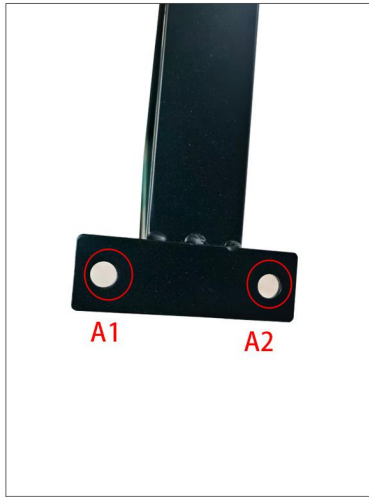

Image 2

Step 1: Flip the tabletop over to its back side. As shown in Image 1, identify the pre-drilled holes A1 and A2. Then, use screws to fasten the metal legs to the back of the tabletop by aligning A1 on the tabletop with A1 on the metal leg and A2 on the tabletop with A2 on the metal leg (the hole positions on the metal legs are shown in Image 2).

Step 2: Fix the adjustable foot pads at the bottom of the table legs (as shown in Image 3), and the installation is complete.
