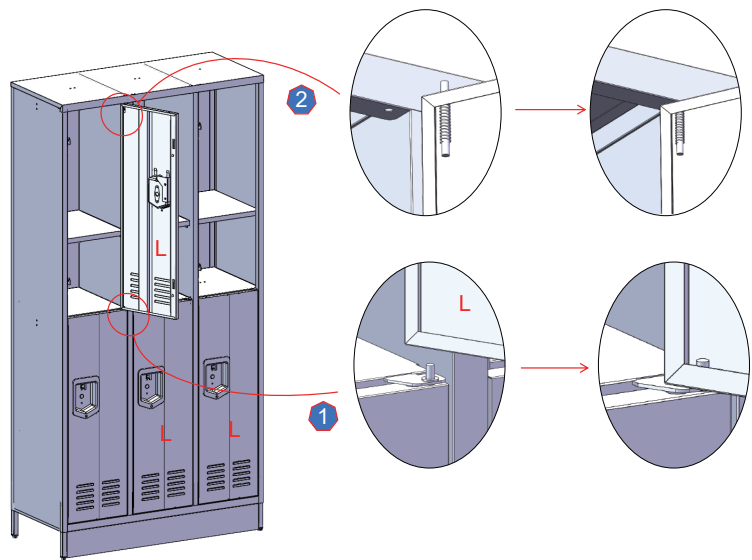

STEP 9

Install door pins U first.
Press the spring pin at the top of the door.
Install the bottom of the door first, then the top.
Note: Adjust spacers as needed to ensure proper door alignment.

STEP 10

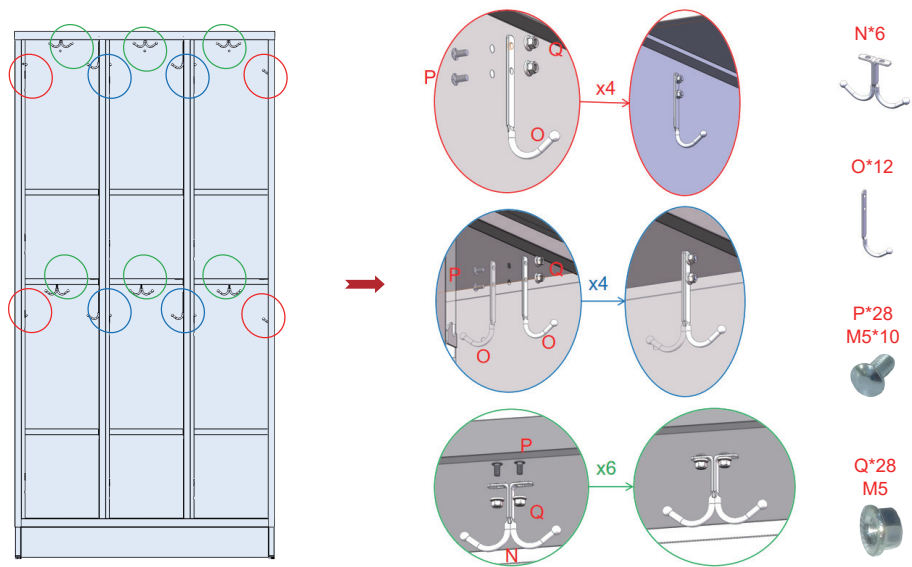

Repeat Step 9 to install the remaining 3 doors (L).

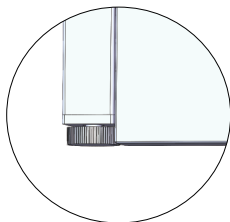

STEP 11

Hook Installation

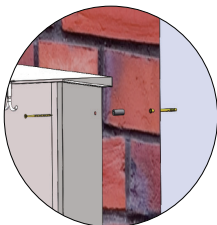

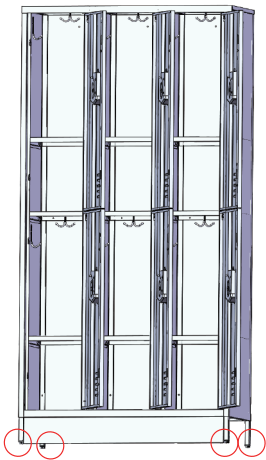

Use screws P and nuts Q to install hooks (O and N).

FINAL INSTALLATION & ADJUSTMENT

If the floor is uneven, adjust the leveling feet on part G to stabilize the unit. This ensures smooth door operation.

Use screws S and washers T to anchor the locker to the wall.
