ARCHITECTURAL ICON

Iconic. Unmistakable. Elemental. The arch is an engineering marvel of stability and strength, with an aesthetic rooted in elegance and simplicity. The Arca Collection pays homage to this form. The Collection is inspired by the innovative aqueducts of classical Rome, which channeled fresh water to cities across the empire. Arca captures the beauty of the arch in line and curve. The spout follows a clean, rounded geometry, while nuanced, two-step details on the handles and base create a solid foundation. The Arca Collection embodies symmetry that is effortless, exquisite, and always relevant.
