ASSEMBLY

3

Insert section A into the stand

4

Tighten the bolts on the stand

5

Open section A

6

Insert section B

7

Open section B

8

Insert section C

9

Open the branches and tips FULLY(Please See "Shaping Instructions" Below)

SHAPING INSTRUCTION

How to fluff the branches

Shaping the tree branches is the last step of assembly. The care and attention given to this final process will result in a genuinely beautiful and appealing holiday centerpiece.

Every tree style is shipped from the factory with the tips of each branch compressed to the center (Fig.1)

Each branch tip must be shaped to its proper position to give the tree natural look. Spread tips away from the branch gently (Fig.2)

Each individual tip should be spread out separately. Tips should be bent slightly upward to add a more natural looking appearance(Fig.3).

CLEANING & STORAGE

- Store this tree in a cool and dry place away from heat and moisture.
- Before putting this tree in storage, do the following:
 - Completely remove all decorations.
 - Clean the tree with a slightly damp cloth and let it dry naturally.
 - Raise all branches to original upright position; make sure not to damage any branches in the process.
