ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

Before You Begin:

- Ensure power is turned off at the circuit breaker before installation.
- Read all instructions carefully.
- Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

Step-by-Step Installation:

Step 1: Pass the wires through the rod, then securely screw the rod onto the fixture body. (The rod length can be extended by combining multiple sections.)
Step 2: Continue passing the wires through the rod and complete the rod assembly as needed.
Step 3: Ensure the rod is securely tightened and fixed to the fixture body.
Step 4: Pass the wires through the sloped ceiling adapter assembly inside the canopy, then tighten the sloped ceiling adapter onto the rod.
Step 5: Use the mounting screws to attach the mounting bracket to the electrical junction box on the ceiling.
Step 6: Wire Connections
· Connect the live wire (Black) from the fixture to the live wire (+) from the power sourceusing a wire nut.
· Connect the neutral wire (White) from the fixture to the neutral wire (-) from the power source using a wire nut.
* Ensure no exposed wires are visible to prevent electrical hazards.
· Secure the fixture ground wire to the mounting bracket using the green ground screw and connect it to the external ground wire.
Step 7: Align the canopy with the mounting bracket. Use the decorative screws provided to fix the canopy tightly against the ceiling.
Step 8: Use the decorative screws provided to fix the canopy tightly against the ceiling.
Step 9: Install the bulb (not included) into the socket.
Step 10: Install the glass lampshade onto the lampholder. Tighten until securely installed. Do not twist with excessive force to avoid damaging or breaking the glass.

Safety Instructions:

To avoid fire, shock, and serious personal injury, follow all instructions carefully.
1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock, be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
