

THEODORE ALEXANDER

Inverted Floweret 2

D2534S50676-4083

Inverted Floweret 2 is an enticing large-scale work on canvas that beckons deeper consideration. This painting offers a striking interplay of light and dark that instills an air of mystery. Inspired by radiographic technique, this creative representation gives the petals a celestial presence. The blossom appears to be backlit, its petals outlined with sharp precision. Tonality is an essential character in this monochromatic work as light and shadow play off each other and add depth and dimension. This dramatic work prompts the viewer to perceive an intrinsic, profound beauty that waits beyond the surface of the bloom.

An elegant composition of positive and negative space, Inverted Floweret 2 is a romantic presentation of a flower in a captivating companion piece to Inverted Floweret 1. Part of the carefully curated ART by TA Collection.
