

Chicken Run with Tunnel

1x1+4

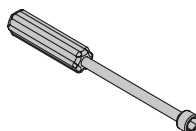

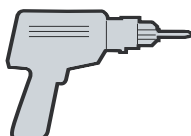

Assembly Guide

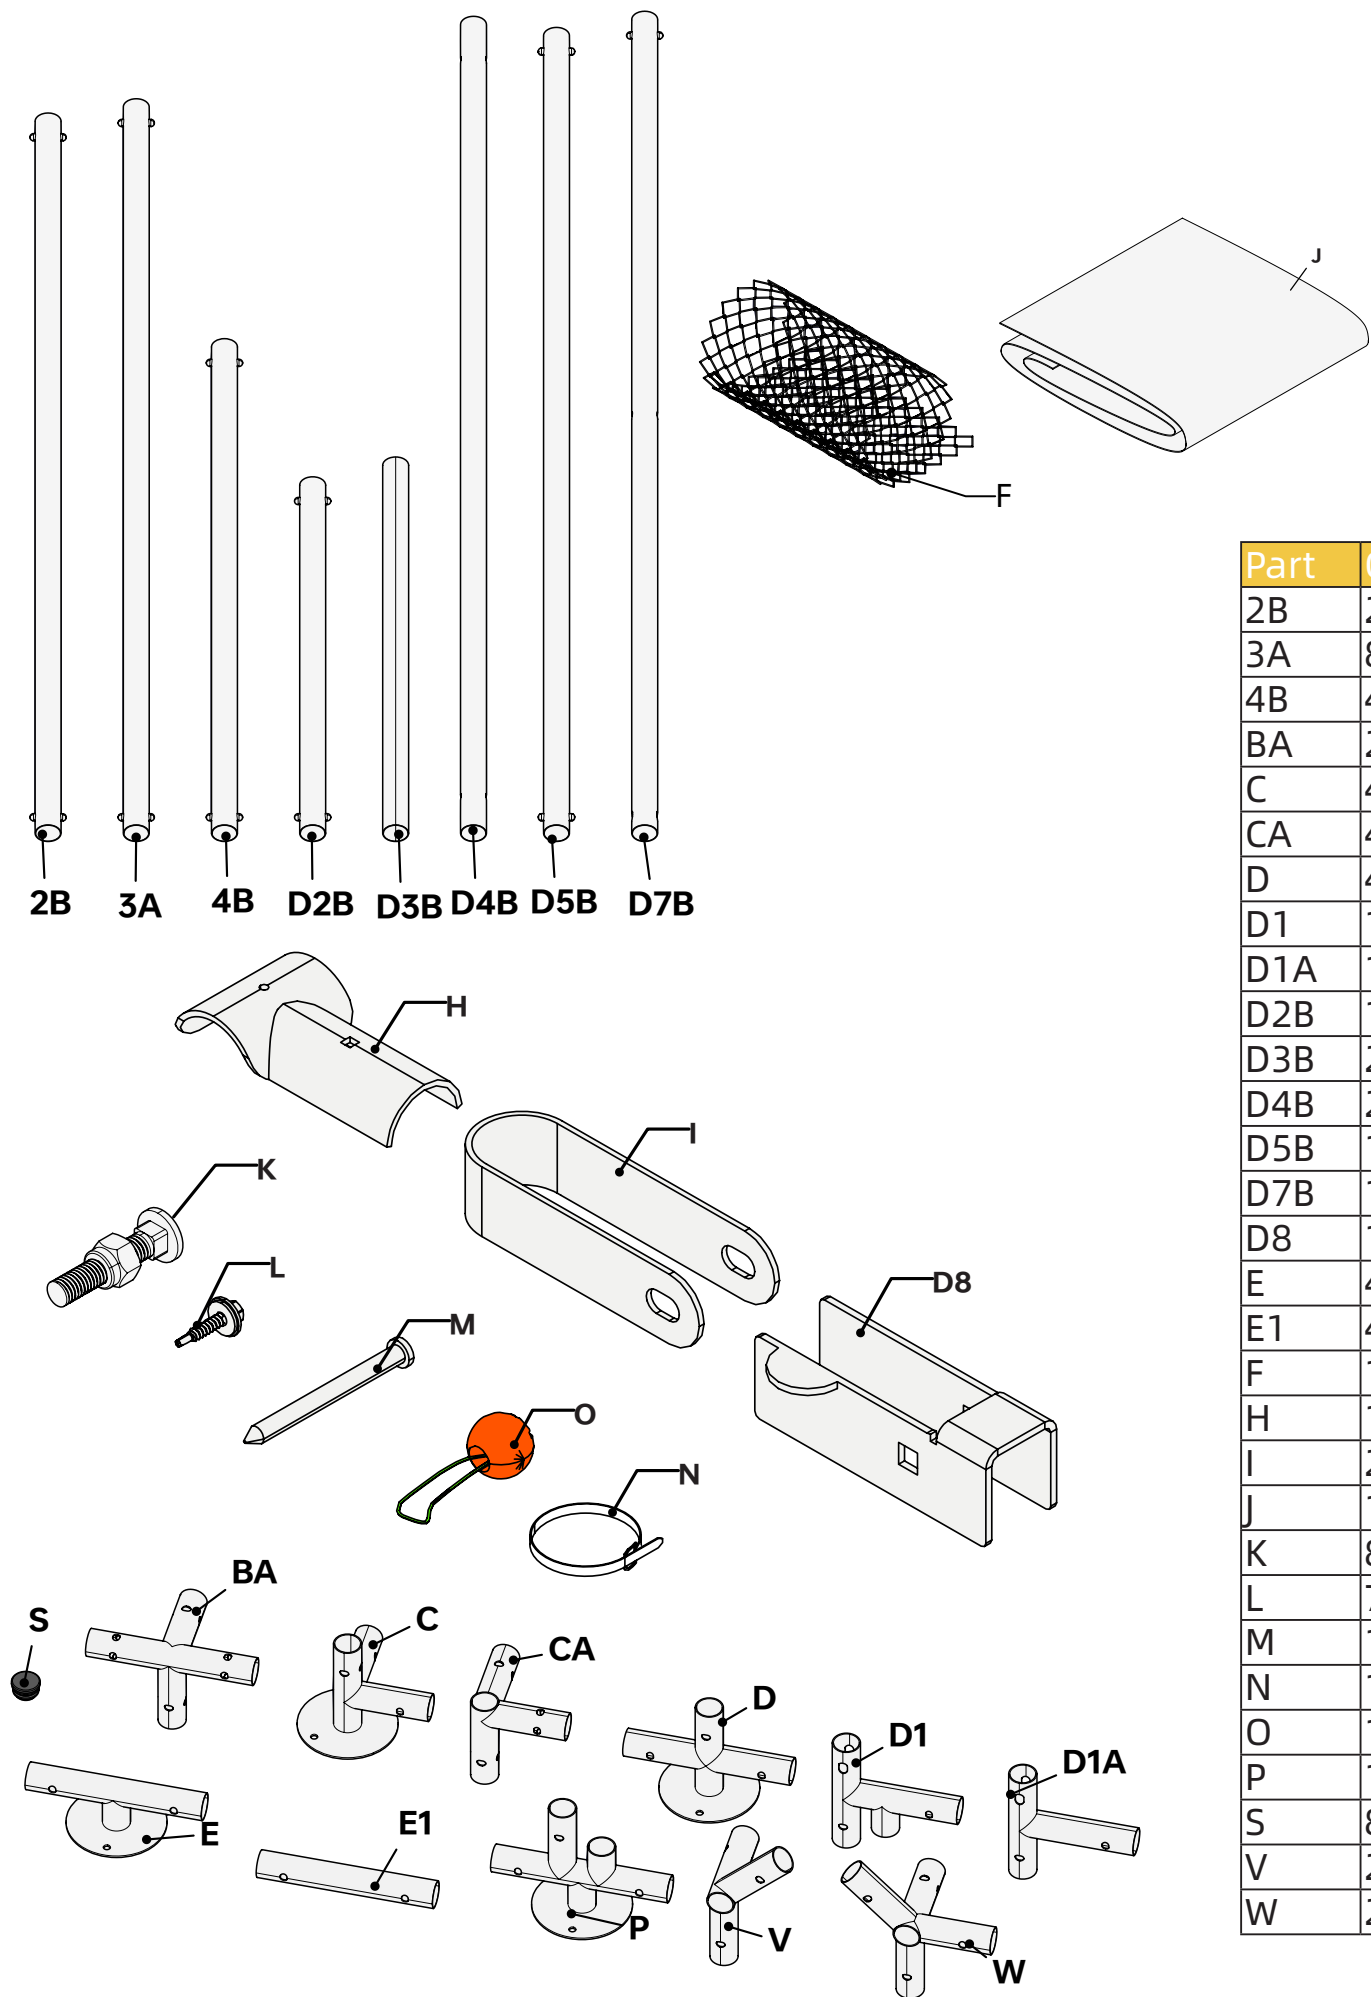

SAFETY

- Read all the safety information and instructions.
- Make sure you have all the parts before the assembling
- Do not assemble the chicken run on a stormy day. It will be damaged.
- Always wear work gloves, long sleeves, and safety goggles when assembling.
- Keep children and pets away from the assembly site.
