

RUG CARE INSTRUCTIONS

Harsh chemicals may damage or fade the rug

Use rug protectors under heavy furniture

Rug may be brushed when wet for further cleaning if necessary

Blot spills immediately with a white cloth.

Rug may be rinsed with an outdoor hose and mild soap

Do not leave in standing water for extended periods of time in order to avoid mold/mildew growth

Turn rug around occasionally to equalize wear

For hard to remove stains, professional rug cleaning is recommended

Allow for rug to dry completely before use after exposure to excessive water from a hose or heavy rain

Vacuum regularly on a low power setting (Using a Vacuum cleaner without a beater brush helping save the rug from unnecessary pulls)
