User Manual

ATTENTION

The four screws marked as "J" in the screw pack are an additional set of special anti loosening screws that can prevent the armrest from loosening, but the screws are not easy to unscrew after installation.

Before use, please first connect the controller and then plug in the power cord. Gently press the power switch to start operation, and when you want to stop using it, simply touch the power switch again.

If the controller malfunctions during use, please stop using it immediately. First, disconnect the power, unplug the power connector, and then unplug the controller connector. Then, reconnect the controller connector and plug in the power cord one by one to test if the functionality has returned to normal. If these actions do not restore the product to normal operation, please stop using it immediately and contact the seller.

Note: When not using this product for an extended period, please disconnect the power.

FCC statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