- When using a ladder, make sure the ground is stable enough to hold the ladder.
- Remove snow from the roof after each snowfall.
- Do not walk on the roof, even if you can.

P	1
D	4
E	4

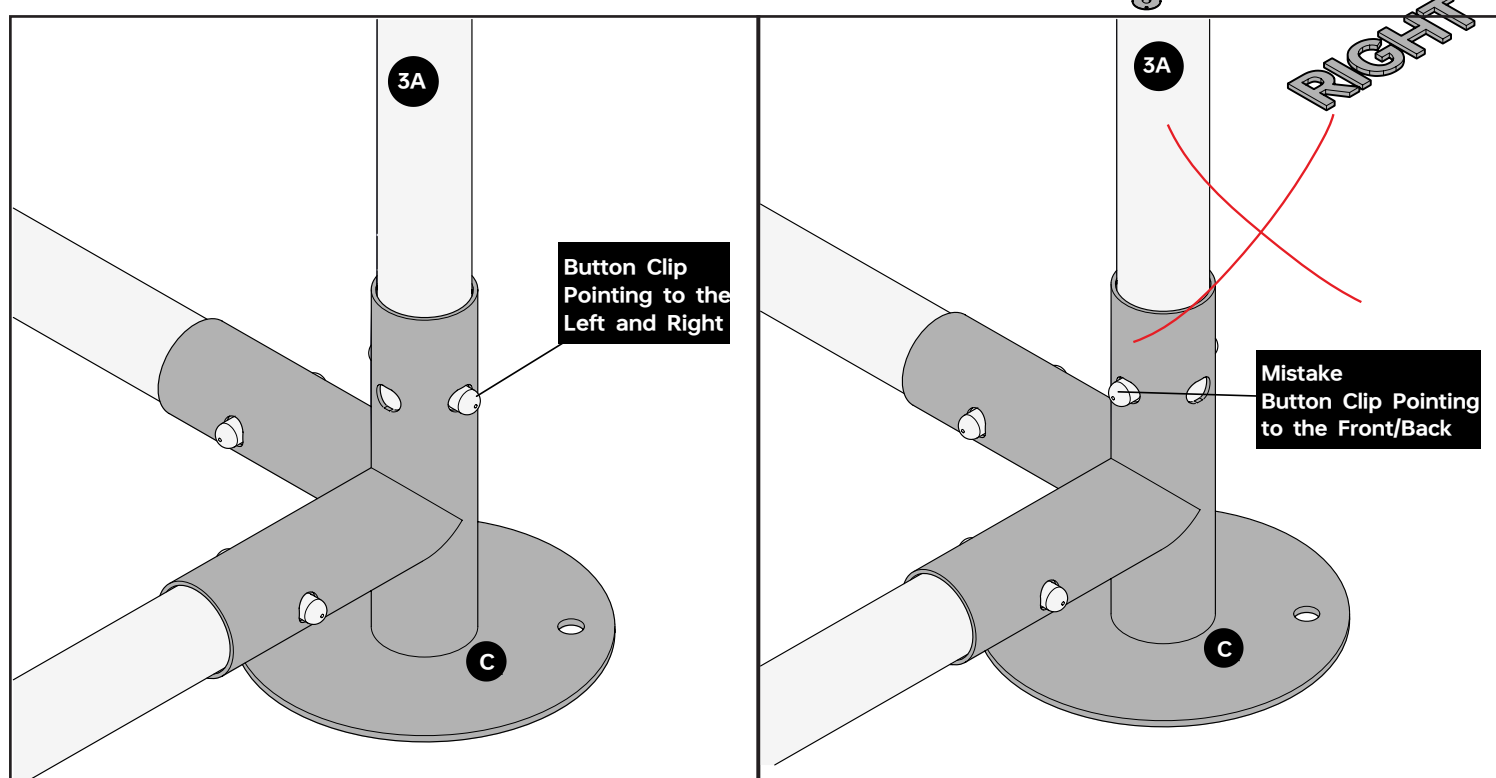

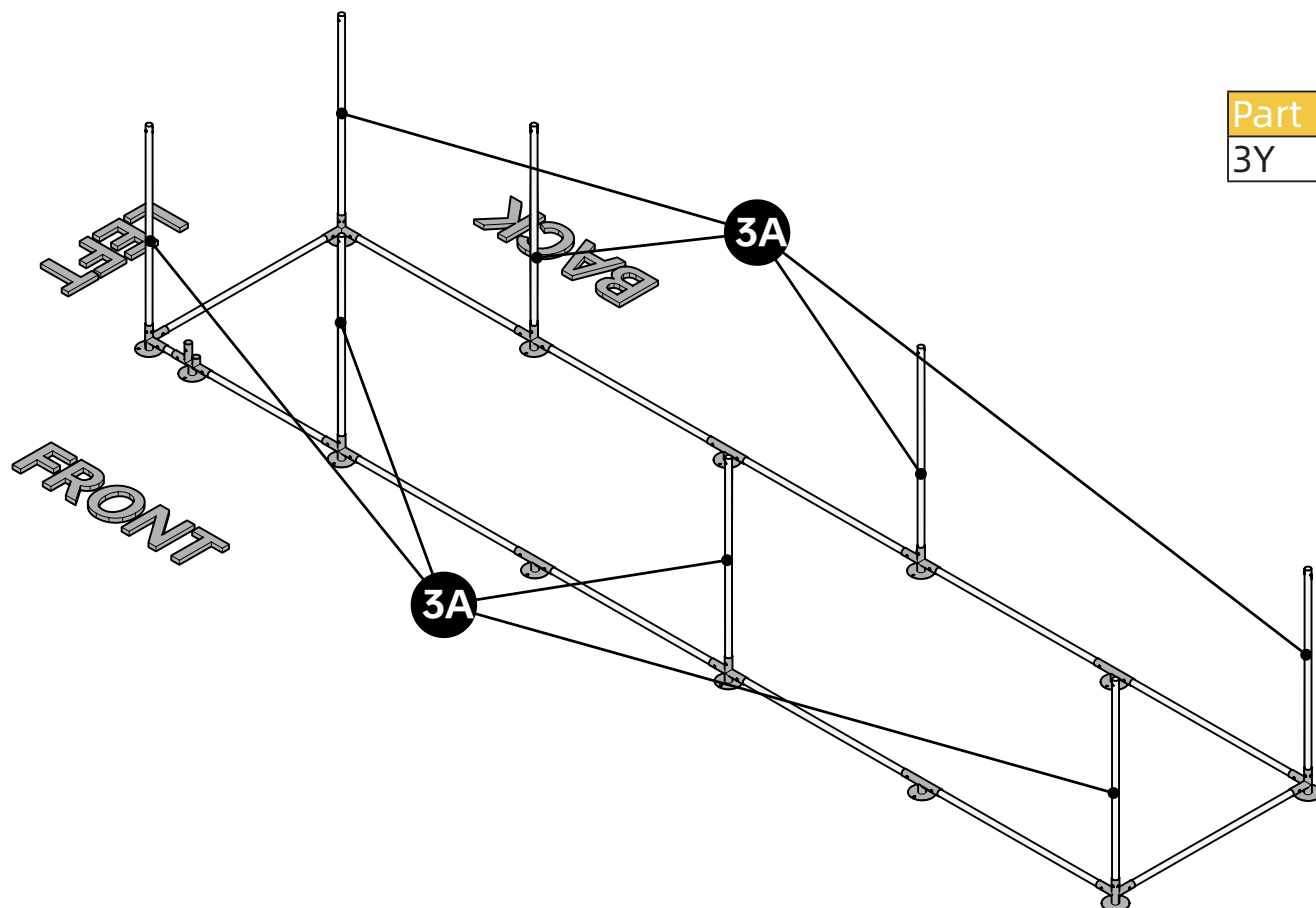

Note

For this product, tubes and joints are connected using button clips. Button clips are already inserted inside tubes. When connecting, press the button clip and insert one tube into the joint. Forcing the tubes in might also work but you are risking damaging the Clip.

