FREESTANDING ELECTRIC STOVE

GOS20

The Gosford is designed to combine classic looks with contemporary convenience; breathing new life into an unused area. With fully variable flame and smoke intensity controls, the stove utilises patented Optimyst technology for the world's most realistic electric flame effect.

This fire can be operated by manual or remote control and can be used independently of the fully concealed 2kW heater, meaning you can enjoy the classic feel of the fire all year round. The thermostatic controls mean you can set your fire to produce heat when the room drops to a certain temperature, helping to maintain comfort in your home.

The Dimplex Optimyst range is state-of-the-art, using established ultrasonic technology to create an ultra-fine water mist that rises up and works with the under fuel bed lighting to give a fully three dimensional fire effect. The result is so authentic that it is regularly mistaken for true flames and smoke.
