

PLEASE READ: *Important Information About Your Wreath*

- ✓ Dried florals are a natural product. Over time, these once-living materials continue to lose moisture; changes in texture and color are normal and expected.
- ✓ Please note that this item is **handmade**, so each wreath is **unique**!
- ✓ **Small floral pieces in the box are normal.** This occurs during transit and movement of your wreath's box.
- ✓ To take the wreath out of the box, **carefully** peel off all tape. Cut the zip ties on the bottom outside of the box. While gripping the inner circle of the wreath, **carefully** pull the wreath out and throw away the zip tie pieces.
- ✓ Priming of leaves may be required to match the picture shown. Hang your new wreath on an over-the-door hanger or on a wall to add warmth and greetings to any room!
- ✓ Hanging this wreath outside where it is warm, sunny, rainy, or windy for part of the day will cause the wreath to fade more quickly than if hung indoors.

If your wreath contains any preserved florals, **DO NOT** hang outdoors or in rooms with moisture in the air, such as kitchens with steam kettles or bathrooms! The color from the preserved wreath will bleed and possibly stain your door or wall.

Thank you for your business!

If there are **ANY** problems with your order, please contact our shop **ASAP** so that we can resolve the issue.
