

## Sectional Assembly Instruction

All instructions must be followed in order to be assembled correctly.  
Minimum of 2 people are required for assembly.

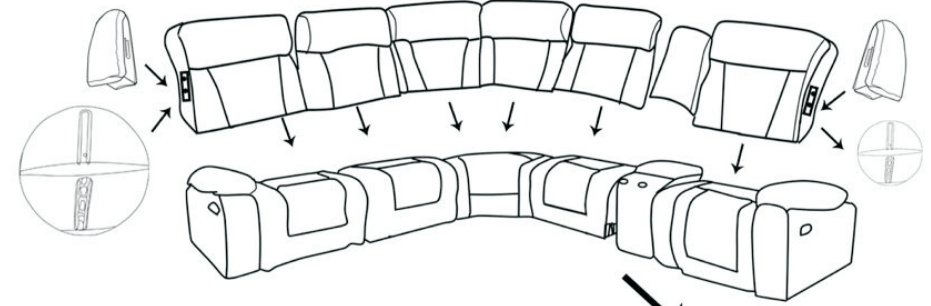

Step 1. Each box will have the connecting pieces together. Do not mix the components from other boxes together. The back cushion of each section is connected by the metal clips sticking out from the base. Align the back cushion carefully and press down from the top like the image below until you hear the click noise on each side meaning it is connected thoroughly. Do each part separately and do not connect the whole sectional together until all back cushions are securely on.

Note: the corner piece will have two back cushions, one on each side.

Step 2. (Console) The base of the console will have a Velcro on the bottom that will contain the back cushion for it. Assemble the back cushion by aligning the bottom holes of the cushion with the top of the console base. The two bolts will go from the inside of the console going up to the back cushion. Once tightened, close back the Velcro and continue

## Sectional Assembly Instruction

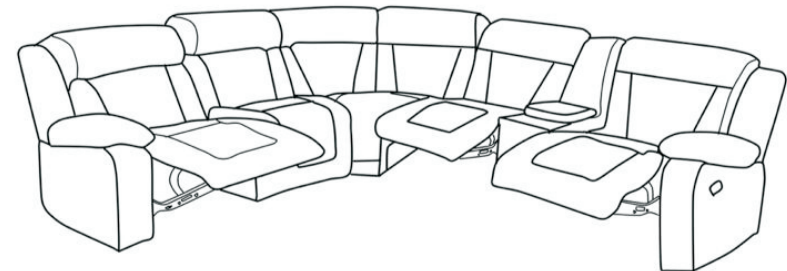

All instructions must be followed in order to be assembled correctly.  
Minimum of 2 people are required for assembly. PART 2

Step 3. Once all back cushions are in, you may start connecting the sectional together. It is required that it is assembled in order from left to right or vice versa. Metal plates on the side (Image on the right) will be visible and pins will be on the next piece to be inserted.

Lift the piece where the pins are in into the metal plates where the opening is on the top. Once completed continue onto the next piece in order.

**Note: The reclining armless chair can be either be placed in the left side or the ride side of the section to your choice.**

Your section is now complete! Easily open the recliner by gently pulling on the latch on the side. For the armless recliner, gently put your had down on the side of the latch and pull up to release the recliner. To put back the recliner back to its original space, gently use your legs/heels and push down or you can use your hands to push it back down. Thank you for your purchase!