The way Joint P and Tube 2B are connected is different from how other joints and tubes are connected. Make sure Joint P can slide along Tube 2B. The exact location for Joint P will be marked in a later step.

Pay attention to the orientation of Part P.

Part	Qty
3Y	8

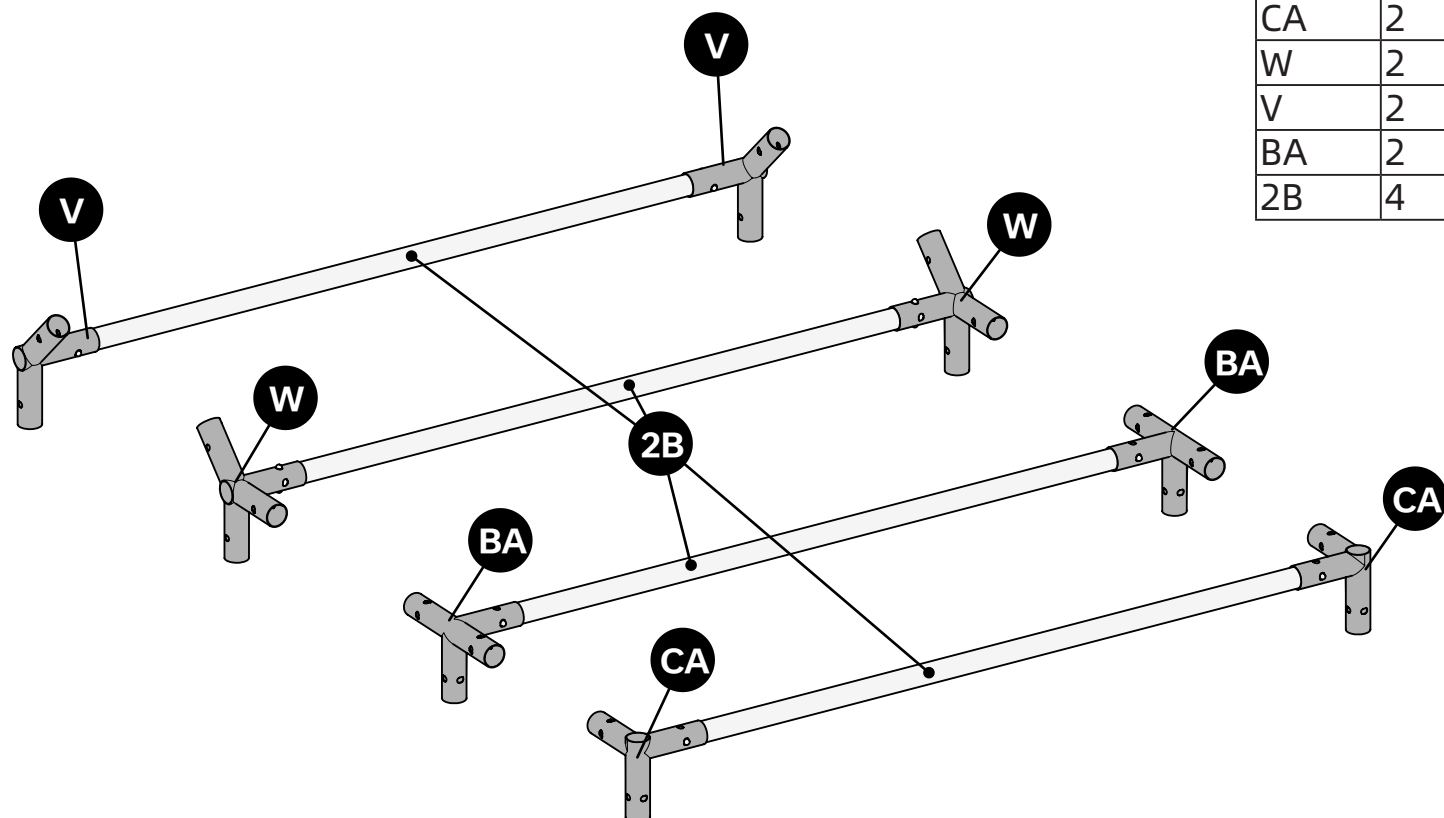

Note

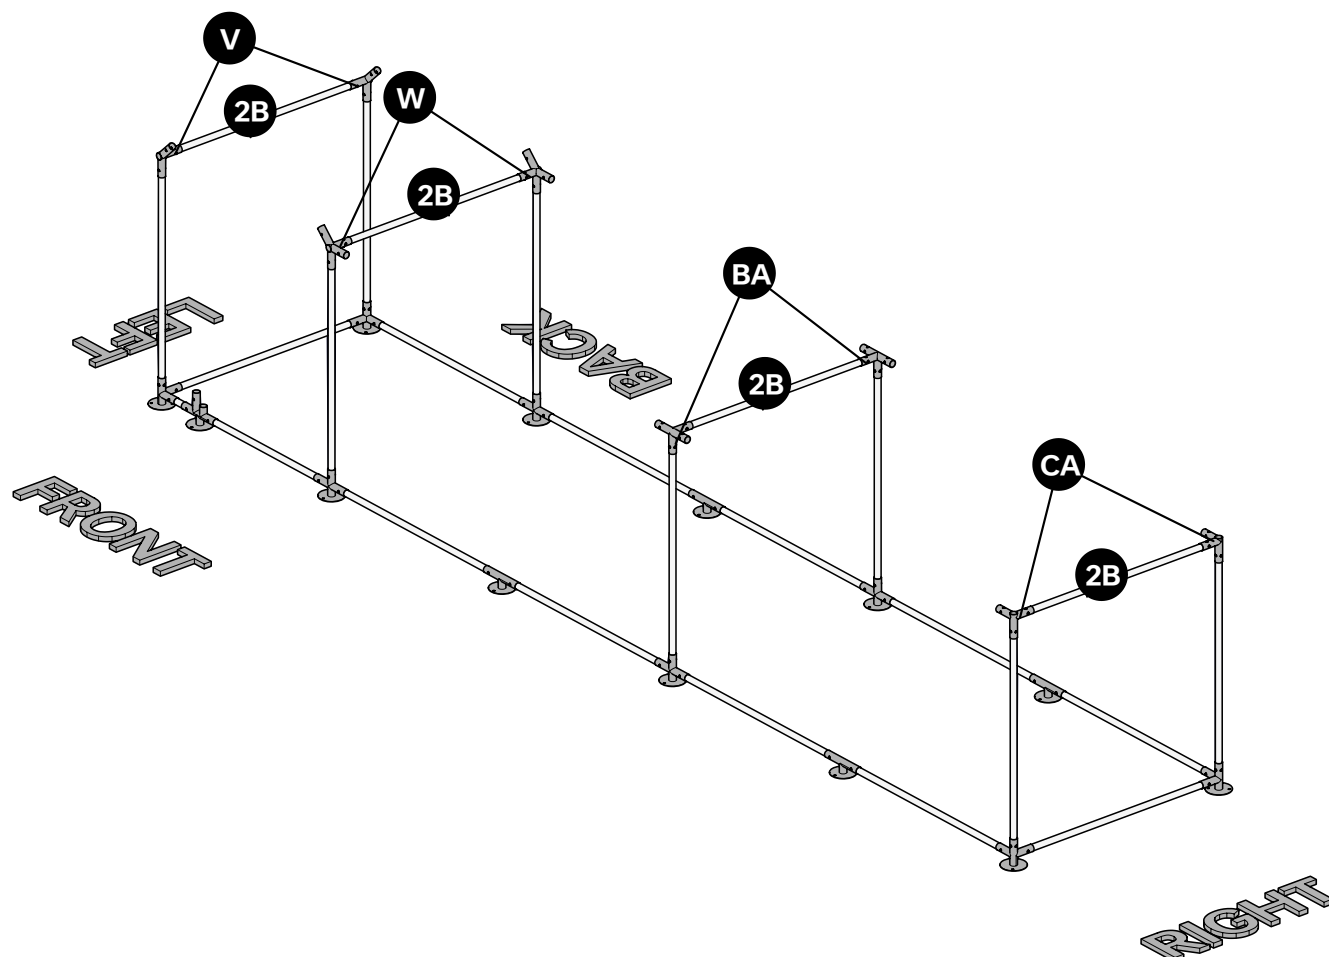

There are two pairs of holes on the vertical tube of Part C. When connecting 3A to Part C, make sure that the Button Clip is pointing to the left and right. An incorrect layout is also shown above.

Note

The rest of the frames are hidden to improve readability for this step.

Start this step from the bottom. Slide Joint P left and right until part I can connect to Joint D1.

