

Installation steps:

1. Connect the wires from the fixture to the wires in the junction box using wire nuts. Ensure the correct connection of the positive and negative wires.
2. Drill three small holes in the ceiling, aligning them with the empty spaces above the lamp housing. Insert rubber plugs into the holes. Secure the lamp body to the ceiling using the screws from the accessory kit.
- 3-4. Gently bend the acrylic and position it in place.

Note: Please use this product accordingly to its intended purpose, do not retrofit or remodeling the product. The warranty does not cover if the failure is caused by the third party product, or natural disasters.
