ASSEMBLY INSTRUCTION FOR Hall Tree

This computer desk has two different installation methods, please choose one of the installation methods and install it according to its unique assembly method.

Installation method I: Please refer to Step 8~Step 18

Installation method II: please refer to Step 19~Step 29

ASSEMBLY INSTRUCTION FOR Hall Tree

Make sure to use the correct screws to avoid damaging components

✗

Wrong size screw can split the board

✓

Correct screw size is correct

ASSEMBLY INSTRUCTION FOR Hall Tree

Matters needing attention

- (1) When installing the screws in the installation step, the screws do not need to be tightened.
After this installation step is confirmed and the holes are aligned, then tighten all the screws.
- (2) If the screws are tightened during the installation process, it will cause problems such as misalignment of the screw holes and misalignment of the board in subsequent installations.

example

Note that if you find that there are no plastic granules on the wooden block, the table cannot be assembled, please don't worry, please use the spare plastic granules in the screw bag

Note, please use a tool to carefully align the plastic pellets with the holes and then knock them down

STEP16

The light strip can be pasted to the desired position according to your own needs

Carefully remove the plastic film behind the light strip. The light belt is aligned with the square hole and carefully passes through the square hole.

Installing the K accessory can better prevent the 24 # light strip from falling off. but the installation of the K accessory is a bit difficult and requires you to firmly lock the K screw. You can choose not to install the K accessory, which will not affect use!