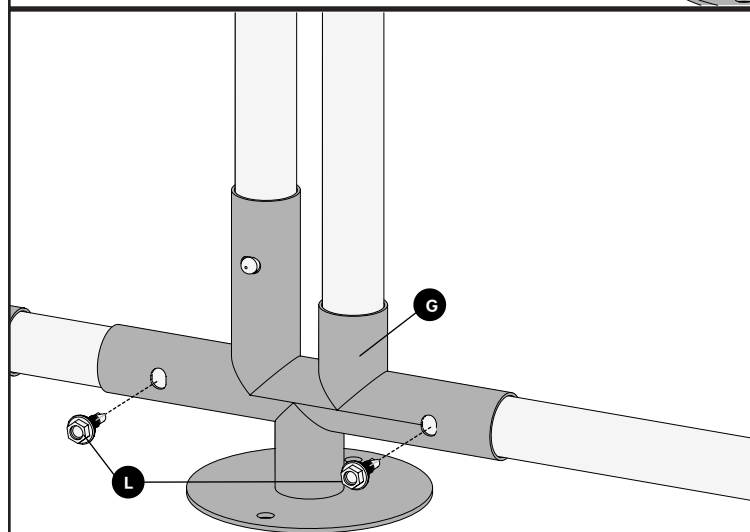

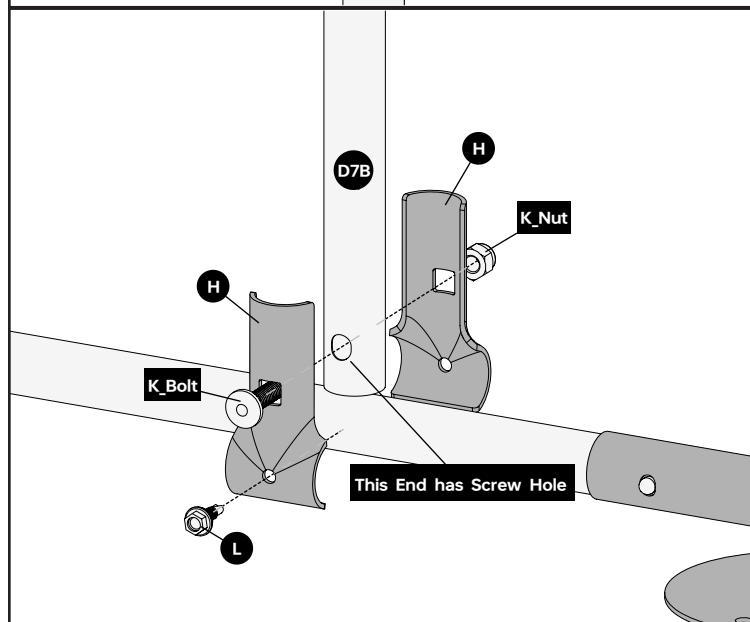

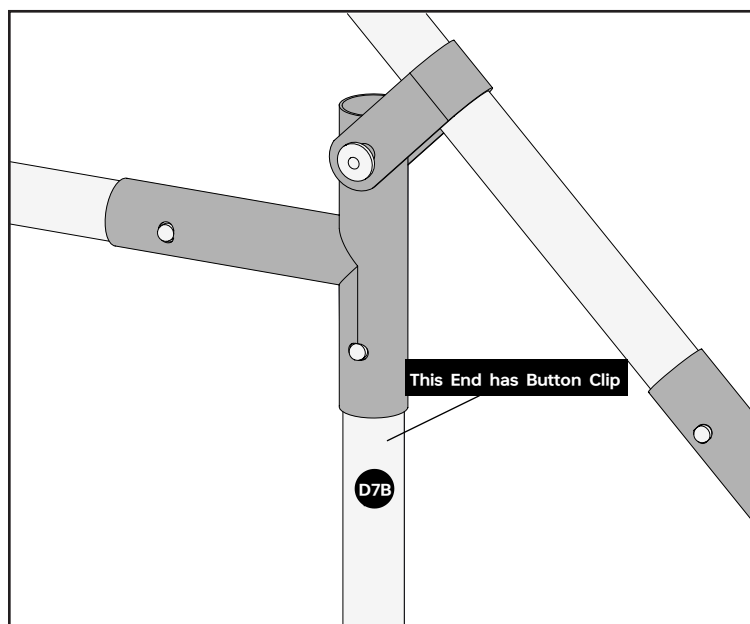

Part	Qty
D7B	1
H	2
L	3
K	1 Set

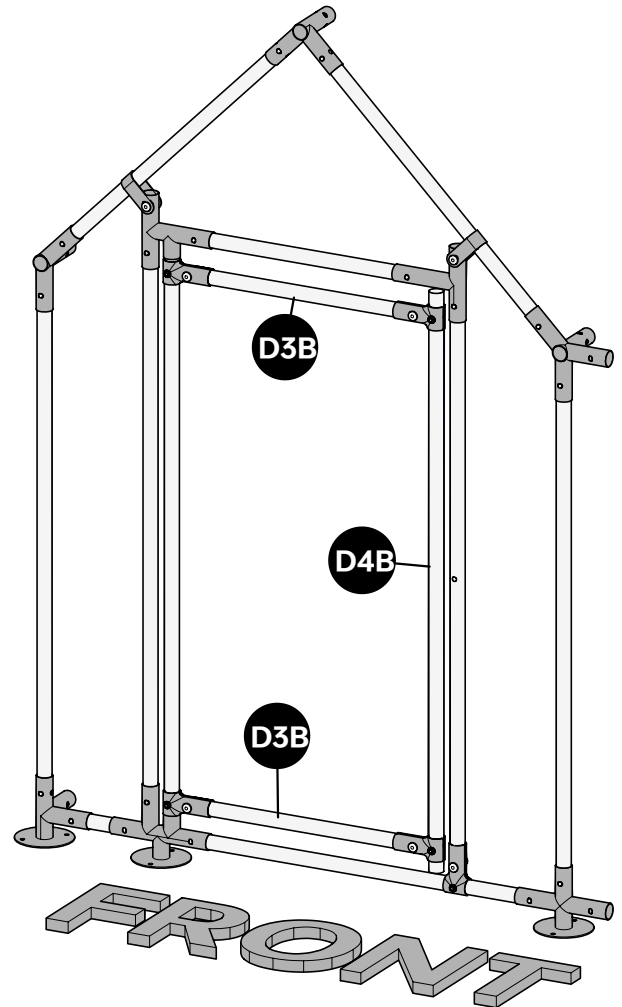

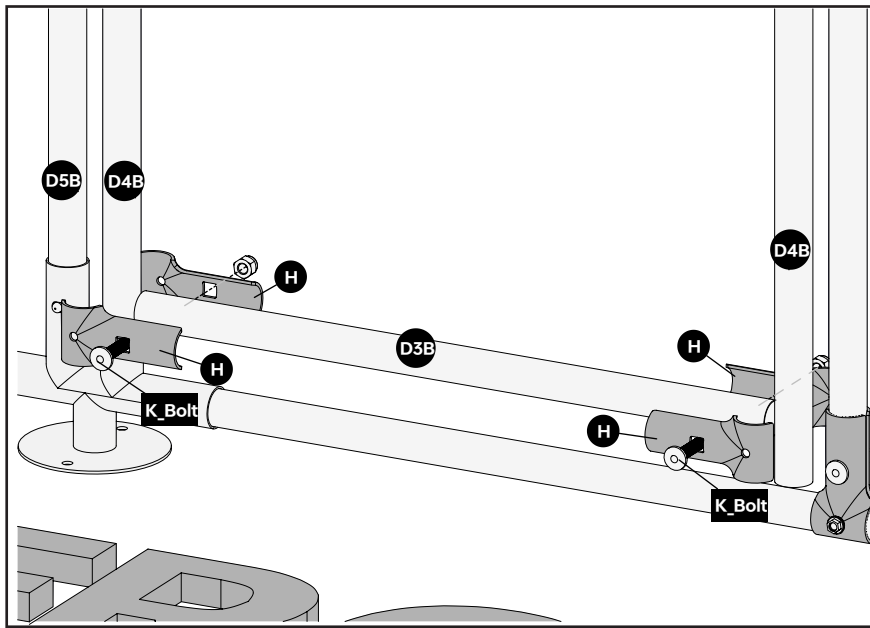

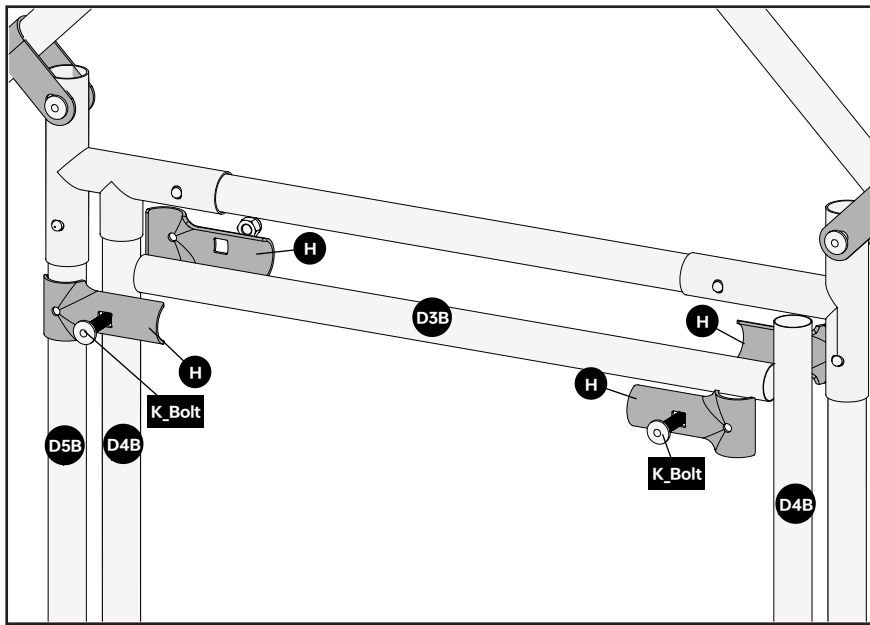

Note

Tube D7B has two different ends. Use the end with screw holes as the bottom end. For screw L, you will need a power tool to drive it into tubes.

After this step is done, use two L to secure Joint P.

