

Care & Maintenance

NATURAL FIBER REINFORCED CONCRETE (FRC)

Greenstone products are made with the best natural raw materials :

Granite stone powder / cement / natural jute fiber

This makes our products in lightweight, durability, and resistance !

10 YEARS EXPERTISE

Our products are Handmade.

Handcrafted using the best techniques, all our pieces are unique, with smooth finishes and keeping the natural texture of concrete.

- Handmade
- Manually polished
- Finishing with Wax and acrylic for stain / UV resistance

CARE & MAINTENANCE

To ensure the lasting beauty of your concrete surfaces we recommend reviewing and practicing the following care and maintenance instructions :

-> Clean with using mild soap and water.

-> Do not use heavy abrasives, ammoniated/acid based cleansers. Use of such cleaners will remove the wax protection and result in less stain resistance.

Re-waxing your product regularly is an easy process that will provide additional protection and renew it.

Products used outside should be covered in winter and raised off the ground.

Do not place hot objects on the surface as they may cause discoloration.

To re-wax or Repair small cracks, we recommend any commercially available Stone floor wax on paraffin base.

ONE-OF-A-KIND

Our products are entirely handcrafted by highly skilled artisans. It makes your product unique in the world !

Inherent to any artisan concrete product are natural markings and inconsistencies that give the unique texture and color.

It includes :

- Natural markings and inconsistencies are not structural and natural to the concrete piece
- Molding folds, which are inherent to the molding process in production
- Air pocket fills, which happen during the molding process and are filled in the finishing as part of the aesthetic look
- Markings and color variances, which create the natural look and feel of the finished product.
