

Upholstered bed

180*200

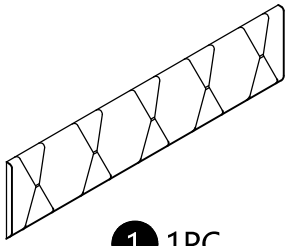

TIPS

1.This product is divided into 2 parcels for delivery. They may not arrive at the same time. Please wait patiently.

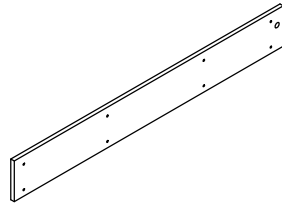

2.Please read the instructions fully before assembly. These instructions include important information which could ensure correct assembly. We have been working on providing high quality products for you. However, in the rare instance that your product is defective,missing parts or there are some issues, please don't hesitate to contact our customer service to submit parts requirements, assembly suggestion,or warranty claims, and we will give the best solution as soon as possible. If necessary, we need you to provide some more clear pictures of the issue.

3.Insert the screws in holes and tighten the screws, but not too tight, 70%~80% is ok, finally tighten all the screws. If some issues happened that some screws can not target to the hole or some parts are difficult to install, please adjust the tightness of the screws.

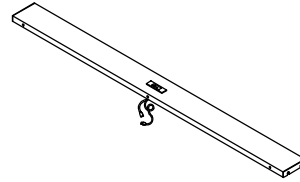

4.2 people are recommended to finish.

A drawing of a bolt and nut assembly. The bolt is a long, cylindrical rod with a hexagonal head on the left and a threaded section on the right. A nut, which is a hexagonal ring with internal threads, is shown on the right end of the bolt, partially covering the threads.

Technical drawing illustrating the assembly of a bed frame, specifically the connection of the headboard to the frame using a telescopic hinge mechanism.

The drawing shows the headboard (labeled 26) being attached to the frame (labeled 39) using a telescopic hinge (labeled 11, 25, 26, 39, 47, C, F). The hinge consists of multiple tubes and brackets that allow the headboard to fold down.

Key components and labels:

- 11, 25, 26, 39, 47, C, F:** Labels for the various parts of the telescopic hinge mechanism.
- 26:** The headboard.
- 39:** The bed frame.

