

# Installation Instructions

## INSTALLATION

To ensure the success of the installation, be sure to read these instructions and review the diagrams thoroughly before beginning. Shut off main power at circuit breaker before attempting to install luminaire.

Installation must be performed by a qualified electrician.

### Wiring and canopy installation:

- . Install mounting plate to junction box in ceiling using mounting screws.
- . Secure the two screws to the mounting plate. You should leave the proper length of the two screws beyond the surface of the mounting plate to ensure enough thread is available to properly mount the canopy with the cap nuts.
- . Pull the existing electrical wires out of the junction box and make proper connections using wire nuts.
- . Position canopy over mounting plate and thread screw collar loop on the nipple tightly.

### Fixture Installation:

1. Thread the center pole to the socket part, put the top end through the metal cover and triangle metal piece.
2. Join the 3 pcs wood between the triangle metal piece and the metal cover and fix them with screws. Fix the lower end of the wood with triangle metal piece and screws.
3. Attached the mesh shield to the wood and fix it with screws.
4. Thread the collar to the metal cover and center pole.
5. Join the lighting fixture to the chain and the canopy with quick links.
6. Install the bulbs.

Turn on the switch and enjoy!

Use 60Wx6 Max type A bulb (bulb not included)
