Wall Clock Installation Steps

Pull it to release

Install the battery

Turn this knob clockwise to adjust the clock time

This is for time chime

1.Install the battery
(align positive and negative poles correctly)

2.Adjust the volume

3.Set to the chime mode

4.Set the chime hour
Press this button if incorrect (one press adds one hour)

Insert and hang the pendulum onto this hole

Hang it securely, then set it upright. Drill a hole and hang it up.

Installation completed

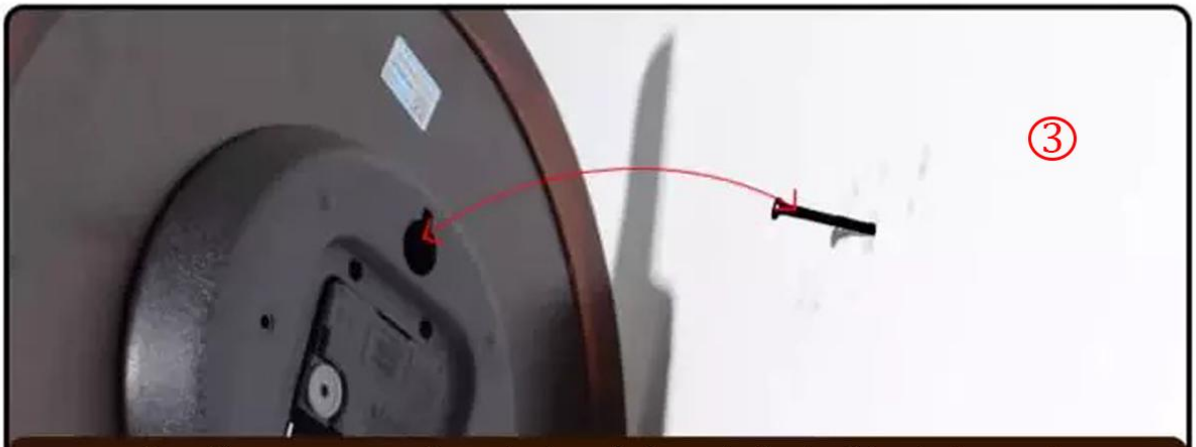

Steps for Using Self-tapping Screws

Drill a hole at the proper position

Gently tap the wall plug into the wall with a hammer

Screw in the self-tapping screw, hang the large hole on the back of the clock onto the screw, installation complete
