# HOW TO MEASURE FOR A CLOSET DOOR

MKTD4074 ENG REV 2021

MEASURING THE FINISHED OPENING

It is important to measure a finished opening in the following places to the nearest 1/8"

**BYPASS DOORS**  
For bypass doors, use the shortest height measurement and largest width measurement when selecting your door.

|              |                 |                    |                     |
|--------------|-----------------|--------------------|---------------------|
| <b>A</b>     | <b>B</b>        | <b>C</b>           | <b>D</b>            |
| Width at Top | Width at Bottom | Height (Left Side) | Height (Right Side) |
|              |                 |                    |                     |

**BIFOLD & PIVOT DOORS**  
For bifold and pivot doors, use the smallest height measurement and smallest width measurement when selecting your door. NOTE: If the diagonal measurements are more than a 1/2" difference, the doors will not slide open or closed completely and the opening should be fixed so the opening is straighter.

|              |                 |                    |                     |
|--------------|-----------------|--------------------|---------------------|
| <b>A</b>     | <b>B</b>        | <b>C</b>           | <b>D</b>            |
| Width at Top | Width at Bottom | Height (Left Side) | Height (Right Side) |
|              |                 |                    |                     |

  

|          |          |
