

Installation Instructions

Installation shall be performed by **qualified electricians** only to avoid electric shock hazards. Please note the following:

- ① Read the manual carefully before installation and keep it properly for future reference after use.
- ② Ensure the lamp is installed securely and stably.
- ③ Wear gloves when installing or repairing the lamp.
- ④ All electrical connections must comply with the electrical safety regulations of the local area. Installation and maintenance must be conducted by professional personnel.
- ⑤ Do not install the lamp on lime-covered or damp ceilings.
- ⑥ Special note: Do not use the product in humid environments.
- ⑦ Strictly follow the specifications and types indicated on the product label when replacing the light source; otherwise, product damage or safety accidents may occur.