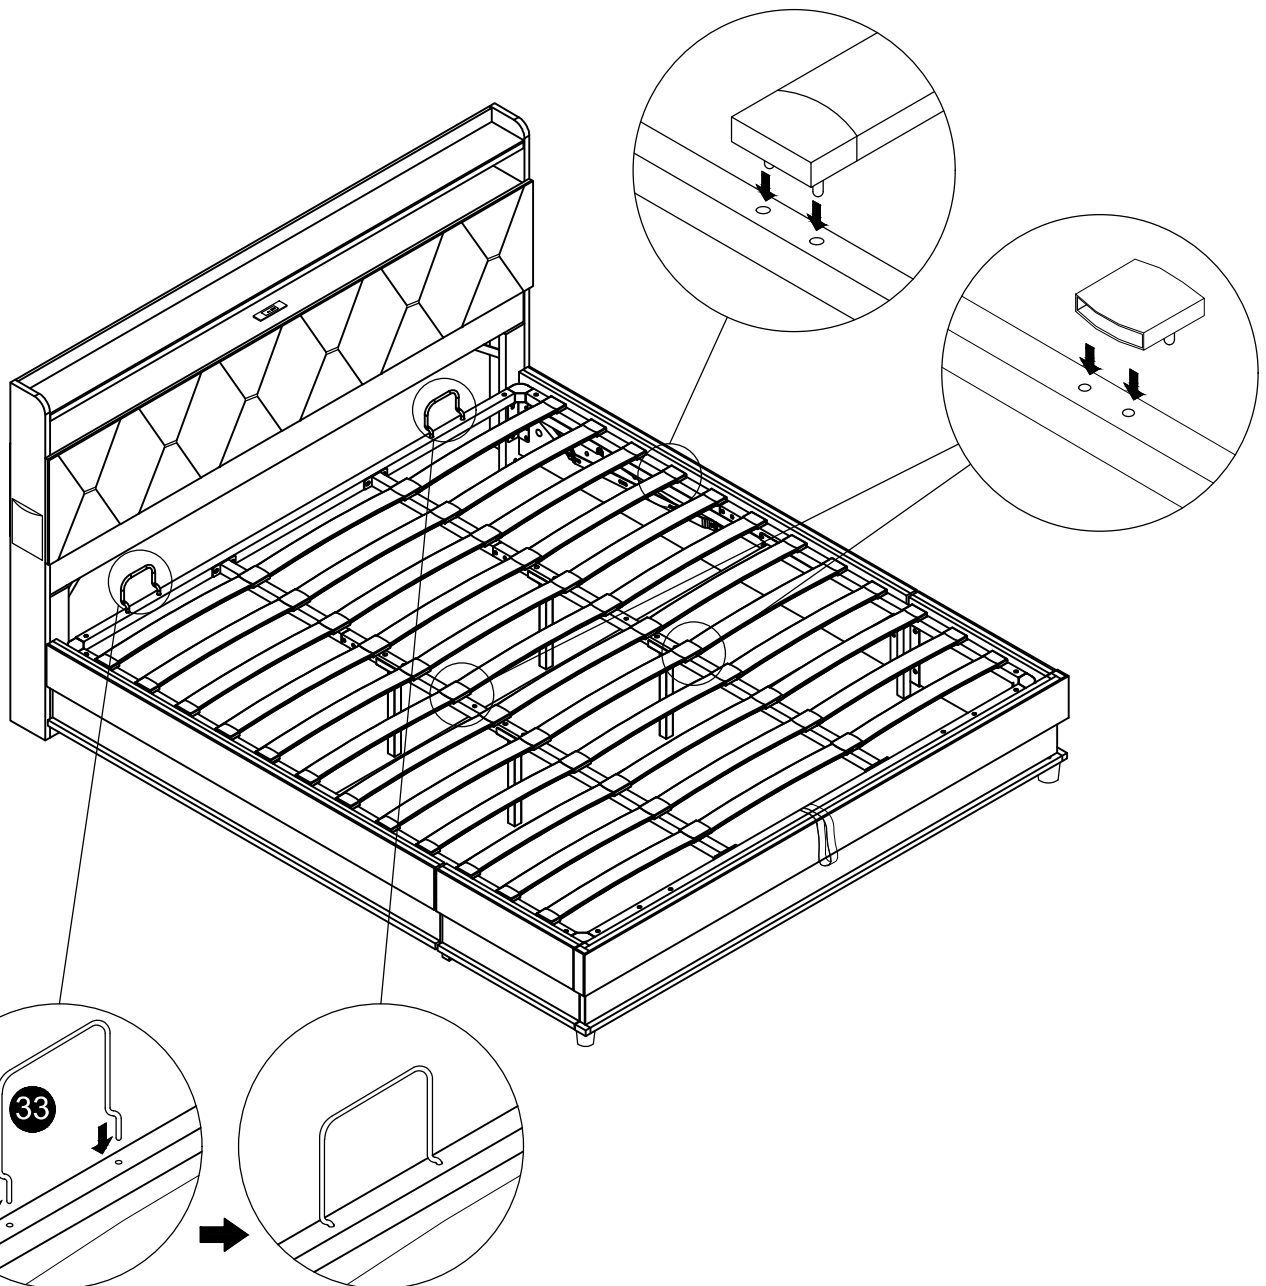

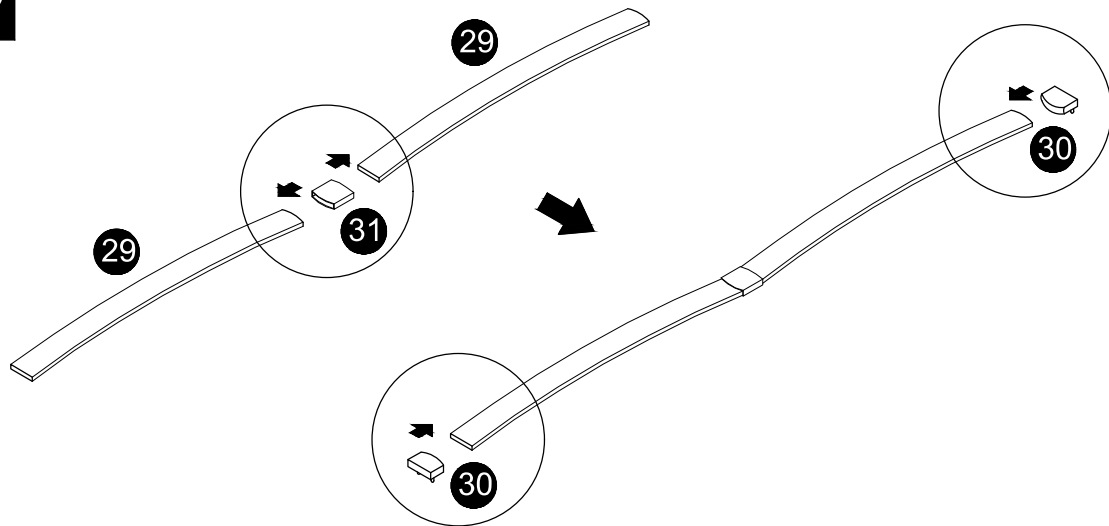

A detailed view of the hinge mechanism is shown in the upper right corner, highlighting the connection points and the use of M8 bolts (labeled F) and C-brackets.

Parts list:

Light bar

Pull out
and unfold

Light bar

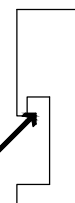

The unfolded light strip has a light strip surface on one side and a magic tape on the other side

