5. This limited warranty applies only to the original end–user or business. It expressly excludes labor charges, removal charges, installation, or other incidental or consequential costs. Any inappropriate application will void the warranty.
6. This warranty cannot be replaced if missed, please keep safe.

Clean and maintain product

How to clean shower head nozzles

1. Just rub the nozzles with your finger or a toothbrush to loosen any deposits, and then run hot water for a few minutes

2. Put the showerhead into a pot . Consider using a smaller container that just about fits the showerhead; this way, you will use less vinegar. You can also use a small bucket or plastic bin.

Fill the pot with enough white vinegar to cover the showerhead. The acids in the vinegar will help dissolve the white mineral deposits on the showerhead.

Let the showerhead soak in the vinegar for 30 minutes. The more soiled the showerhead is, the longer you will have to leave it in the vinegar.

Maintain Chrome and Brushed nickel finished product

1. To clean the products all you need is a high quality microfiber cloth.
2. Apply a high quality chrome cleaner to a clean cotton cloth . and wipe over the chrome. Leave as per product instructions, and then rinse with warm water. Gently remove any product residue using a dry chamois or paper towel
3. How to Clean Chrome: Homemade Solutions In addition to professional products, homespun solutions also have their place when breathing new life into dull chrome. Try this shortcut to achieving chrome cleaning nirvana:

Detergent and warm water! Submerge chrome-plated objects including pots and pans in a sink full of warm water. Add a half-cup of a high quality washing up detergent (Persil washing up liquid is good) and rub gently with a soft cotton cloth to avoid scratching the chrome. Use a scented detergent to leave kitchenware smelling fresh, as well as spotless