Part	Qty
D3B	2
D4B	1
H	8
K	4 Sets
L	4

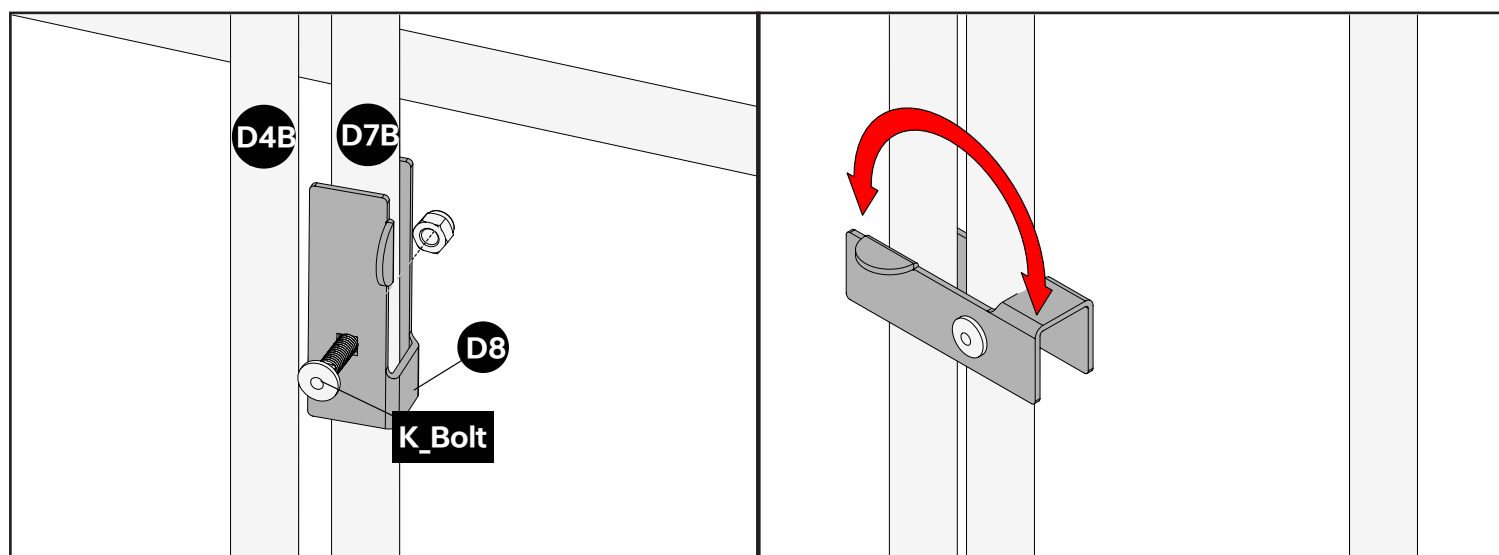

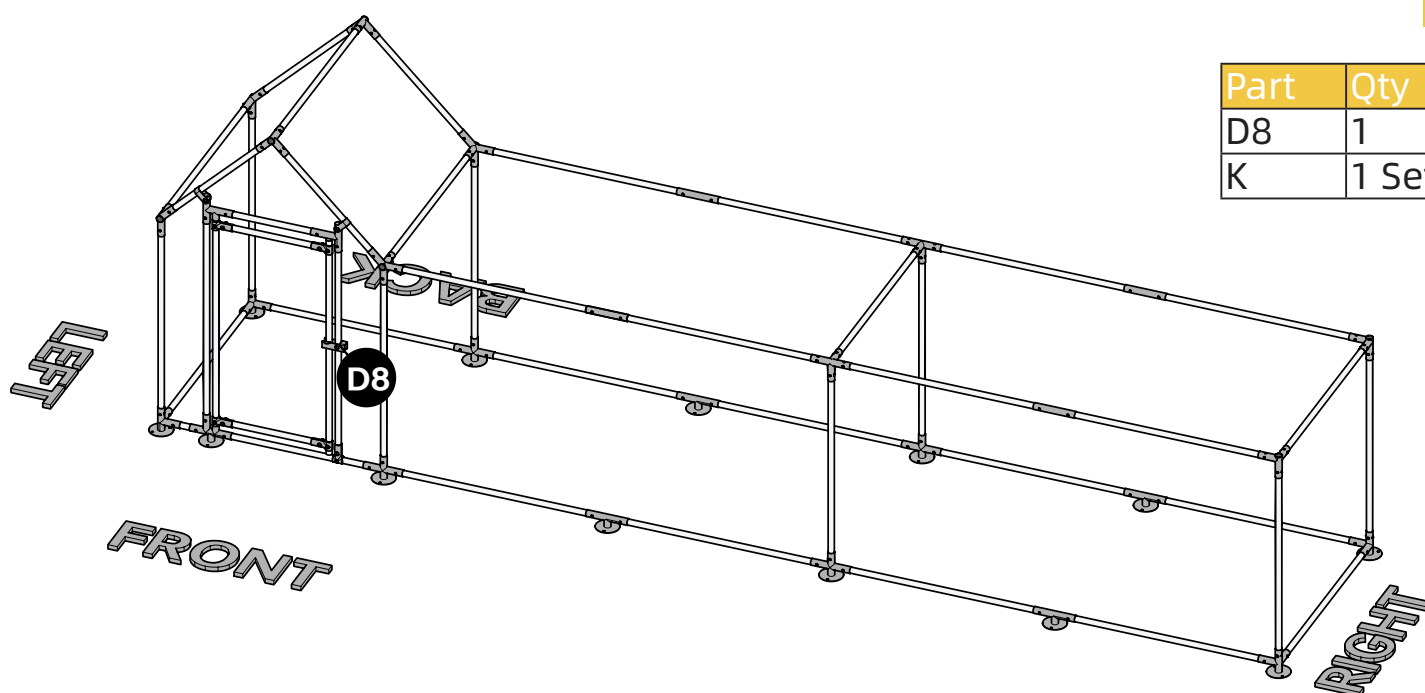

Note

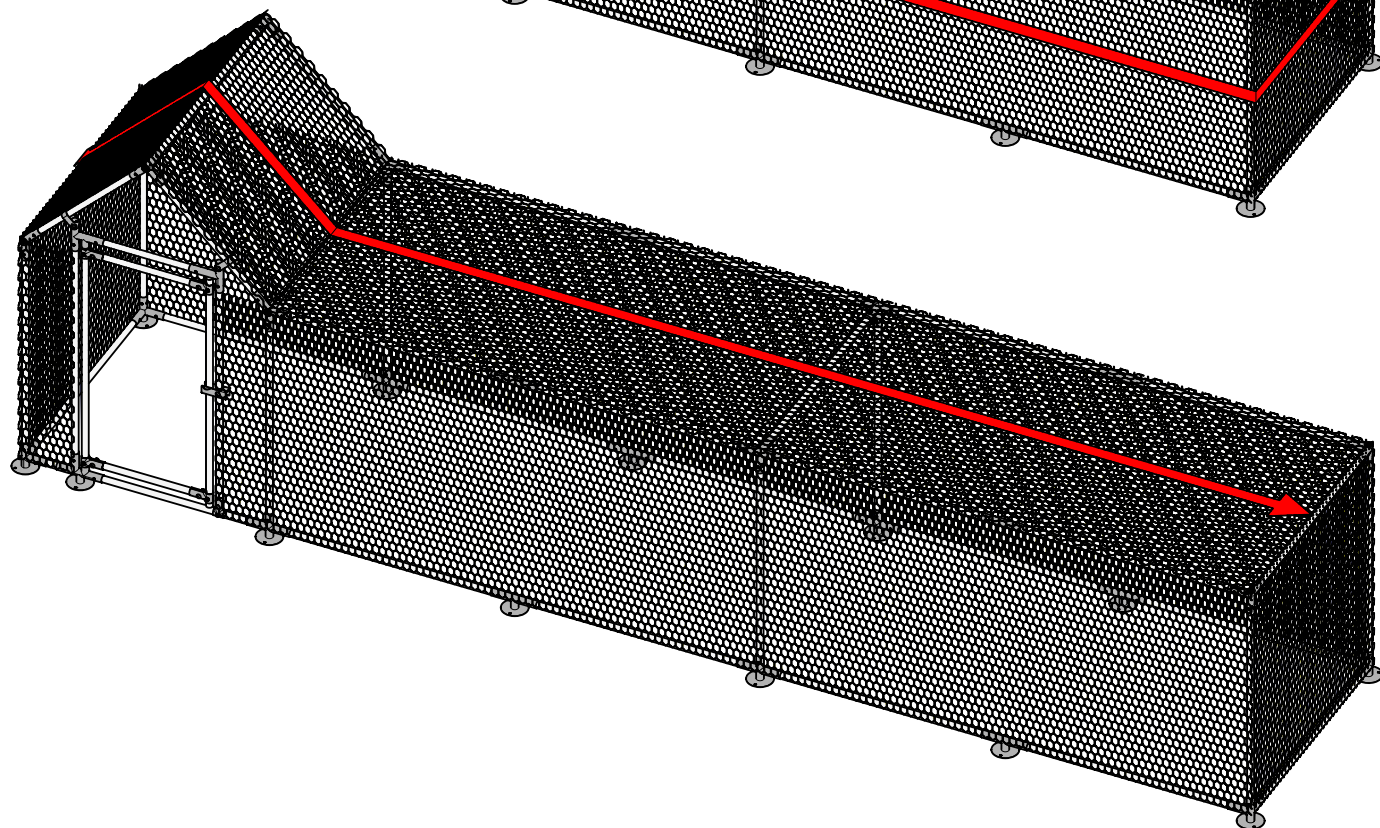

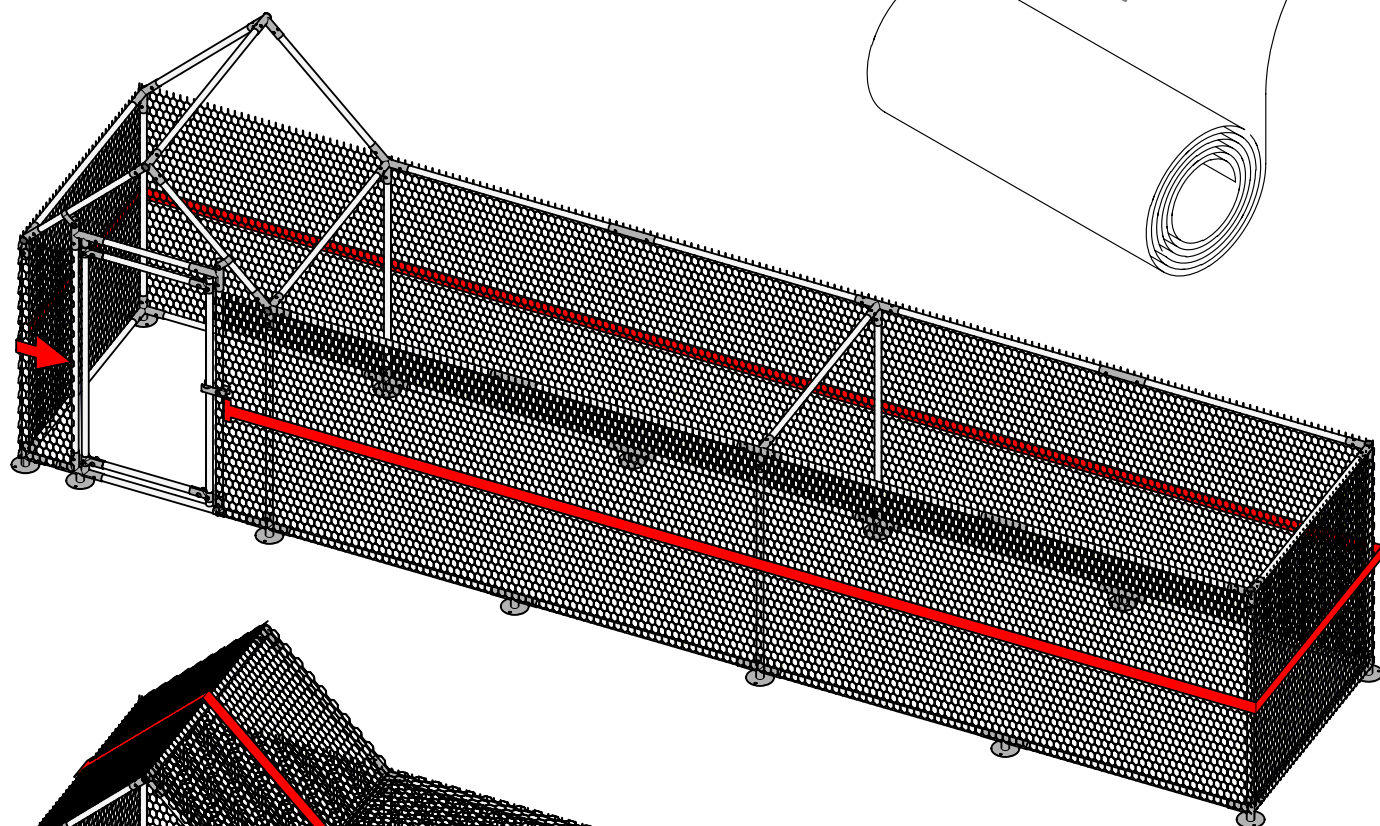

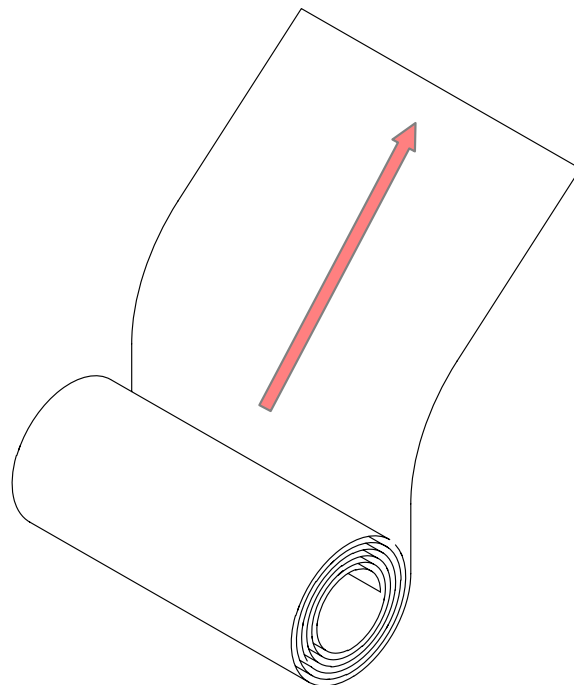

Do not worry too much about the exact location of D3B and D4B. Just make sure D4B is completely covered by the two pairs of H.

Note that on the two detailed illustrations above, screw L is not used. This is so that you have some wiggle room adjusting D3B and D4B. Once you are happy with the result, use screw L to secure H.

