IMPORTANT SAFETY INSTRUCTIONS

READ ALL INSTRUCTIONS BEFORE SETTING UP THE UMBRELLA

Do not use around children under the age of 5.

Keep away from fire sources including candles, fire pits, grills and any product with an open or closed flame or heat source.

Do not leave the umbrella open in heavy winds or while not in use

Check the umbrella for stability after set up

Check before each and every use to ensure all parts and materials are in good condition

If the tilt button comes out or the tilt function stops working take down the umbrella and contact us for a replacement.

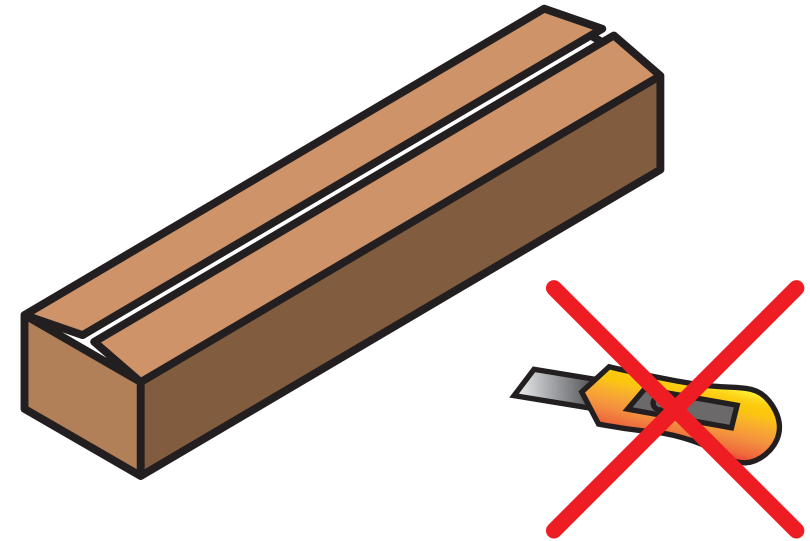

Use caution when operating the tilt button so as not to pinch fingers.

If the umbrella should break in any way, do not attempt to repair. Contact us immediately for a replacement.

UNPACKING THE CARTON AND INITIAL SETUP

- If you purchased an LED umbrella, the solar panel is enclosed in a Styrofoam box inside the carton. Do not dispose of the carton until checking for the panel.
- Do not use a sharp instrument to cut the carton open as you risk damaging the solar panel and/or canopy fabric.
- Ensure all parts are included in the carton.
- When setting up the umbrella after storing for the season or for the first time, allow to stand for 24 hours to make sure all parts are functioning correctly and the umbrella is stable.

PRODUCT CARE

Umbrella Fabric

- If the umbrella becomes wet, make sure to leave it open to dry completely before closing.
- Spot clean fabric with mild soap and warm water using a sponge or soft bristled brush. Rinse completely and allow to air dry.
- An umbrella cover should be used whenever the umbrella is not in use to prevent sun damage.

Metal Finish

- If the umbrella is in a salt air environment or indoor pool area, the finish may be compromised by the accumulation of salt and chlorides. Regularly clean the finished areas with a mild soap and warm water using a soft bristled brush.

Wood Finish

- Scratches are likely to occur on the wooden pole after consistent use. Touch up these areas with a matching wood stain then cover with marine varnish.

Storage

- Make sure the umbrella is completely dry before storing for the season.
- Fold the top neatly to avoid wrinkling and ideally use an umbrella cover.
- Lay flat on a hard surface in a cool, dry location.
- To keep the umbrella operating smoothly, we recommend occasional treatment of moving parts with a silicon lubricant spray.

AVOID GETTING THE SPRAY ON FABRIC OR FINISH.

ASSEMBLING THE UMBRELLA

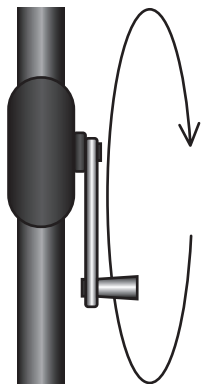

- Lay all parts out.

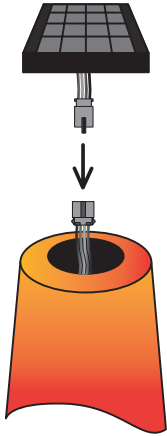

- Insert the top pole with the attached canopy into the bottom pole until the spring loaded button clicks into place.

