

1

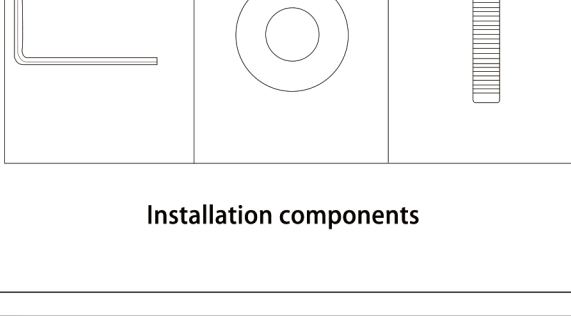

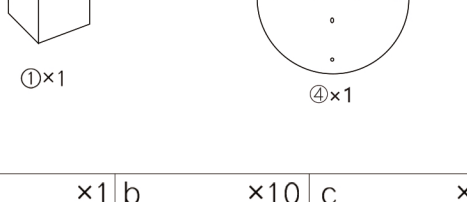

Upon receiving, please first inspect all packages. There are three packages in total, which include the tabletop, base, and connecting plate.

2

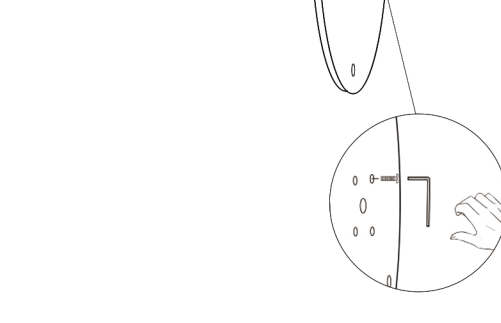

After verifying the number of packages and ensuring the product packaging is undamaged, you may proceed to open the packages. Cut off the PP belt with scissors and open the packaging box directly. Please check the sample picture.

3

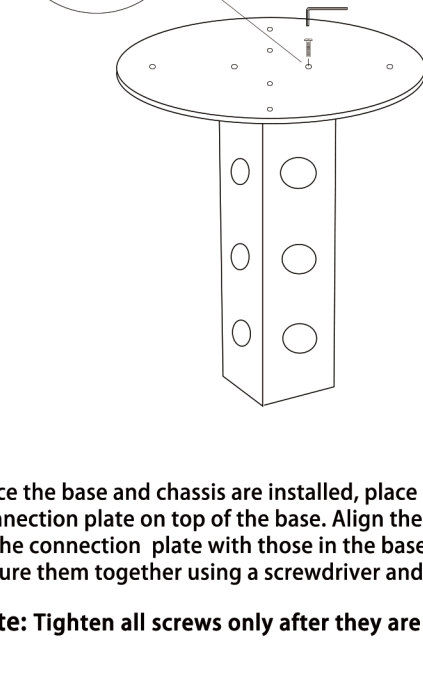

Installation components

4

Install the base and chassis first. Place the base on the ground, align the holes for connection, and secure with screws using a screwdriver.

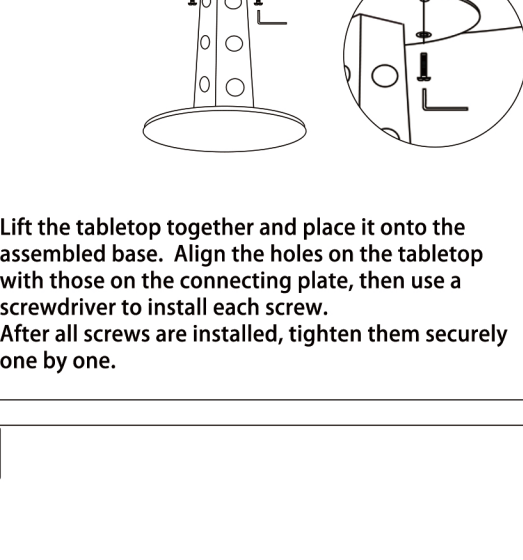

5

Once the base and chassis are installed, place the connection plate on top of the base. Align the holes in the connection plate with those in the base, and secure them together using a screwdriver and screws.

Note: Tighten all screws only after they are installed.

6

Lift the tabletop together and place it onto the assembled base. Align the holes on the tabletop with those on the connecting plate, then use a screwdriver to install each screw. After all screws are installed, tighten them securely one by one.
