1

Pre-Assembly Package Inspection

This product is delivered in 2 separate cartons, containing the tabletop and base.

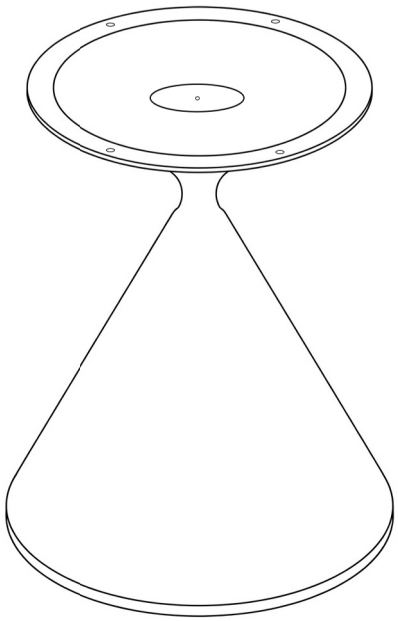

2

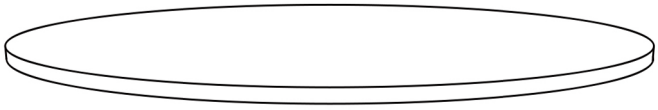

1. Check all outer cartons for dents, cracks or impact damage right after delivery.
2. If packaging is intact and quantity matches, cut the PP packing straps carefully with scissors and unpack the items.

CAUTION: Avoid scratching the metal surface or tabletop when cutting plastic straps.

Attach Tabletop to Base

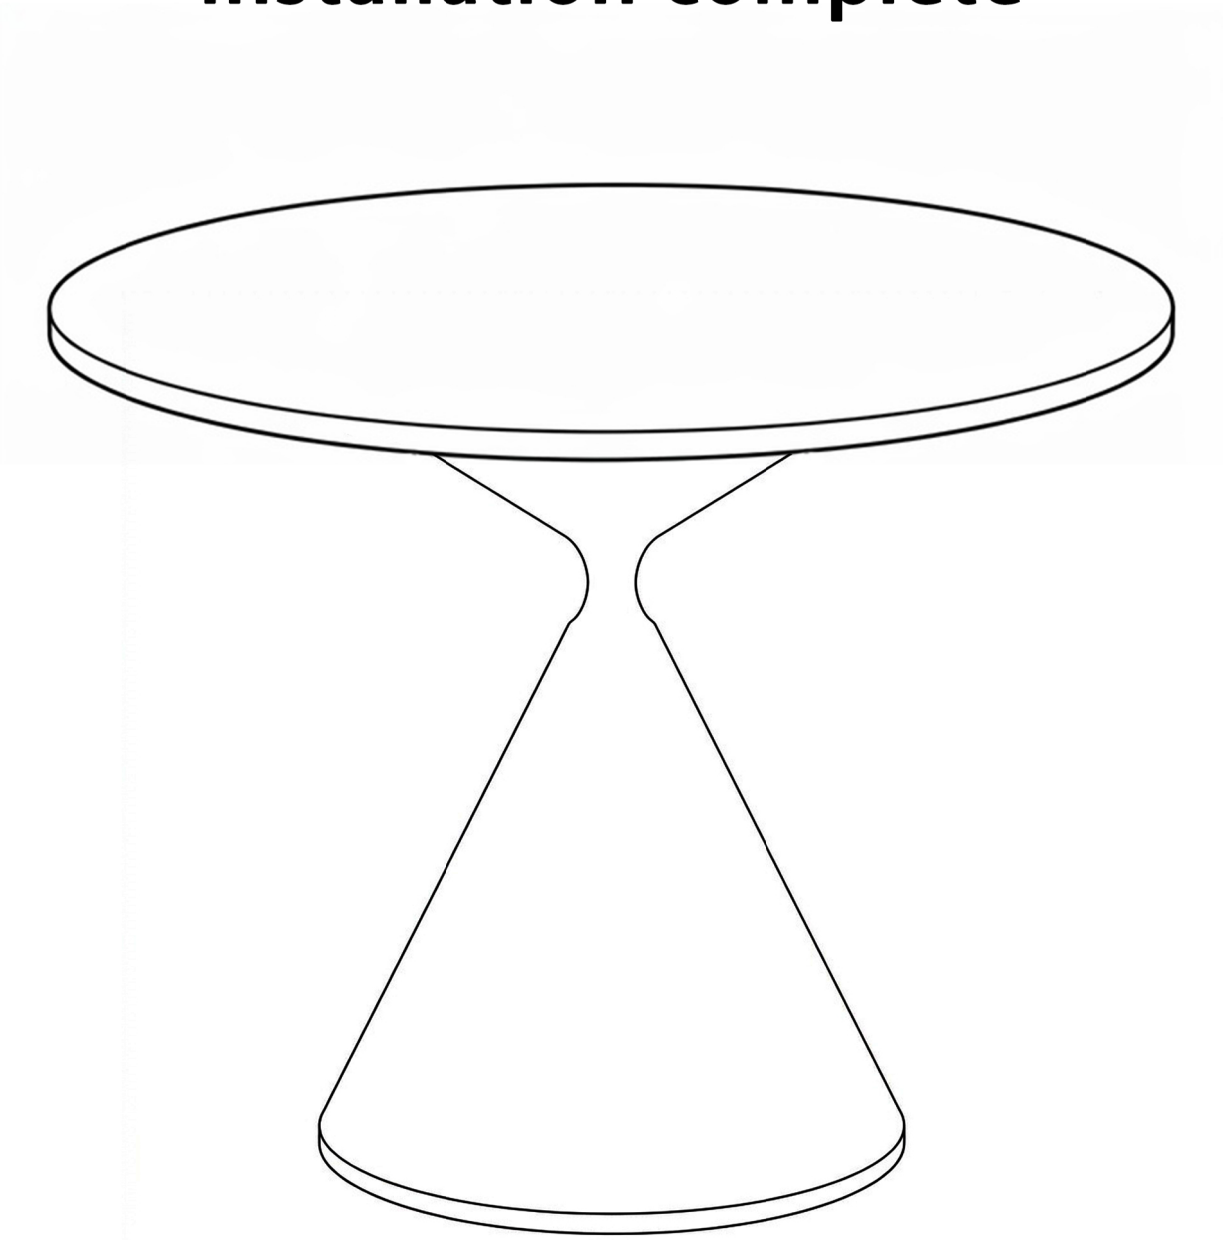

SAFETY REMINDER: The tabletop is heavy. Two adults are required to lift and position it. Do not assemble alone.

1. Lift the tabletop with a helper and set it evenly on top of the pre-assembled base.
2. Precisely align all threaded holes on the tabletop′ s underside with the holes on the base′ s connecting plate.
3. Hand-thread all screws through the tabletop loosely first.
4. After all screws are lightly fitted, tighten every screw evenly with the Hex Allen Wrench.

Assembly Tip: The underside of the tabletop is dimly lit during installation; use a flashlight to clearly locate the threaded holes for easier alignment.

5

Installation complete

Final Stability Check

1. Recheck all tabletop screws to confirm each one is fully and evenly tightened.
2. Shake the table gently from all sides to test stability; there should be no wobble or abnormal rattling noise.
