Assembling

- The vehicle should be assembled by adult before use.It will take 30minutes to complete.
- The small parts might cause choke,please keep away from the children.
- Please check the number of the parts before assembling,and keep the packaging bags away from the children in in case of choke.

Installation Order Diagram

1.Installation of pedals and mudguards

1.Fix the front and rear mudguards with M4*12mm flat head screws (8pcs) according to (1,2,3,4) numbers corresponding to the body numbers.
2.Snap the left and right pedals (L and R correspond to the body) into the body slots and secure them with M4*12 flat head screws (6pcs).

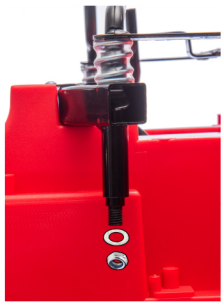

2.Installation of front wheel

1.Rotate the steering shaft to face upwards.

2.Remove the nuts(2pcs) and washers(2pcs) from the front axle shock absorber and set aside, adjust the direction of the steering rod to fit the front axle into the steering rod, and finally fix it with the washers(2pcs) and nuts(2pcs).Tighten the nut with wrench tool.

3.Fix the drive connector on the wheel with M4*12 round head screws(3pcs).

4.Remove the nuts (2pcs)on both sides of the front axle and spare them, put the front drive motors on both sides of the front axle (L and R correspond to the body), and connect the motor wires with the connecting wires under the car.

5.Put the wheel on the front axle, install the washer and fix it with a nut.Tighten the nut with wrench tool.Finally press on the wheel cover.

6.Same installation on both sides.

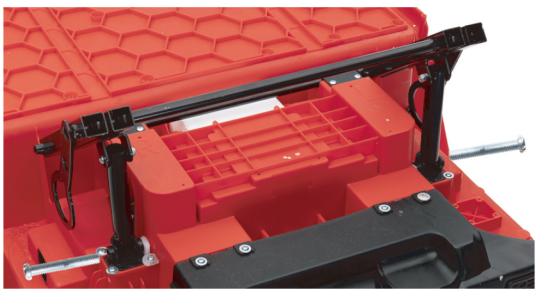

3. Install the rear wheels

1.Remove the screw(2pcs) from the rear wheel shock member of the body for spare,place the rear frame support tube into the shock member slot and finally secure it with the screws (2pcs).

2.Remove the nuts (2pcs) on both sides of the rear axle and spare them,thread the rear axle through the frame.

3.Fix the drive connector on the wheel with M4*12 round head screws(3pcs).

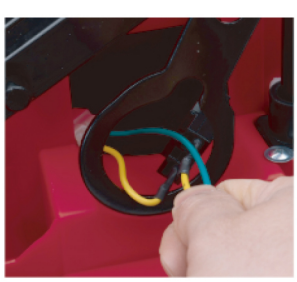

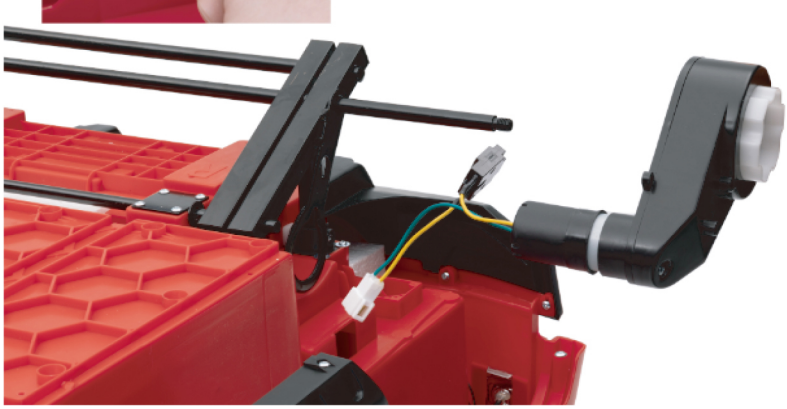

4.Put the rear drive motors on both sides of the rear axle (L and R correspond to the body).

5.Put the wheel on the rear axle, install the washer and fix it with a nut.Same installation on both sides.Tighten the nut with two wrench tools.Finally press on the wheel cover.

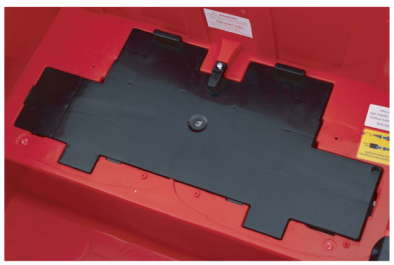

4.Connect the motor wiring and power cord

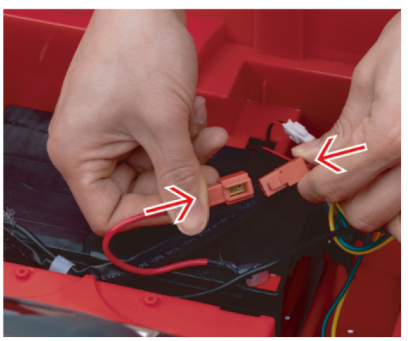

1.Remove the screws on the seat cover and remove the cover.

2.Plug the connectors of the left and right drive motors into the designated terminals on the circuitboard. Insert the connector from the battery into the designated terminal on the circuit board.Finallyput on the cover and fix it with screws.

NOTE: Make sure the connector is oriented correctly to fit into the terminal.

5. Install the seat

1.Snap the two seat rear side snap hooks into the body slots and secure with M4*12 flat head screws(4pcs).

6. Install the steering wheel

1.Match the steering wheel connecting wires to the body connecting wires, then snap the steering wheel into place to secure it.

7. Install the windshield and rearview mirror

1.Align the windshield and rearview mirror for insertion

8. Installation of rear and side tail frame

1.Snap the left and right side tail frame into the body (with the rear tail frame attachment ports facing backwards), remove the screws and nuts(2pcs) from the side tail frame, insert the rear tail frame into the side tail frame, and secure them with the screws and nuts(2pcs).

9 .Install front bumper trim and shovel

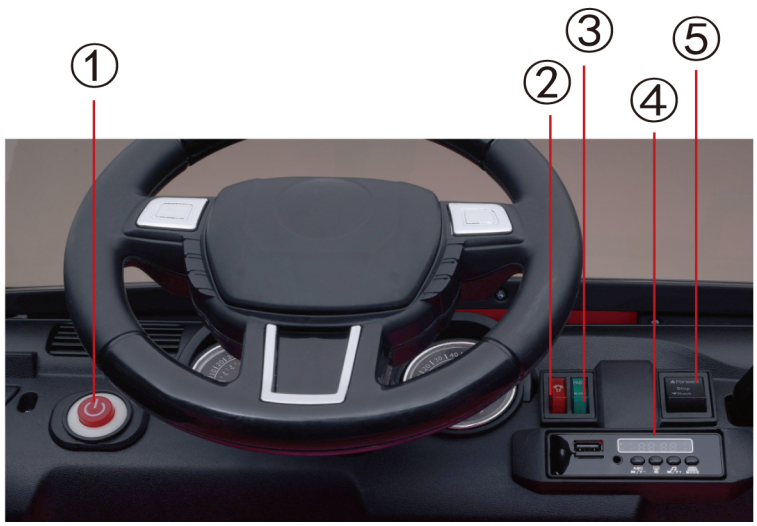

1.Insert the front bumper trim into the front bumper.

2.Insert the shovel to the rear of the car.
