

E26 Max60W Not included

# White Pendant Light Instruction

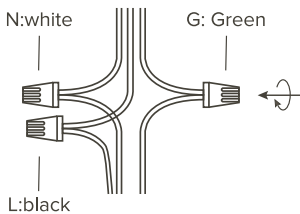

## Step 0: Turn off power

- Shut off the circuit breaker and verify power is off with a non-contact tester.

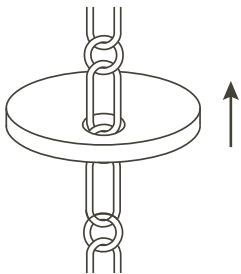

## Step 1: Mount to the ceiling box

- Set the hanging height (add/remove chain links). Feed the fixture and ground wires through the chain and canopy. Secure the mounting plate to a 4" UL-listed junction box with the two 8-32 screws.

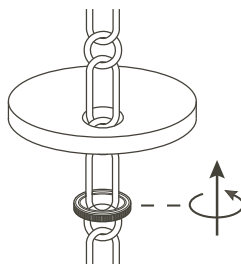

## Step 2: Make electrical connections

- Connect black to black (hot), white to white (neutral), and bare/green to bare or green (ground). Cap with UL-listed connectors, tug-test, and tuck the splices into the box.

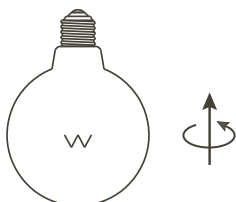

## Step 3: Raise the canopy

- Slide the canopy up to cover the ceiling box; keep wires untwisted and the canopy level.

## Step 4: Tighten the lock ring

- Thread the lock ring/collar against the canopy until snug. Ensure the fixture is secure and centered.

## Step 5: Install the bulb

- Install an E26 bulb, max 60W (or LED equivalent). Restore power and test.
