Step 41

F  x1

User's Guide

Thank you for purchasing this product. To use this product, please plug it into a 12V Dc power supply. Ensure the product is functioning normally after it is connected to power.

introduction

This box is an intelligent controller with two touch buttons. It can turn the light ON/OFF, change light colors, and adjust the light's luminance.

Product Show

ATTENTION PLEASE

1. If there is no touch response suddenly. Re-plug the power to reset the touch static electricity.
2. If bubbles appear on the panel, the protective film. remove

Operation

This touch button is used to turn on/off, change colors, and adjust brightness

- A. Short touch -> lighting on -> short touch -> change light color -> short touch -> change light color -> short touch -> change light color -> short touch -> lighting off.
- B. Long touch -> adjust the luminance

Touch Button Functionality

- A.Short Touch: This activates the induction function. The light will automatically turn on when a person is within 1 meter of the controller. The light will automatically turn off after 30 seconds when the person moves away from the controller.
- B. Long Touch: This deactivates the induction function.
- C. Note: When you touch the light button to change the light modes, the induction function will be automatically turned off. It is recommended to activate the induction function only after selecting your desired light color and adjusting the brightness.