Short light bar

Long light bar

Long light bar

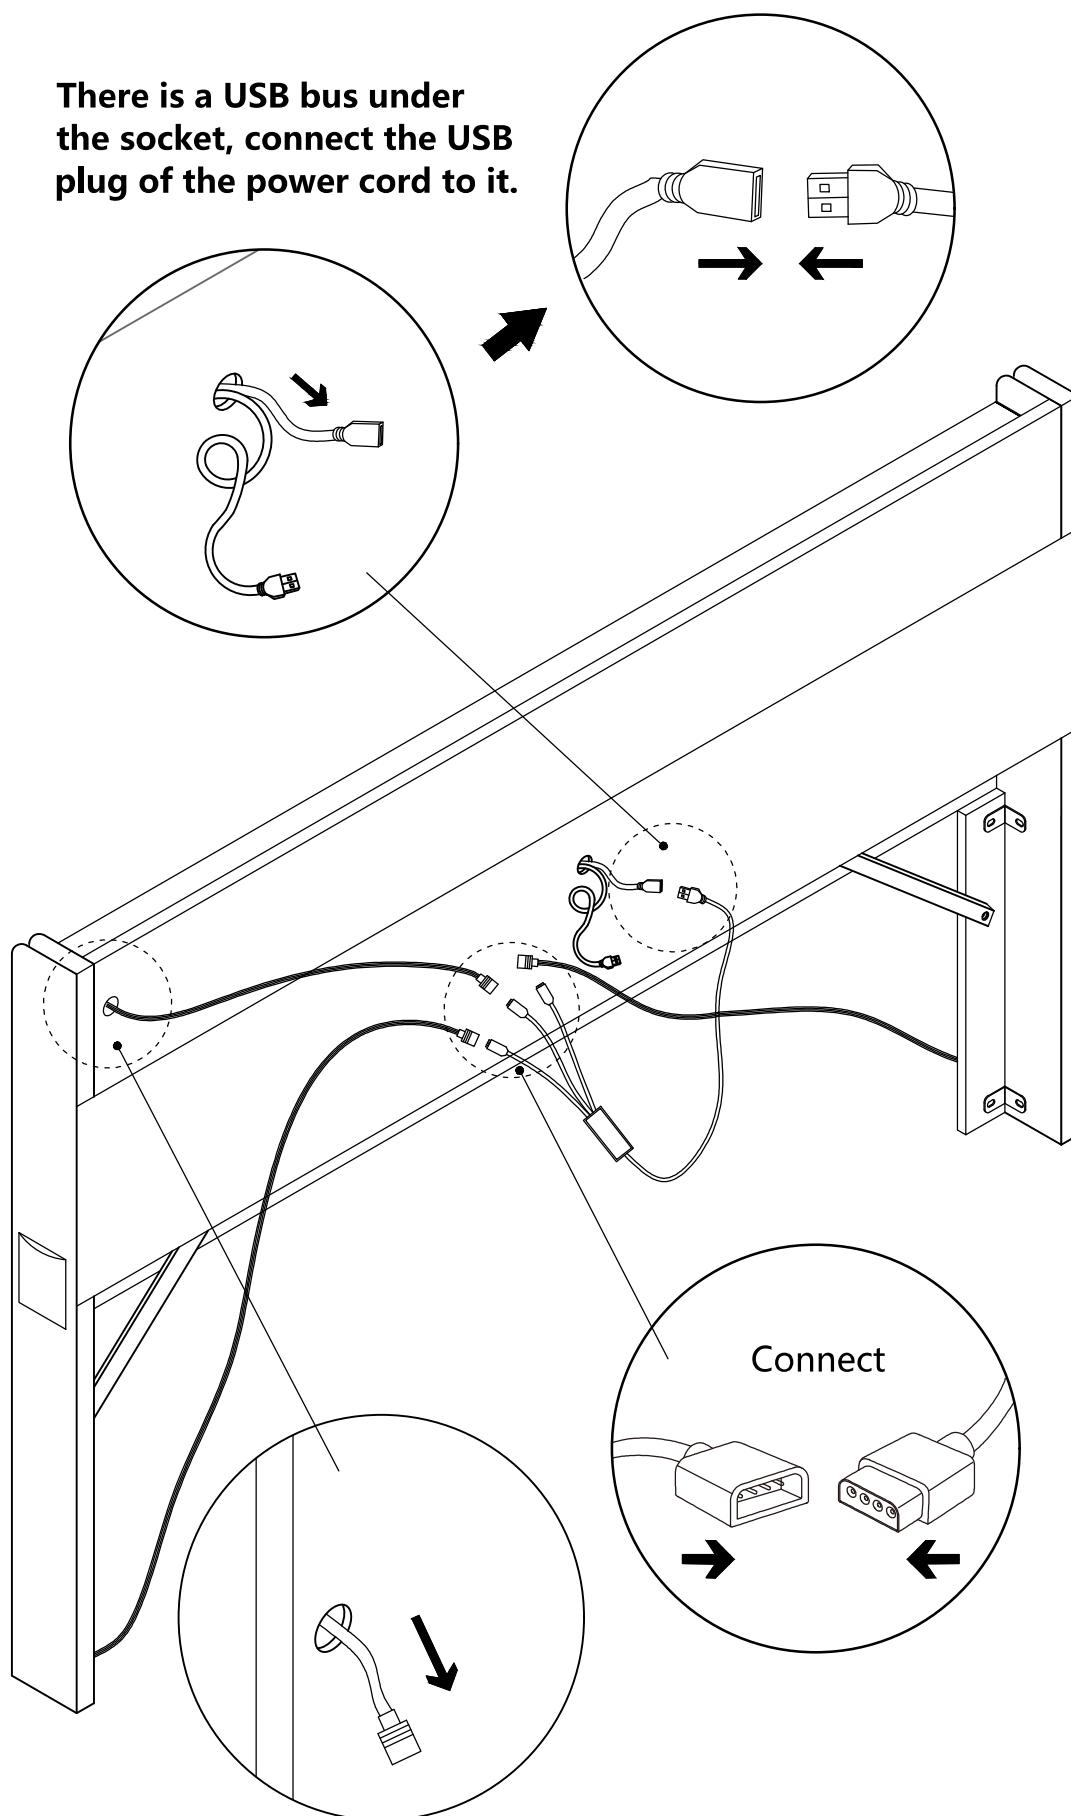

There is magic tape inside
to stick the light strip on

Upholstered bed

27

There is a USB bus under the socket, connect the USB plug of the power cord to it.

Just pull out the connector of the light strip from the back.

- **KEEP** new and used batteries **OUT OF REACH of CHILDREN**
- **Seek immediate medical attention** if a battery is suspected to be swallowed or inserted inside any part of the body.

If a battery has been ingested, or there is a possibility one might have been ingested, please seek medical attention and inform the medical authorities that you suspect battery ingestion.

It's not always clear when a child has swallowed a button battery, as there are no specific symptoms. However, they might:

- cough, gag, or drool;
- seem to have a stomach bug or virus;
- vomit;
- complain of pain in their stomach, chest, or throat;
- appear tired or sluggish; and
- lose their appetite.

Since the signs aren't obvious, it's important to keep a close eye on loose, used, or spare button batteries in your home, as well as the products that contain them.