- To open, turn the handle clockwise
- To close, turn the handle counter clockwise.
Do not overwind the handle as this could damage the umbrella
- To close completely, the umbrella must be in the vertical position and not tilting.

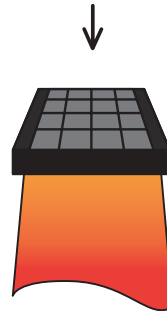

INSTALLING THE LED PANEL

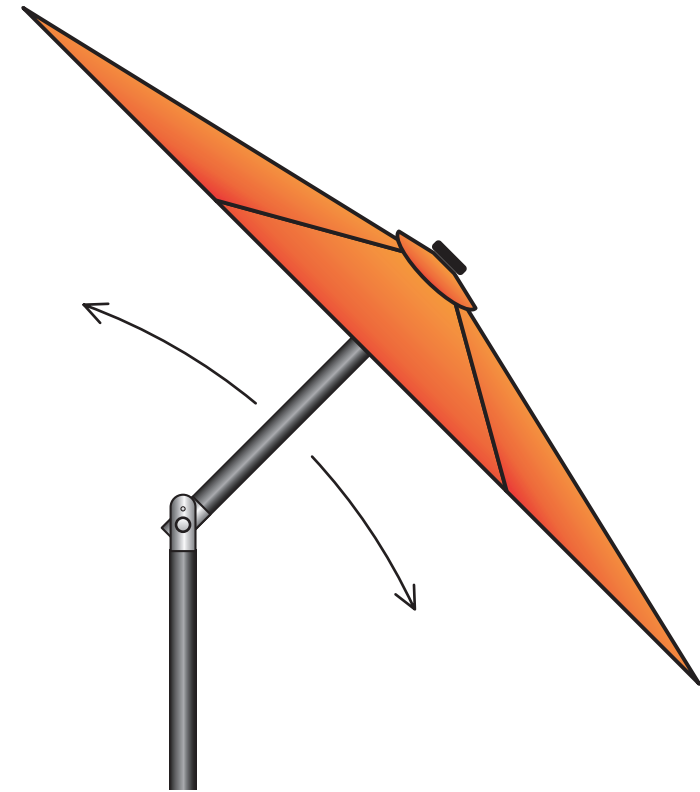

- After you remove your solar panel from its foam packaging it's time to attach to the Umbrella.
- On the top of the LED Umbrella there is a cable inside that mirrors the plug on the solar panel cable. Attach these cables together.

- Now that the cables are attached push the solar panel into the circular hole and twist until it locks into place as shown.

- Now that your solar panel is fully attached, ensure that the ON/OFF switch on the umbrella pole is in the OFF position. Allow the solar panel to charge in direct sunlight for 24-48 hours

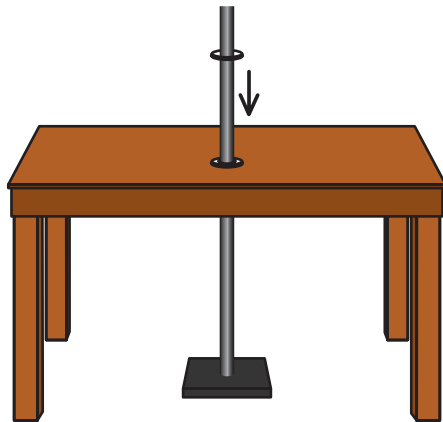

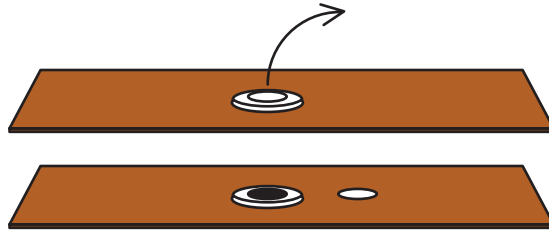

ADJUSTING THE TILT

- Press down on the spring lock button and with the other hand, gently tilt the umbrella to the desired position.
- Make sure when using the tilt function, that the tilt button is securely clicked into place.
- We do not recommend sitting directly beneath the tilted side of the umbrella when in use.

INSTALLING THE CLEAR PLASTIC RING

- Pop the center of the plastic out

- Put the outer plastic ring around the umbrella pole. When putting the umbrella into your table ensure the ring is above the table
- Once the umbrella is securely in place, push the ring down until it fits in the space between the opening of the table and the umbrella.

WARRANTY

Our **1 year** product warranty covers all parts or full replacement if damaged.
