With its wide ribbing and ultra-realistic wood look, the Nobu Ribbon Almond Brown 24x48 Matte Porcelain Tile lends a clean and modern feel to any space. Because it's made of water-resistant porcelain, Nobu easily elevates a bath or shower wall. Its pale-blond oak tones are neutral, making them versatile enough to pair with nearly any interior design style.

An elevated essential

Discover the fresh, Scandinavian-inspired Nobu collection of ultra-realistic, wide-ribbed, wood-look tiles. The large-format, rectified tiles have a streamlined look, with few visible seams or grout lines. This collection of durable, moisture-resistant porcelain tiles can be installed where wood typically cannot—including the shower and backsplash. Nobu is made in Spain at a LEED-certified facility.

Earth-friendly, modern mimic

Solid oak, the innermost and densest part of the tree trunk, is known for its beautiful and distinctive wood grain pattern. Designed to perfectly mimic the look of solid oak, Nobu is in fact made of strong, dense, durable porcelain. Sustainably manufactured in Spain, this LEED and EPD-certified collection meets the highest standards of environmentally friendly production methods.
