Notes

1. The pool cleaner can only be used as an auxiliary tool to replace manual cleaning of the pool, it cannot replace the role of pool filtration, circulation, and **disinfection** in the water treatment process. The use of a pool cleaner requires the use of other equipment (such as a filtration system) to achieve the desired effect.
2. The sediment and fine dust from the use of pool chemicals cannot be absorbed completely. The product cannot climb walls or stairs, and cannot clean floating algae or very large leaves.
3. It only operates in water.
4. To perform perfectly, please ensure that the cleaner is fully charged and the filter is clean before each use. Please always switch off the cleaner when it is not in the water or before charging.
5. Please use the product in the following environments: the temperature: 50~95°F, PH value: 7.0-7.8, chlorine content: less than 4.0ppm, sodium chloride: less than 5000ppm.
6. If the cleaner does not work, please check if the battery is too low or if the machine is stuck.
7. After the cleaning is completed, it will automatically return and dock next to the wall. But it will not emit sound or light prompts.
8. When it works, please do not enter the swimming pool.
9. Please allow the slight color difference caused by the shooting light and 1-3cm error due to manual measurement, and make sure you do not mind before you order.