Part	Qty
D8	1
K	1 Set

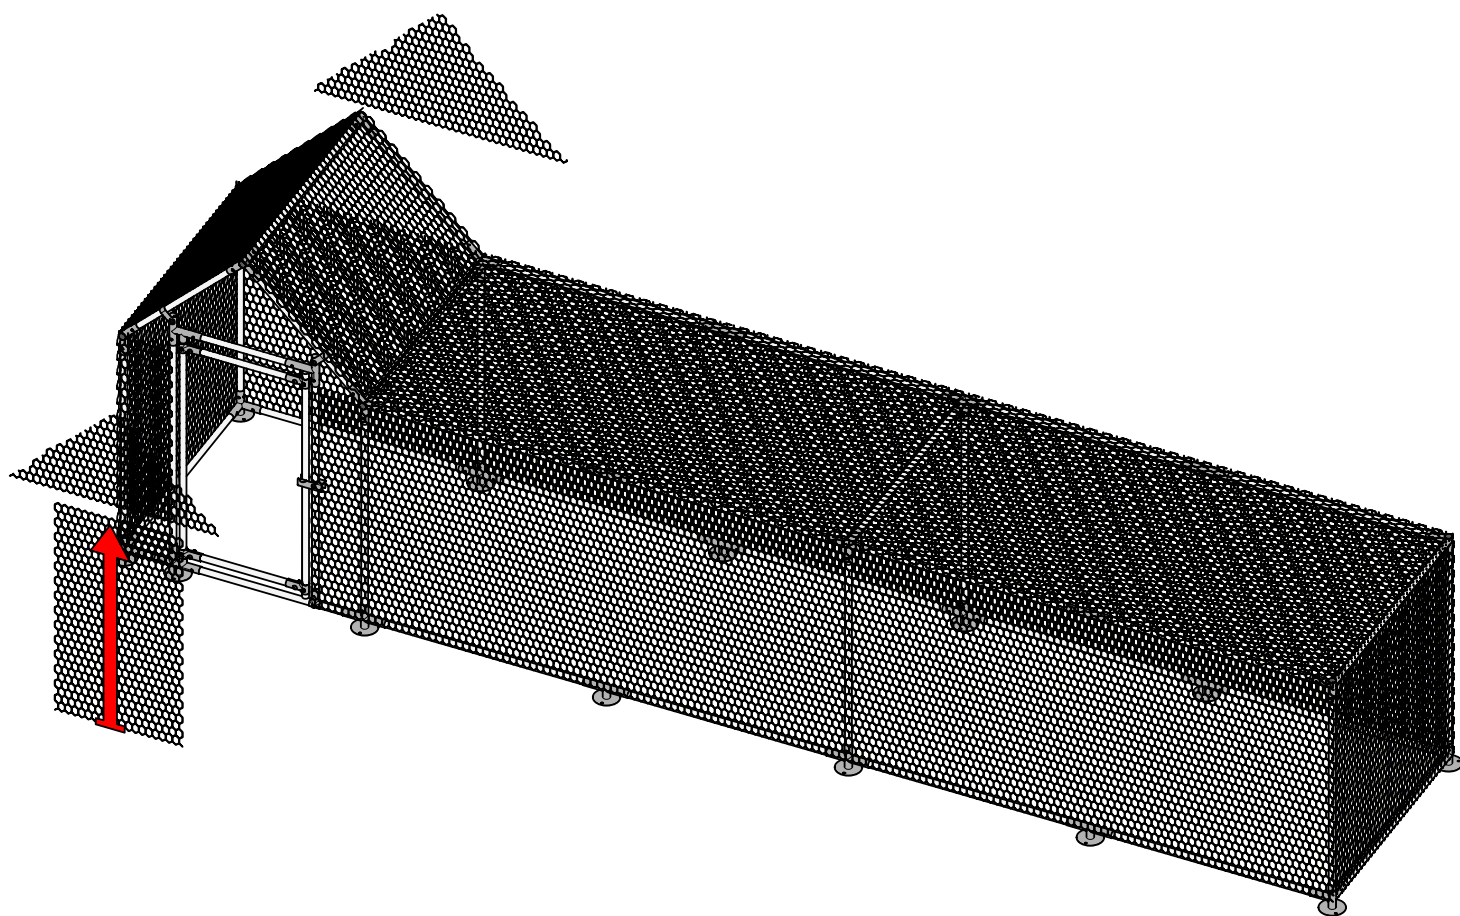

Part	Qty
F	

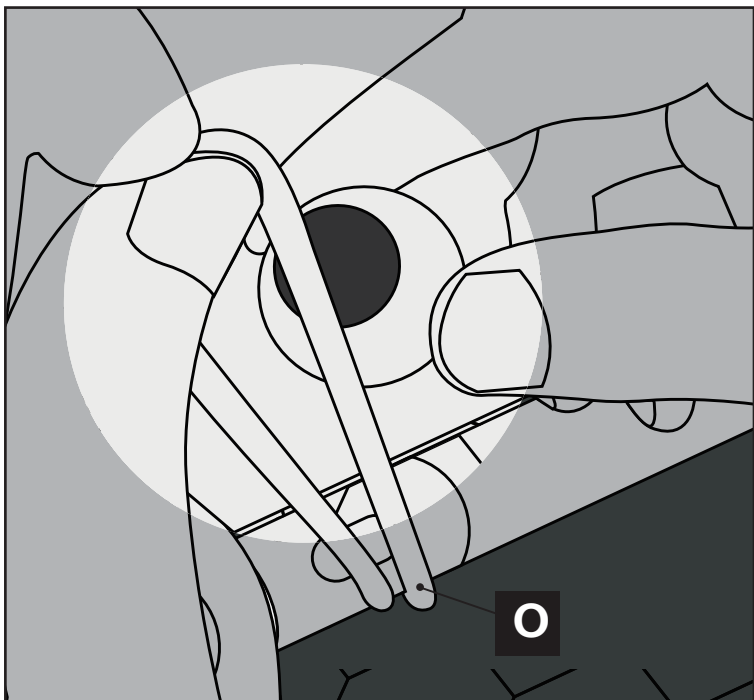

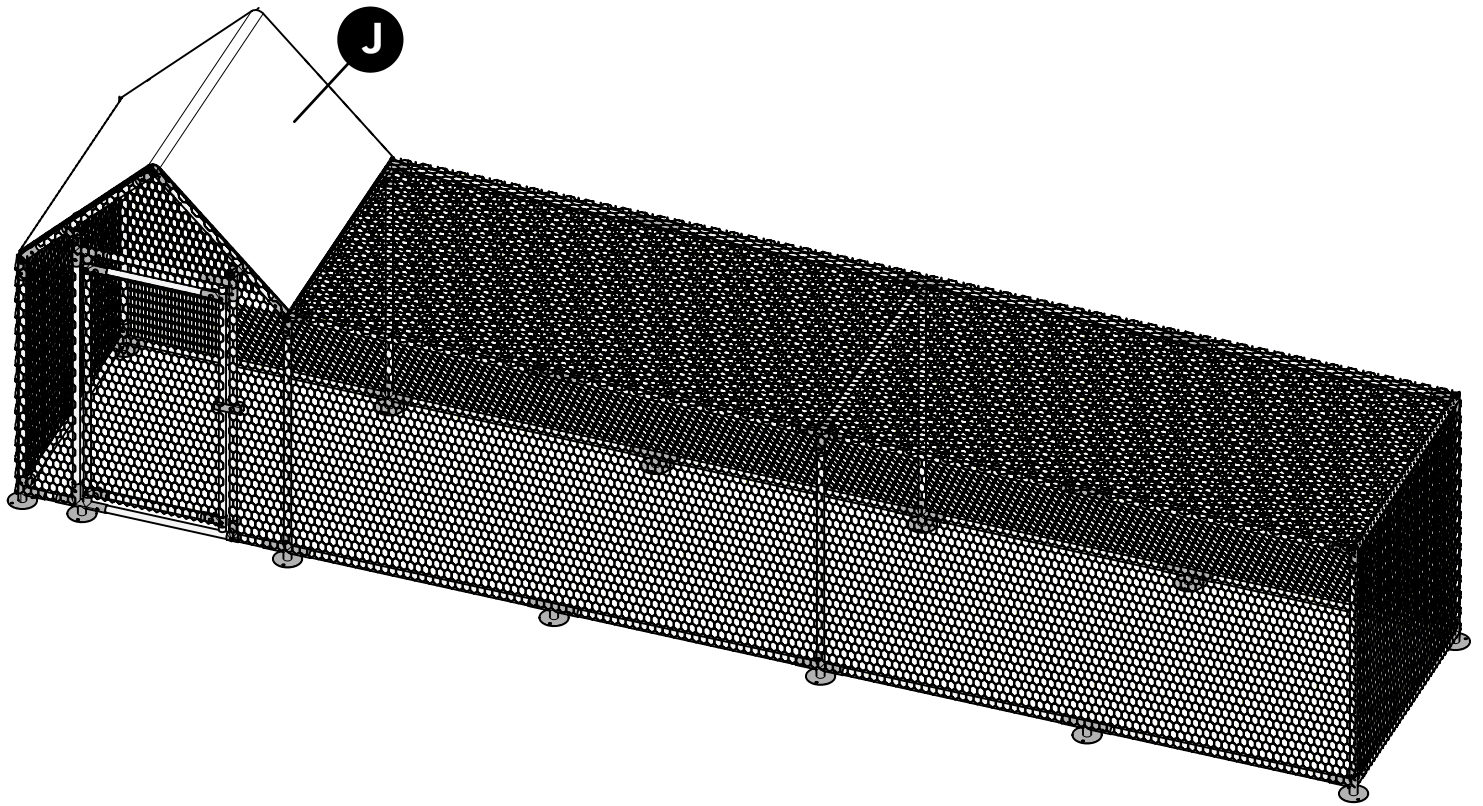

Note

In the package you will find the poultry net. When attaching the net to the chicken run structure, do not pre-cut the net. Instead, roll the net along the tubes and cut it. The arrows on the illustrations indicate the flow of the net. Follow the arrows to roll and cut the net. Use zip-ties to fasten the net to the tubes.

**Note**

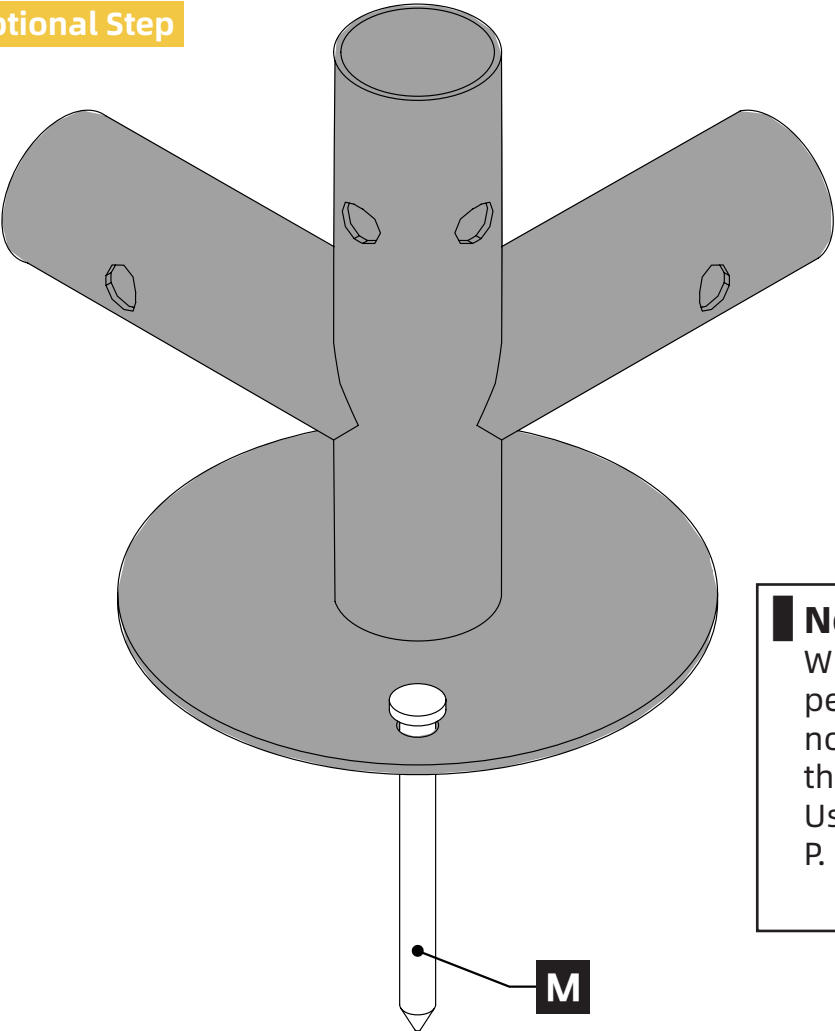

For the net used in this step, it's easier to measure and cut the net, and then fasten the cut net to the tubes.

Part	Qty
J	1
O	14

**Note**

The Cover/Tarp J is secured onto the structure using bungee ball O. Use one bungee ball per grommet on the tarp. Notice that, at the four corners, use two bungee balls for one grommet.

Part	Qty
M	13

Note
When you feel like you have chosen a perfect spot for your chicken run and do not plan to move it, you can fasten it to the ground using the anchor M. Use one M per ground joint, like C, D, and P.

Note
Find all the joint CA, W, and V. Use plastic cap S to cover the smaller tube of these joints.
